NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information

Consolidated financial statements of the Powszechna Kasa Oszczędności Bank Polski SA Group ('the PKO Bank Polski SA Group', 'the Group') have been prepared for the year ended 31 December 2011 and include comparative data for the year ended 31 December 2010. Data has been presented in PLN thousand unless indicated otherwise.

The parent company of the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group is Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna ('PKO Bank Polski SA', 'the parent company', 'the Bank').

The parent company was established in 1919 as the Poczтовая Kasa Oszczędnościowa. Since 1950 the parent company operated as the Powszechna Kasa Oszczędności State-owned bank. Pursuant to the Decree of the Council of Ministers dated 18 January 2000 (Journal of Laws No. 5, item 55 with subsequent amendments) Powszechna Kasa Oszczędności (a State-owned bank) was transformed into a state-owned joint-stock company, Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna with its head office in Warsaw, Puławska 15, 02-515 Warsaw, Poland.

On 12 April 2000, Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna was entered into the Register of Companies by the District Court for the capital city of Warsaw, Commercial Court XVI Registration Department. At present, the appropriate Court of Registration is the District Court for the capital city of Warsaw, XIII Economic Department of the National Court Register. The Bank was registered under entry No. KRS 000026438 and was granted a statistical REGON No. 016298263. The Bank's paid share capital amounts to PLN 1 250 000 thousand.

The Bank's shareholding structure is as follows:

Name of entity	Number of shares	Number of votes %	Nominal value of 1 share	Share in equity %
<i>As at 31 December 2011</i>				
The State Treasury	512 406 277	40.99	PLN 1	40.99
Bank Gospodarstwa Krajowego	128 102 731	10.25	PLN 1	10.25

Total	1 250 000 000	100.00	---	100.00

Amendments to the Memorandum of Association of PKO Bank Polski SA

On 14 April 2011, the Extraordinary General Meeting adopted the Resolution No. 3/2011 on amending the Memorandum of Association of PKO Bank Polski SA (the content of the resolution adopted by the Bank was published in the Bank's current report no. 13/2011). The proposed amendment to the Bank's Memorandum of Association was presented by the State Treasury – the Bank's shareholder. The amendments in the resolution referred to the following issues:

- 1) the limitation of the voting rights of the shareholders and adopting a policy for accumulation and reduction of votes,
- 2) the statutory number of members of the Supervisory Board,
- 3) the subject of the first meeting Supervisory Board after election for the new term,
- 4) the definition of the parent company and subsidiary.

The amendments to the Memorandum of Association of PKO Bank Polski SA referred to above, implemented by the Extraordinary General Meeting of the Bank on 14 April 2011, were registered with the National Court Register by the District Court for the capital city of Warsaw, the XIII Economic Department of the National Court Register

As an effect of the above amendments, the announced decrease in share of the State Treasury in the equity of PKO Bank Polski SA, which may reoccur in subsequent years (although the share will not drop below 25%), will not lead to limiting the control of the State Treasury over the Bank's strategic decisions.

The Bank is a listed company on the Warsaw Stock Exchange. According to the Warsaw Stock Exchange Bulletin (Cedula Giełdowa), the Bank is classified under the macro-sector 'Finance', sector 'Banks'.

Business activities of the Group

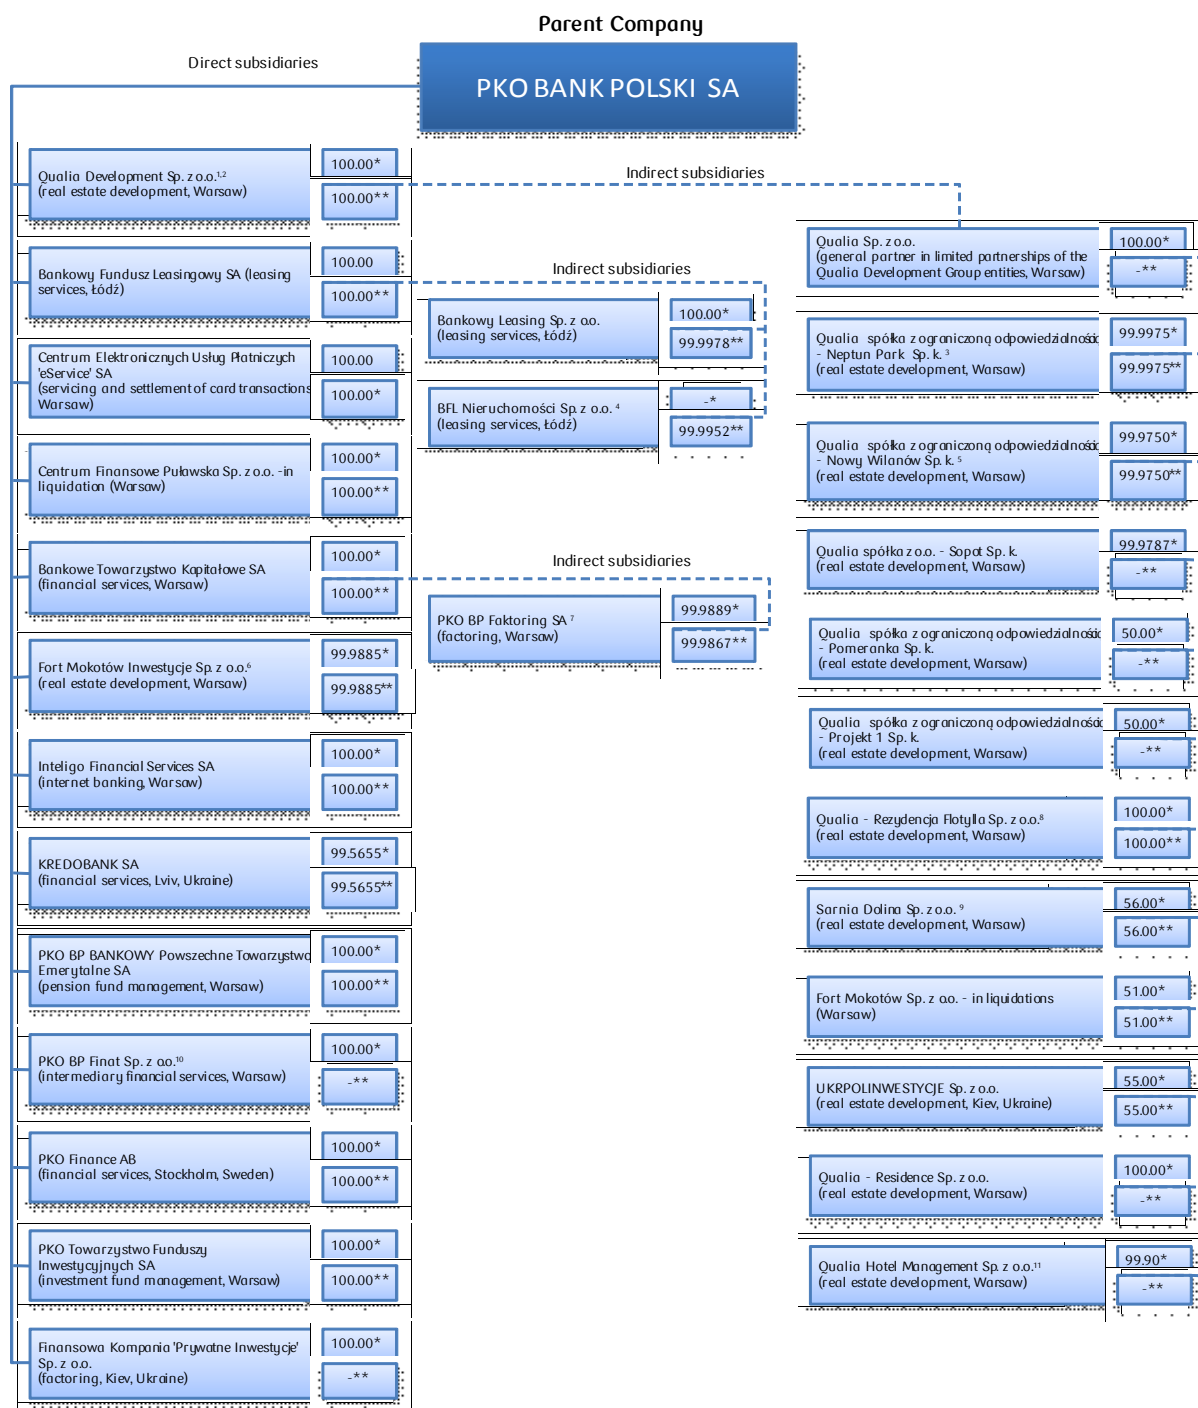

PKO Bank Polski SA is a commercial bank offering services to both domestic and foreign retail, corporate and other clients. PKO Bank Polski SA is licensed to hold foreign exchange and currencies and sell/buy them, as well as perform a full range of foreign exchange services, open and hold bank accounts abroad and to deposit foreign exchange in these accounts.

Structure of the PKO Bank Polski SA Group

The PKO Bank Polski SA Group consists of the following entities:

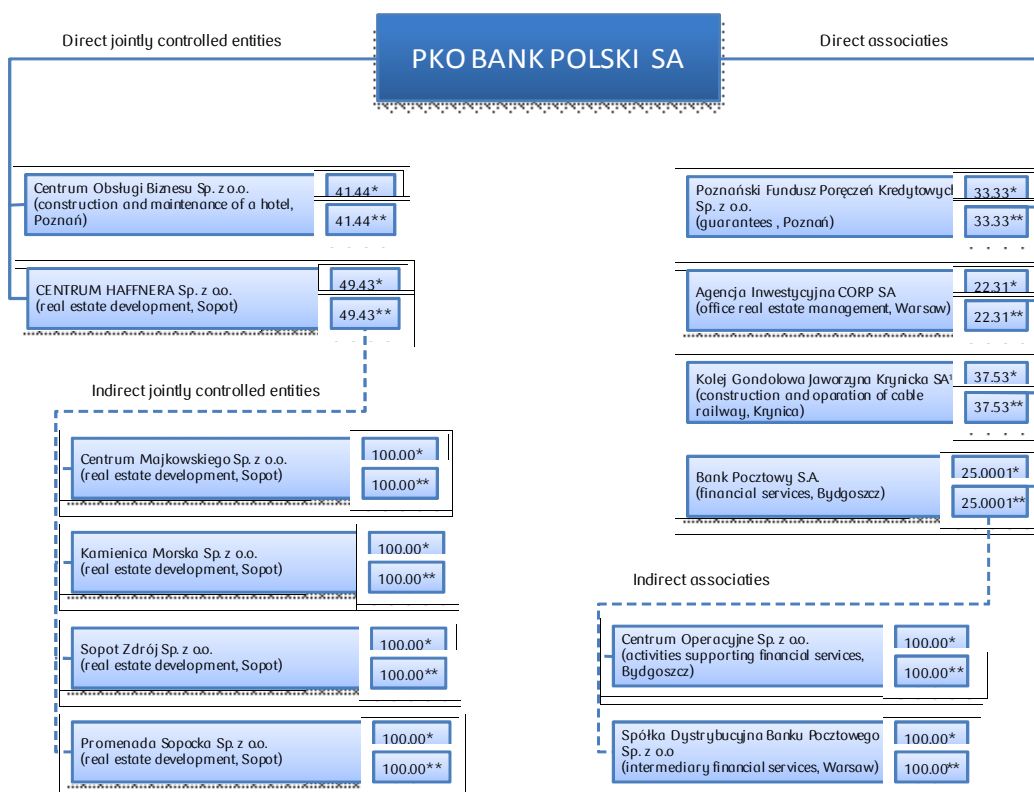

* % share in equity as at 31.12.2011

** % share in equity as at 31.12.2010

- 1) the previous name PKO BP Inwestycje Sp. z o.o.
- 2) in limited partnerships of Qualia Development Group the limited partner is Qualia Development Sp. z o.o. and the general partner is Qualia Sp. z o.o.; in the position of share capital, the total contributions made by the limited partner is presented
- 3) the Company was established as a result of transformation of the company PKO BP Inwestycje - Neptun Park Sp. z o.o.
- 4) the Company was removed from the National Court Register as a result of the merger with Bankowy Leasing Sp. z o.o.
- 5) the Company was established as a result of transformation of the company PKO BP Inwestycje - Nowy Wilanów Sp. z o.o.
- 6) the second shareholder of the entity is Qualia Development Sp. z o.o.
- 7) PKO Bank Polski SA holds 1 share in the Entity
- 8) the previous name of the entity was PKO BP Inwestycje - Rezydencja Flotylla Sp. z o.o.
- 9) the previous name of the entity was PKO BP Inwestycje - Sarnia Dolina Sp. z o.o.
- 10) formerly the subsidiary of Inteligo Financial Services SA
- 11) the second shareholder of the entity is Qualia Sp. z o.o.

Jointly controlled entities and associates included in the consolidated financial statements:

* % share in equity as at 31.12.2011 ** % share in equity as at 31.12.2010

1) In 2011 and in 2010 shares of the entity are recognised in non-current assets held for sale.

Information on changes in the parent's participation in the share capital of the subsidiaries is set out in Note 46 'Changes to the entities of the Group'.

Information on members of the Management and Supervisory Board of the Bank

As at 31 December 2011 the Bank's Management Board consisted of:

- | | |
|-----------------------|--|
| • Zbigniew Jagiełło | President of the Management Board |
| • Piotr Alicki | Vice-President of the Management Board |
| • Bartosz Drabikowski | Vice-President of the Management Board |
| • Andrzej Kołatkowski | Vice-President of the Management Board |
| • Jacek Obłąkowski | Vice-President of the Management Board |
| • Jarosław Myjak | Vice-President of the Management Board |
| • Jakub Papierski | Vice-President of the Management Board |

During the year ended 31 December 2011 the following changes took place in the composition of the Bank's Management Board:

- On 2 March 2011 the Supervisory Board of PKO Bank Polski SA reappointed Zbigniew Jagiełło President of the Management Board of PKO Bank Polski SA for the joint term of office of the Bank's Management Board which commenced on the date of the Annual General Shareholders' Meeting of PKO Bank Polski SA approving the financial statements of PKO Bank Polski SA for 2010.
- On 1 April 2011 the Supervisory Board of PKO Bank Polski SA passed resolutions appointing:
 - Piotr Alicki as the of the Vice-President of the Management Board,
 - Bartosz Drabikowski as the of the Vice-President of the Management Board,
 - Jarosław Myjak as the of the Vice-President of the Management Board,

- Jacek Obłąkowski as the of the Vice-President of the Management Board,
- Jakub Papierski as the of the Vice-President of the Management Board.

In accordance with the resolutions passed, the above-mentioned persons were appointed to the specified positions at PKO Bank Polski SA for the joint term of office of the Bank's Management Board which commenced on the date of the Annual General Shareholders' Meeting of PKO Bank Polski SA approving the financial statements of PKO Bank Polski SA for 2010.

3. On 16 May 2011, the Supervisory Board of PKO Bank Polski SA passed a resolution appointing Andrzej Kołatkowski the Vice-President of the Bank's Management Board responsible for risk and debt collection area for the joint term of office of the Bank's Management Board, which commenced on the date of the Annual General Shareholders' Meeting of PKO Bank Polski SA approving the financial statements of PKO Bank Polski SA for 2010, provided that the approval of the Polish Financial Supervision Authority is obtained.

On 9 August 2011, the Polish Financial Supervision Authority has approved unanimously Andrzej Kołatkowski as Vice-President of the Bank's Management Board.

During the year ended 31 December 2011, the following change took place in the composition of the Bank's Supervisory Board:

The Annual General Shareholders' Meeting of the Bank convened for 30 June 2011, appointed the following members of the Bank's Supervisory Board:

- Cezary Banasiński,
- Tomasz Zganiacz,
- Jan Bossak,
- Mirosław Czekaj,
- Krzysztof Kilian,
- Ewa Miklaszewska,
- Piotr Marczak,
- Marek Mroczkowski,
- Ryszard Wierzba.

The State Treasury, as Authorised Shareholder, has established the list of 9 members of Supervisory Board and has appointed:

- Cezary Banasiński – as the Chairman of the Bank's Supervisory Board,
- Tomasz Zganiacz – as the Deputy Chairman of the Bank's Supervisory Board.

Approval of financial statements

These consolidated financial statements, reviewed by the Bank's Supervisory Board's Audit Committee on 29 February 2012, have been approved for issue by the Bank's Management Board on 23 February 2012 and accepted by the Bank's Supervisory Board on 29 February 2012.

2. Summary of significant accounting policies and estimates and judgements

2.1. Compliance with accounting standards

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the EU as at 31 December 2011, and in the areas not regulated by these standards, in accordance with the requirements of the Accounting Act of 29 September 1994 (Journal of Laws of 2009, no. 152, item 1223 with subsequent amendments) and the respective secondary legislation issued on its basis, as well as the requirements relating to issuers of securities registered or applying for registration on an official quotations market.

The European Commission has adopted IAS 39 'Financial Instruments: Recognition and Measurement' except some decisions concerning hedge accounting. Due to the fact that the Bank applies IFRS as adopted by the European Union ('EU'), the Bank has applied the IAS 39.AG99C in the form adopted by the EU, which allows to designate as a hedged item a portion of cash flows from variable rate deposits for which the effective interest rate is lower than the reference interest rate (not including margins). The IAS 39 as issued by the

IASB introduces limitations in that respect.

2.2. Going concern

The consolidated financial statements of the PKO Bank Polski SA Group have been prepared on the basis that the Group will continue as a going concern during a period of 12 months from the issue date, i.e. since 5 March 2012.

As at the date of signing these consolidated financial statements, the Bank's Management Board is not aware of any facts or circumstances that would indicate a threat to the continuing activity of the PKO Bank Polski SA Group for 12 months following the issue date as a result of any intended or compulsory withdrawal or significant limitation in the activities of the PKO Bank Polski SA Group.

2.3. Basis of preparation of the financial statements

These financial statements have been prepared on a fair value basis in respect of financial assets and liabilities at fair value through profit and loss, including derivatives and financial assets available for sale, with the exception of those for which the fair value cannot be reliably estimated. Other financial assets and liabilities (including loans and advances) are measured at amortised cost with an allowance for impairment losses or at cost with an allowance for impairment losses.

Non-current assets are stated at acquisition cost less accumulated depreciation and impairment allowances. The Group measures non-current assets (or groups of the above-mentioned assets) classified as held for sale at the lower of their carrying amount and fair value less costs to sell.

2.4. Basis of consolidation

2.4.1. Subsidiaries

Subsidiaries are entities (including entities which are not incorporated, such as general partnerships) controlled by the parent company, which means that the parent company has a direct or indirect impact on the financial and operating policy of the given entity in order to gain economic benefits from its operations.

Control is exercised when the parent company holds directly or indirectly more than one-half of the voting rights in a given entity, unless in special circumstances it may be proven that such holdings do not lead to exercising control. Control is also exercised when the Bank has one-half or less voting rights in a given entity and when:

- 1) it has more than one-half of votes on the basis of agreements with other investors,
- 2) it is capable of managing the entity's financial and operational policy on the basis of the Memorandum of Association or an agreement,
- 3) it is capable of appointing and removing most of the Management Board or any equivalent management body where the Management Board or equivalent body exercises control over the entity, or
- 4) it has the majority of votes at the Management Board's or any equivalent management body's meetings where the Management Board or equivalent body exercises control over the entity.

Subsidiaries are fully consolidated from the date on which control was acquired until the day until it ceased.

The 'full' method of consolidation requires the adding up of all full amounts of the individual items of statement of financial position, income statement of the subsidiaries and of the Bank, and making appropriate consolidation adjustments and eliminations. The carrying amount of the Bank's investments in subsidiaries and the equity of these entities at the date of their acquisition are eliminated at consolidation. The following items are eliminated in full at consolidation:

- 1) inter-company receivables and payables, and any other settlements of a similar nature, between the consolidated entities,
- 2) revenue and costs arising from business transactions conducted between the consolidated entities,

- 3) gains or losses from business transactions conducted between consolidated entities, included in the carrying amount of the assets of the consolidated entities, except for losses indicating impairment,
- 4) dividends accrued or paid by the subsidiaries to the parent company and to other consolidated entities,
- 5) inter-company cash flows in the cash flow statement.

The consolidated cash flow statement has been prepared on the basis of the consolidated statement of financial position, consolidated income statement and the additional notes and explanations.

The parent company and consolidated subsidiary reporting periods for the financial statements are co-terminous. Consolidation adjustments are made in order to eliminate any differences in the accounting policies applied by the Bank and its subsidiaries.

2.4.2. Acquisition method

The acquisition of subsidiaries by the Group is accounted for under the acquisition method.

As at the date of the acquisition, identifiable assets taken over, liabilities taken over and all non-controlling shares in the acquired entity are recognised separately from goodwill.

Identifiable assets and liabilities acquired are initially measured at fair value as at the acquisition date. In each and every business combination, all non-controlling shares in the acquired entity are measured at fair value or on a pro rata basis in respect of the share of the non-controlling shares in the identifiable net assets of the target entity.

Goodwill is recognised as at the acquisition date and measured as the excess of the total of:

- 1) the consideration provided, measured at fair value as at the date of the acquisition,
- 2) value of all non-controlling shares in the acquired entity, measured in accordance with the above rules, and
- 3) in the event of a business combination performed in stages, at fair value as at the date of acquiring interest in the capital of the acquired entity, which had been previously owned by the Bank

over the net amount of the value of identifiable assets and liabilities acquired, measured at fair value as at the acquisition date, determined as at the acquisition date.

If the net value, determined as at the acquisition date, of identifiable assets and liabilities acquired, measured at fair value as at the acquisition date is higher than the total of:

- 1) the consideration provided, measured at fair value as at the date of the acquisition,
- 2) value of all non-controlling shares in the acquired entity, measured in accordance with the above rules, and
- 3) in the event of a business combination performed in stages, at fair value as at the date of acquiring interest in the capital of the acquired entity, which had been previously owned by the Bank,

the difference is recognised directly in the income statement.

2.4.3. Associates and jointly controlled entities

Associates are entities (including entities which are not incorporated, such as general partnerships) on which the Group exerts significant influence but whose financial and operating policies it does not control, which usually accompanies having from 20% to 50% of the total number of votes in the decision-making bodies of the entities.

Jointly controlled entities are trade companies or other entities, which are partly controlled by parent company or a significant investor and other shareholders or partners on the basis of the Memorandum of Association, company's agreement or an agreement concluded for a period longer than one year.

Investments in associates and jointly controlled entities are accounted in accordance with the equity method and are initially stated at cost. The Group's investment in associates and jointly controlled entities includes goodwill determined as at the acquisition date, net of any potential accumulated impairment allowances.

The Group's share in the results of the associates and jointly controlled entities from the date of purchase has been recorded in the income statement and its share in changes of other comprehensive income from the date of purchase has been recorded in other comprehensive income. The carrying amount of investments is adjusted by the total movements in particular equity items from the date of their purchase. When the Group's share in the losses of an associate or jointly controlled entity becomes equal or higher than the Group's share in the associate or jointly controlled entity, which covers potential unsecured receivables, the Group discontinues recognising further losses unless it has assumed the obligation or has made payments on behalf of the given associate or jointly controlled entity.

Unrealised gains on transactions between the Group and its associates and jointly controlled entities are eliminated in proportion to the Group's share in the above-mentioned entities. Unrealised losses are also eliminated unless the transaction proves that the given asset transferred has been impaired.

At each balance sheet date, the Group makes an assessment of whether there are any indicators of impairment in the value of investments in associates and jointly controlled entities. If any such indicators exist, the Group estimates the value in use of the investment or the fair value of the investment less costs to sale, depending on which of these values is higher. If carrying amount of the asset exceeds its recovery value, the Group recognises an impairment allowance in the income statement. The projection for the value in use requires making assumptions, e.g. about future cash flows that the Group may receive from dividends or the cash inflows from a potential disposal of the investment, less costs of the disposal. The adoption of different assumptions with reference to the projected cash flows could affect the carrying amount of certain investments.

2.5. Foreign currencies

2.5.1. Functional and presentation currency

Items presented in the financial statements of the individual Group entities, including KREDOBANK SA, Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o., UKRPOLINWESTYCJE Sp. z o.o. and PKO Finance AB are measured in functional currency i.e. in the currency of the basic economic environment in which the given entity operates. The functional currency of the parent company and other entities included in these financial statements, except for KREDOBANK SA, Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o., UKRPOLINWESTYCJE Sp. z o.o. and PKO Finance AB is the Polish zloty. The functional currency of KREDOBANK SA, Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o. and UKRPOLINWESTYCJE Sp. z o.o. is the Ukrainian hryvna and the functional currency of PKO Finance AB is Euro.

Consolidated financial statements are presented in the Polish zloty, which is the functional and presentation currency of the Group.

2.5.2. Transactions and balances denominated in foreign currencies

Foreign currency transactions are translated into the functional currency using exchange rates prevailing at the dates of the transactions. At each balance sheet date items are translated by the Group using the following principles:

- 1) monetary assets denominated in foreign currency are translated into Polish zloty using a closing rate i.e. the average rate communicated by the National Bank of Poland for a given currency prevailing at the balance sheet date,
- 2) non-monetary assets valued at historical cost in foreign currency are translated into Polish zloty using exchange rates prevailing on a day of a particular transaction,
- 3) non-monetary assets designated at fair value through profit and loss in foreign currency are translated into Polish zloty using exchange rates as at the date of the determination of fair value.

Gains and losses on settlements of these transactions and the carrying amount of monetary and monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

UAH	2011	2010
Rate prevailing on the last day of the period	0.4255	0.3722

The lowest rate in the period	3.9345	3.8622

2.6. Financial assets and liabilities

2.6.1. Classification

Financial assets are classified by the Group into the following categories: financial assets designated at fair value through profit and loss, financial assets available for sale, loans and other receivables, financial assets held to maturity. Financial liabilities are classified as follows: financial liabilities designated at fair value through profit and loss and other financial liabilities. The classification of financial assets and liabilities is determined by the Group on initial recognition.

2.6.1.1. Financial assets and liabilities designated at fair value through profit and loss

A financial asset or financial liability at fair value through profit and loss is a financial asset or financial liability that meets either of the following conditions:

- 1) it is classified as held for trading. Financial assets or financial liabilities are classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term, is a part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. A derivative is also classified as held for trading except for a derivative that is a designated and effective hedging instrument.
- 2) upon initial recognition it is classified as designated at fair value through profit and loss. The Group may use this designation only when:
 - a) the designated financial asset or liability is a hybrid instrument which includes one or more embedded derivatives qualifying for separate recognition, and the embedded derivative financial instrument cannot significantly change the cash flows resulting from the host contract or its separation from the hybrid instrument is forbidden,
 - b) it eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch' that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different basis),
 - c) a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with the written risk management principles or investment strategy of the Group.

The Group has a policy of financial assets and liabilities management according to which financial assets and liabilities classified as held for trading and financial assets and liabilities portfolio designated upon initial recognition at fair value through profit and loss are managed separately.

2.6.1.2. Financial assets available for sale

Financial assets available for sale are non-derivative financial assets that are designated as available for sale or are not classified as financial assets:

- a) at fair value through profit and loss (designated by the Group upon initial recognition),
- b) held-to-maturity,
- c) those that meet the definition of loans and advances.

2.6.1.3. Loans, advances and other receivables

Loans and advances and other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- 1) those that the Group intends to sell immediately or in the near term, which are classified as held for trading, and those that the Group upon initial recognition designates as at fair value through profit and loss,
- 2) those that the Group upon initial recognition designates as available for sale,
- 3) those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration, which are classified as available for sale.

2.6.1.4. Financial assets held to maturity

Financial assets held-to-maturity are non-derivative financial assets with fixed or determinable payments and fixed maturity that the Group has the positive intention and ability to hold to maturity other than:

- 1) those that the Group designates upon initial recognition at fair value through profit and loss,
- 2) those that the Group designates as available for sale,
- 3) those that meet the definition of loans and advances.

As at 31 December 2011 and as at 31 December 2010, the Group did not hold any assets classified to this category.

2.6.1.5. Other financial liabilities

Other financial liabilities are the financial liabilities other than measured at fair value through profit and loss which have the nature of a deposit, or a loan or an advance received.

2.6.2. Accounting for transactions

Financial assets and financial liabilities, including forward transactions giving rise to an obligation or a right to acquire or sell in the future a given number of specified financial instruments at a given price, are recognised in the books of account under trade date, irrespective of the settlement date provided in the contract.

2.6.3. Derecognition of financial instruments from a statement of financial position

Financial assets are derecognised when contractual rights to the cash flows from the financial asset expire, or when the financial asset is transferred by the Group to another entity. The financial asset is transferred when the Group:

- 1) the contractual rights to receive the cash flows from the financial asset is transferred, or
- 2) the Group retains the contractual rights to receive cash flows from the financial asset, but assumes a contractual obligation to pay cash flows to an entity outside the Group.

When the Group transfers a financial asset, it evaluates the extent to which it retains the risks and rewards of ownership of the financial asset. In such cases:

- 1) if all the risks and rewards of ownership of the financial asset are substantially transferred, then the Group derecognises the financial asset from the statement of financial position,
- 2) if all the risks and rewards of ownership of the financial asset are substantially retained, then the financial asset continues to be recognised in the statement of financial position,
- 3) if substantially all the risks and rewards of ownership of the financial asset are neither transferred nor retained, then a determination is made as to whether control of the financial asset has been retained. If the Group has retained control, it continues to recognise the financial asset in the statement of financial position to the extent of its continuing involvement in the financial asset, if control has not been retained, then the financial asset is derecognised from the statement of financial position.

The Group does not reclassify financial instruments to or from the category of designated at fair value through profit and loss since they are held or issued.

The Group removes a financial liability (or a part of a financial liability) from its statement of financial position when the obligation specified in the contract is discharged or cancelled or expires.

The Group derecognises loans when they have been extinguished, when they are expired, or when they are not recoverable. Loans, advances and other amounts due are written off against impairment allowances that were recognised for these accounts. In the case where no allowances were recognised against the account or the amount of the allowance is less than the amount of the loan or other receivable, the loan or receivable is written off after, the amount of the impairment allowance is increased by the difference between the value of the receivable and the amount of the allowances that have been recognised to date.

2.6.4. Valuation

When a financial asset or liability is initially recognised, it is measured at its fair value plus, in the case of a financial asset or liability not designated at fair value through profit and loss, transaction costs that are directly attributable to the acquisition or the issue of the financial asset or liability.

Subsequent to the initial recognition financial instruments are valued as follows:

2.6.4.1. Assets and liabilities designated at fair value through profit and loss

Assets and liabilities designated at fair value through profit and loss are measured at fair value with the result transferred to the income statement to the item 'net income from financial instruments at fair value through profit and loss'.

2.6.4.2. Financial assets available for sale

Financial assets available for sale (except for impairment allowances and currency translation differences) are measured at fair value, and gains and losses arising from changes in fair value are recognised in the other comprehensive income until the amount included in the other comprehensive income is reclassified to the income statement when a financial asset is derecognised from a statement of financial position. Interest determined using effective interest rate from financial assets available for sale is presented in the net interest income.

2.6.4.3. Loans, advances and investments held to maturity

They are measured at amortised cost with the use of effective interest rate and an allowance for impairment losses. In the case of loans and advances for which it is not possible to reliably estimate the future cash flows and the effective interest rate, loans advances and investments held to maturity are measured at costs to pay.

2.6.4.4. Other financial liabilities including liabilities resulting from the issue of securities

They are measured at amortised cost. If the time schedule of cash flows from a financial instrument cannot be determined, and thus the effective interest rate cannot be determined fairly, the liability is measured at the amount of consideration due.

Debt instruments issued by the Group are recognised as other financial liabilities and measured at amortised cost.

2.6.4.5. Method of establishing fair value and amortised cost

Fair value of debt and equity financial instruments (at fair value through profit and loss and available for sale), for which there is an active market, is determined with reference to market value (bid price) (LEVEL 1, Note 49).

Fair value of debt and equity financial instruments (designated at fair value through profit and loss and available for sale), for which there is no active market is determined as follows:

- 1) equity instruments designated at fair value through profit and loss and available for sale:
 - a) price of the last transaction concluded on the market, unless in the period between the date of the transaction and the balance date there were significant changes in market conditions which might affect the price (LEVEL 2, Note 49),
 - b) at valuation performed by a specialised external entity providing services of this kind (LEVEL 2 or LEVEL 3, Note 49),
- 2) debt instruments designated at fair value through profit and loss (LEVEL 2, Note 49):
 - a) the method based on market prices of securities (the market value method),
 - b) the method based on market interest rate quotation (the yield curve method),
 - c) the method based on market prices of securities with similar financial characteristics (the reference asset value method),
- 3) debt instruments available for sale:
 - a) the method based on market prices of securities (the market value method) (LEVEL 2, Note 49),
 - b) the method based on market interest rate quotation (the yield curve method), adjusted for a risk margin equal to the margin specified in the issue terms. Material changes in the market interest rates are reflected in the changes in the fair value of such instruments (LEVEL 2, Note 49),
 - c) the method based on market prices of securities with similar financial characteristics (the reference asset value method) (LEVEL 2, Note 49),
 - d) in the case of securities whose fair value cannot be established with the use of the methods mentioned above, the fair value is determined based on the internal valuation model (LEVEL 2 or LEVEL 3, Note 49).

If it is not possible to determine fair value, equity instruments are stated at acquisition cost less impairment losses (LEVEL 3, Note 49).

Amortised cost is the amount at which the financial instrument was measured at the date of initial recognition, decreased by principal repayments, and increased or decreased by the cumulative amortisation of any differences between that initial amount and the amount at maturity, and decreased by any impairment allowances. Amortised cost is determined using the effective interest rate - the rate that discounts the expected future cash flows to the net present value over the period to maturity or the date of next re-pricing, and which is the internal rate of return of the asset/liability for the given period. The calculation of this rate includes payments received/made by the Group which affect financial characteristics of the instrument, with exception of potential future losses related to non-performing loans. Commissions, fees and transaction costs which constitute an integral part of the effective return on a financial instrument, adjust their carrying amounts and are included in the calculation of the effective interest rate.

2.6.5. Derivative instruments

2.6.5.1. Recognition and measurement

Derivative financial instruments are recognised at fair value from the trade date. A derivative instrument becomes an asset if its fair value is positive and it becomes a liability if its fair value is negative. The fair value of instruments that are actively traded on the market is their market price (LEVEL 1, Note 49). In other cases, fair value is derived with the use of valuation models which use data from an active market. Valuation techniques are based on discounted cash flow models, option models and yield curves (LEVEL 2, Note 49).

When the estimated fair value is lower or higher than the fair value as of the preceding balance date (for transactions concluded in the reporting period – initial fair value), the Group includes the difference, respectively, in the net income from financial instruments designated at fair value through profit and loss or in the net foreign exchange gains in correspondence with ‘Derivative financial instruments’. The above recognition method applies to derivative instruments which do not qualify to the application of hedge accounting. The method of recording hedging derivatives is presented in Note 2.6.6.4.

The result of the ultimate settlement of derivative instrument transactions is reflected in the result from financial instruments designated at fair value through profit and loss or in the foreign exchange gains.

The notional amount of the underlying instruments is presented in off-balance sheet items from the date of the transaction until maturity.

2.6.5.2. Embedded derivative instruments

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract (both of a financial or non-financial nature), with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

An assessment of whether a given contract contains an embedded derivative instrument is made at the date of entering into a contract. A reassessment can only be made when there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract.

Embedded derivative instruments separated from host contracts and recognised separately and accounting records are valued at fair value. Valuation is presented in the statement of financial position under ‘Derivative Financial Instruments’. Changes in the valuation at fair value of derivative instruments are recorded in the income statement under the ‘Net income from financial instruments designated at fair value through profit and loss’ or ‘Net foreign exchange gains’.

Derivative instruments are recognised separately from the host contract, if all of the following conditions are met:

- 1) the hybrid (combined) instrument is not measured at fair value, changes of fair value are not recognised in the income statement,
- 2) the economic characteristics and risks of the embedded derivative instrument are not closely related to the economic characteristics and risks of the host contract,
- 3) a separate instrument with the same characteristics as the embedded derivative would meet the definition of a derivative.

In case of contracts which are not financial instruments and which include an instrument that fulfils the above conditions, profits and losses from embedded derivatives are recorded in the income statement under the ‘Net income from financial instruments designated at fair value through profit and loss’ or ‘Net foreign exchange gains’.

2.6.6. Hedge accounting

2.6.6.1. Hedge accounting criteria

The Group applies hedge accounting when all the terms and conditions below, specified in IAS 39, have been met:

- 1) upon setting up the hedge, a hedge relationship, the purpose of risk management by the entity, and the hedging strategy was officially established. The documentation includes the identification of the hedging instrument, the hedged item or transaction, the nature of the hedged risk and the manner in which the entity will assess the effectiveness of the hedging instrument in compensating the threat of changes in fair value of the hedged item or the cash flows related to the hedged risk,
- 2) a hedge was expected to be highly effective in compensating changes to the fair value or cash flows resulting from the hedged risk in accordance with the initially documented risk management strategy relating to the specific hedge relationship,
- 3) in respect of cash flow hedges, the planned hedged transaction must be highly probable and must be exposed to changes in cash flows which may, as a result, have an impact on the income statement,
- 4) the effectiveness of a hedge may be reliably assessed, i.e. the fair value or cash flows related to the hedged item and resulting from the hedged risk, and the fair value of the hedging instrument, may be reliably measured,
- 5) the hedge is assessed on a current basis and its high effectiveness in all reporting periods for which the hedge had been established is determined.

2.6.6.2. Discontinuing hedge accounting

The Group discontinues hedge accounting when:

- 1) a hedge instrument expires, is sold, released or exercised (replacing one hedge instrument with another or extending the validity of a given hedge instrument is not considered to be expiration or release if the replacement or extension of period to maturity is part of the documented hedging strategy adopted by the entity). In such an instance accumulated gains or losses related to the hedging instrument which were recognised directly in other comprehensive income over the period in which the hedge was effective are recognised in a separate item in other comprehensive income until the planned transaction is effected,
- 2) the hedge ceases to meet the hedge accounting criteria. In such an instance accumulated gains or losses related to the hedging instrument which were recognised directly in other comprehensive income over the period in which the hedge was effective are recognised in a separate item in other comprehensive income until the planned transaction is effected,
- 3) the planned transaction is no longer considered probable, therefore, all the accumulated gains or losses related to the hedging instrument which were recognised directly in other comprehensive income over the period in which the hedge was effective, are recognised in the income statement.
- 4) the Group invalidates a hedge relationship.

2.6.6.3. Fair value hedge

As at 31 December 2011 and 2010, the Group did not apply fair value hedge accounting.

2.6.6.4. Cash flows hedges

A cash flow hedge is a hedge against the threat of cash flow volatility which can be attributed to a specific type of risk related to a recorded asset or a liability (such as the whole or a portion of future interest payments on variable interest rate debt) or a highly probable planned transaction, and which could affect the income statement.

Changes in the fair value of a derivative financial instrument designated as a cash flow hedge are recognised directly in other comprehensive income in respect of the portion constituting the effective portion of the hedge. The ineffective portion of a hedge is recognised in the income statement in 'Net income from financial instruments designated at fair value through profit and loss'.

Amounts transferred directly to other comprehensive income are recognised in the income statement in the same period or periods in which the hedged planned transaction affects the income statement.

The effectiveness tests comprise the valuation of hedging transactions, net of interest accrued and currency translation differences on the nominal value of the hedging transactions. These are shown in the income statement, in 'Net interest income' and 'Net foreign exchange gains' respectively.

2.6.7. Offsetting of financial instruments

A financial asset or liability may only be offset when the Group has a valid legal title to offset it and the settlement needs to be performed on a net basis, or the asset and liability are realised at the same time.

2.7. Transactions with a commitment to sell or buy back

Sell-buy back, buy-sell back transactions are transactions for the sale or purchase of a security with a commitment to buy or sell back the security at an agreed date and price.

Sell-buy back transactions are recognised at the date of the transaction under amounts due to other banks or amounts due to customers in respect of deposits, depending on the contractor.

Buy-sell back securities are recognised under amounts due from banks or loans and advances to customers, depending on the counterparty.

Sell-buy back, buy-sell back are measured at amortised cost, whereas securities which are an element of a sell-buy back transaction are not derecognised in the statement of financial position and are measured at the terms and conditions specified for particular securities portfolios. The difference between the sale price and the repurchase price is recognised as interest expense/income, as appropriate, and it is amortised over the term of the contract using the effective interest rate.

2.8. Impairment of financial assets

2.8.1. Assets measured at amortised cost

At each balance date for credit, loan or finance lease, an assessment is made of whether there is objective evidence that a given financial asset or a group of financial assets is impaired. If such evidence exists, the Group determines the amounts of impairment losses. An impairment loss is incurred when there is objective evidence of impairment due to one or more events that occurred after the initial recognition of the asset ('a loss event'), when the loss has a reliably measurable impact on the expected future cash flows from the financial asset or group of financial assets.

Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Group about the following events:

- 1) significant financial difficulties of the issuer or the debtor,
- 2) breach of a contract by the issuer or the debtor, such as a default or a delinquency in contracted payments of interest or principal,
- 3) granting of a concession by the lender to the issuer or the borrower, for economic or legal reasons relating to the borrower's financial difficulty, that the lender would not otherwise consider,
- 4) high probability of bankruptcy or other financial reorganisation of the issuer or the debtor,
- 5) disappearance of an active market for a given financial asset on the active market due to financial difficulties of the issuer or the debtor,
- 6) evidence that there is a measurable reduction in the estimated future cash flows from a group of financial assets, including collectability of these cash flows.

The Group firstly assesses impairment on an individual basis for significant receivables. If, for a given financial asset assessed individually, there are no objective indications of impairment, the asset is included in a group of financial assets with similar characteristics, which are subsequently assessed for impairment on a collective basis.

Loan and lease receivables are classified by the Group on the basis of the amount of exposure into the individual and group portfolios.

In the individual portfolio, each individual loan or lease exposure is analysed for the existence of impairment evidence. If the asset is found to be impaired, an allowance is recognised against the amount of the receivable. If there is no objective evidence of impairment for a given exposure, this exposure is included in the portfolio of loans or lease receivables that are assessed on a collective basis.

Within the group portfolio, groups with similar credit risk characteristics are identified, which are then assessed for impairment on a collective basis.

If there is objective evidence for impairment of financial assets classified as loans and receivables, finance lease receivables or investments held to maturity, the amount of the impairment allowance is the difference between the carrying amount of the asset and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred), discounted using the original effective interest rate from the date on which the financial asset was found to be impaired.

The calculation of the present value of estimated cash flows relating to financial assets for which there is held collateral takes into account cash flows arising from the realisation of the collateral, less costs to possess and sell.

Future cash flows from a group of financial assets assessed for impairment on a collective basis are estimated on the basis of cash flows generated from contracts and historical data generated from assets with similar risk characteristics.

Historical recovery parameters are adjusted on the basis of data from current observations, so as to take into account the impact of current conditions and exclude currently non-relevant factors.

In subsequent periods, if the amount of impairment loss is reduced because of an event subsequent to the impairment being recognised (e.g. improvement in debtor's credit rating), the impairment loss that was previously recognised is reversed by making an appropriate adjustment to impairment allowances. The amount of the reversal is recorded in the income statement.

The Group plans that the adopted methodology used for estimating impairment allowances will be developed in line with the further accumulations of historic impairment data from the existing information systems and applications. As a consequence, new data obtained by the Group could influence the level of impairment allowances in the future. The methodology and assumptions used in the estimates are reviewed on a regular basis to minimise the differences between the estimated and actual loss amounts.

2.8.2. Assets available for sale

At each balance date, the Group makes an assessment, whether there is objective evidence that a given financial asset classified to financial assets available for sale is impaired. If such evidence exists, the Group determines the amounts of impairment losses.

Objective evidence that a financial asset or group of assets available for sale is impaired includes the following events:

- 1) significant financial difficulties of the issuer,
- 2) breach of a contract by the issuer, such as lack of contracted payments of interest or principal or late payments,
- 3) granting of a concession by the lender to the issuer, for economic or legal reasons relating to the borrower's financial difficulty, that the lender would not otherwise consider,
- 4) deterioration of the borrower's financial condition in the period of maintaining the exposure,
- 5) high probability of bankruptcy or other financial reorganisation of the issuer,
- 6) increase in risk of a certain industry in the period of maintaining a significant exposure, in which the borrower operates, reflected in the industry being qualified as 'elevated risk industry'.

The Group firstly assesses impairment on an individual basis for significant receivables.

If there is objective evidence of impairment on financial assets classified as debt securities available for sale not issued by the State Treasury, an impairment allowance is calculated as the difference between the asset's carrying amount and the present fair value estimated as value of future cash flows discounted by the market interest rates set on the based on yield curves for Treasury bonds moved by risk margins.

An impairment loss of a financial asset classified as available for sale is recognised in the income statement, which results in the necessity to transfer the effects of accumulated losses from other comprehensive income to the income statement.

In subsequent periods, if the fair value of debt securities increases, and the increase may be objectively related to an event subsequent to the impairment being recognised, the impairment loss is reversed and the amount of the reversal is recorded in the income statement.

Impairment losses recognised against equity instruments are not reversed through profit and loss.

2.9. Leasing

The Group is a party to lease agreements, based on which it conveys in return for payment to use and take profits (the lessor) from tangible and intangible assets during a fixed period (the rights).

The Group is also a party to lease agreements, based on which it receives tangible fixed assets for an agreed period of time (the lessee).

The classification of lease agreements by the Group is based on the extent to which risks and rewards incidental to ownership of an asset lie with the lessor or the lessee.

2.9.1. The Group as a lessor

As regards finance lease agreements, the Group, as a lessor, has receivables of the present value of contractual lease payments, increased by a possible unguaranteed residual value assigned to the lessor, fixed at the date of the lease agreement. These receivables are disclosed under 'Loans and advances to customers'. Finance lease payments are apportioned between the finance income and the reduction of balance of receivables in a way that provide fixed interest rate from an outstanding debt.

As regards operating lease agreements, initial direct costs that are incremental and directly attributable to negotiating and arranging a lease, are added to the carrying value of the leased asset during the period fixed in the lease agreement, on the same basis as in the case of contracts for hire. Conditional lease payments constitute income when they are due. Lease payments due from agreements, which do not meet the finance lease criteria (operating lease agreements) constitute income in the income statement and are recognised on a straight-line basis during the lease term.

2.9.2. The Group as a lessee

Lease payments under an operating lease and subsequent instalments are recognised as an expense in the income statement and are recognised on a straight-line basis over the lease term.

2.10. Tangible fixed assets and intangible assets

2.10.1. Intangible assets

Intangible assets are identifiable non-monetary assets which do not have a physical form.

2.10.2. Goodwill

Goodwill arising on acquisition of a business entity is initially recognised at the value determined according to the Note 2.4.2. Following the initial recognition, goodwill is stated at the initial value less any cumulative impairment allowances.

Goodwill arising on acquisition of subsidiaries is recognised under 'Intangible assets' and goodwill arising on acquisition of associates and jointly controlled entities is recognised under 'Investments in associates and jointly controlled entities'.

The test for goodwill impairment is carried out at least at the end of each year. Impairment is calculated by estimating the recoverable amount of the cash-generating unit to which the given goodwill relates. If the recoverable amount of the cash-generating unit is lower than its carrying amount, an impairment allowance is recognised.

2.10.3. Software

Acquired computer software licenses are capitalised in the amount of costs incurred on the purchase and preparing the software for use, taking into consideration accumulated amortisation and impairment allowances.

Further expenditure related to the maintenance of the computer software is recognised in costs when incurred.

2.10.4. Other intangible assets

Other intangible assets acquired by the Group are recognised at acquisition or production cost, less accumulated amortisation and impairment allowances.

2.10.5. Development costs

Costs of completed development work are included in intangible assets in connection with future economic benefits and meeting specific terms and conditions, i.e. there is intends, possibility to complete and use the internally generated intangible asset, has proper technical and financial resources to finish the development and to use the asset and it is able to measure reliably the expenditure attributable to the intangible asset during its development which can be directly associated to the creation of the intangible asset.

2.10.6. Tangible fixed assets

Tangible fixed assets are stated at acquisition cost or cost of production, less accumulated depreciation and impairment allowances.

Properties accounted for investment properties are valued according to accounting principles applied to tangible fixed assets.

2.10.7. Capital expenditure accrued

Carrying amount of tangible fixed assets and intangible assets is increased by additional expenditures incurred during their maintenance, when:

- 1) probability exists that the Group will achieve future economic benefits which can be assigned to the particular tangible fixed asset or intangible asset (higher than initially assessed, measured at e.g. by useful life, improvement of service quality, maintenance costs),
- 2) acquisition price or production cost of tangible fixed assets and intangible assets can be reliably estimated.

2.10.8. Amortisation

Depreciation is charged on all non-current assets, whose value decreases due to usage or passage of time, using the straight-line method over the estimated useful life of the given asset. The adopted depreciation/amortisation method and useful life are reviewed on an annual basis.

Depreciation of tangible fixed assets, investment properties and amortisation of intangible assets begins on the first day of the month following the month in which the asset has been brought into use, and ends no later than at the time when:

- 1) the amount of depreciation or amortisation charges becomes equal to the initial cost of the asset, or
- 2) the asset is designated for liquidation, or
- 3) the asset is sold, or
- 4) the asset is found to be missing, or
- 5) it is found - as a result of verification - that the expected residual value of the asset exceeds its (net) carrying amount.

For non-financial fixed assets it is assumed that the residual value is nil, unless there is an obligation of a third party to buy back the asset, or if there is an active market which will continue to exist at the end of the asset's period of use and when it is possible to determine the value of the asset on this market.

Amortisation periods for basic groups of tangible fixed assets, investment properties and intangible assets applied by the Group:

Tangible fixed assets	Periods
Buildings, premises, cooperative rights to premises (including investment properties)	40-60 years
Leaseholds improvements (buildings, premises)	2-60 years (or term of the lease if shorter)
Machinery and equipment	2-15 years
Computer hardware	2-10 years
Means of transport	3-5 years
Intangible assets	Periods
Software	2-15 years
Other intangible assets	1-5 years

Costs relating to acquisition or construction of buildings are allocated to significant parts of the building (components), when such components have different useful lives or when each of the components generates benefits for the Group in a different manner. Each component of the building is depreciated separately.

2.10.9. Impairment allowances of non-financial non-current assets

At each balance date, the Group makes an assessment of whether there are any indicators of impairment of any of its non-financial non-current assets (or cash-generating units). If any such indicators exist, the Group makes an assessment of whether there are any indicators of impairment of any of its no estimates the recoverable amount being the higher of the fair value less costs to sell and the value in use of a non-current asset (or a cash generating unit), if the carrying amount of an asset exceeds its recoverable amount, the Bank recognises an impairment loss in the income statement. The projection for the value in use requires

making assumptions, e.g. about future expected cash flows that the Group may receive from the continued use or disposal of the non-current asset (or a cash-generating unit). The adoption of different assumptions with reference to the projected cash flows could affect the carrying amount of certain non-current assets.

If there are indications for impairment for group of assets, which do not generate cash flows irrespective of other assets or asset groups, and the recoverable amount of a single asset included in common assets cannot be determined, the Group determines the recoverable amount at the level of the cash generating unit to which the asset belongs.

Impairment allowances are recognised if the book value of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

Impairment allowances in respect of cash generating units first and foremost reduce the goodwill relating to those cash generating units (groups of units), and then they reduce proportionally the book value of other assets in the unit (group of units).

Impairment allowances in respect of goodwill cannot be reversed. In respect of other assets, the write-down may be reversed if there was a change in the estimates used to determine the recoverable amounts. An impairment loss may be reversed only to the level at which the book value of an asset does not exceed the book value – less depreciation – which would be determined should the impairment allowances not have been recorded.

2.11. Other items in the statement of financial position

2.11.1. Non-current assets held for sale and discontinued operations

Non-current assets held for sale include assets whose carrying amount is to be recovered as a result of sale and not due to continued use. Such assets only include assets available for immediate sale in the current condition, when such sale is highly probable, i.e. the entity has determined to sell the asset started to seek actively for a buyer and finish the sale process. In addition, such assets are offered for sale at a price which is reasonable with respect to their current fair value and it is expected that the sale will be recognised as completed within one year from the date of classification of the asset into this category.

Non-current assets held for sale are stated at the lower of their carrying amount or fair value less costs to sell. Impairment allowances for non-current assets held for sale are recognised in the income statement for the period, in which these allowances are made. These assets are not depreciated.

Discontinued operations are an element of the Group's business which has been sold or which is qualified as held for sale, and which also constitutes an important separate area of the operations or its geographical area, or is a subsidiary acquired solely with the intention of resale. Operations may be classified as discontinued only when the operations are sold or when they meet the criteria of operations held for sale, whichever occurs earlier. A group for sale which is to be retired may also qualify as discontinued operations.

In case of non-current assets, for whose qualification criteria for the group of non-current assets held for sale are no longer fulfilled, the Group makes reclassification from fixed assets held for sale to the proper category of assets. Non-current assets withdrawn from assets held for sale are valued at lower of two values:

- 1) carrying amount before the moment of qualification to assets held for sale, less depreciation, which would have been included if the asset (or group of assets to be sold) would not have been qualified as held for sale,
- 2) recovery amount for the day of decision of sales abandonment.

2.11.2. Inventories

Inventories related mainly to real estate development activities of the Group and valued at the lower of two values: the purchase price/cost of production and net realisable value.

Expenses incurred in bringing the inventories to their present location and condition are treated as follows: finished goods (housing and service premises) and work in progress (housing and service premises in progress and land held for development) – as direct expenses and part of indirect costs of production. In the case of long-term preparatory or production periods, cost or purchase price is increased by finance charges specifically incurred for such purchases.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The value of inventories disbursement is determined by specific identification of individual purchase prices or production cost of components, which relate to realisation of specific projects.

2.11.3. Accruals and deferred income

Accruals and deferred income mainly comprise commission income recognised using the straight-line method and other income received in advance, which will be recognised in the income statement in future reporting periods. Accruals and deferred income are shown in the statement of financial position under 'Other liabilities'.

Prepayments and deferred costs include particular kinds of expenses which will be recognised in the income statement in future reporting periods. Prepayments and deferred costs are shown in the statement of financial position under 'Other assets'.

2.12. Provisions

Provisions are liabilities of uncertain timing or amount. They are accrued when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

If the effect of the time value of money is material, the amount of the provision is determined by discounting the forecast future cash flows to their present value, using the discount rate before tax which reflects the current market assessments of the time value of money and the potential risk related to a given obligation.

2.13. Restructuring provision

A restructuring provision is set up when general criteria for recognising provisions are met as well as there are met detailed criteria related to the legal or constructive obligation to set up provisions for restructuring costs specified in IAS 37. Precisely, the constructive obligation of restructurisation and recognising provisions arises only when the Group has a detailed, official restructuring plan and has raised justified expectations of the parties to which the plan relates that it will carry out restructuring by starting to implement the plan or by announcing the key elements of the plan to the above-mentioned parties. A detailed restructuring plan specifies at least activities or part of the activities to which the plan relates, the basic locations covered by the plan, the place of employment, functions and estimated number of employees who are to be compensated due to their contract termination, the amount of expenditure which is to be incurred and the date when the plan will be implemented. Legal obligation to recognise a restructuring provision results from the Act dated 13 March 2003 on detailed principles of employment termination from reasons independent from employees (Journal of Laws 2003, No 90, item 844 with subsequent amendments), according to which an employer is obliged to discuss an intention of mass redundancies with the company's trade unions, in particular with regard to the possibilities of avoidance or reduction of the scale of mass redundancies. An employer is also obliged to discuss employees' issues related to redundancies including, in particular, possibilities of retraining or professional trainings, as well as new job opportunities for dismissed employees.

The restructuring provision covers only such direct expenditures arising as a result of the restructuring which at the same time

- 1) necessarily result from the restructuring,
- 2) are not related to the Group's on-going business operations.

The restructuring provision does not cover future operating expenses.

2.14. Employee benefits

According to the Collective Labour Agreement (Zakładowy Układ Zbiorowy Pracy), all employees of PKO Bank Polski SA are entitled to anniversary bonuses after completing a specified number of years in service and to retirement bonuses upon retirement. The Group periodically performs an actuarial valuation of provisions for future liabilities to employees.

The provision for retirement and pension benefits and anniversary bonuses is created individually for each employee on the basis of an actuarial valuation performed periodically by an independent actuary. The basis for calculation of these provisions are internal regulations, and especially the Collective Labour Agreement ('Zakładowy Układ Zbiorowy Pracy') being in force at the Group. Valuation of the employee benefit provisions is performed using actuarial techniques and assumptions. The calculation of the provision includes all bonuses and retirement benefits expected to be paid in the future. The provision was created on the basis of a list including all the necessary details of employees, in particular the length of their service, age and gender. The provisions calculated amount to discounted future payments, taking into account staff turnover, and relate to the service period beginning on the balance sheet date. Gains or losses resulting from actuarial calculations are recognised in the income statement.

The Group creates provisions for future liabilities arising from unused annual leave (taking into account all outstanding unused holiday days), from damages and severance payments made to those employees whose employment contracts are terminated for reasons independent of the employee and periodical settlements for the employee compensation costs incurred in the current period which will be paid out in future periods, including bonuses.

2.15. Borrowing costs

Borrowing costs that may be directly attributable to the acquisition, construction or production of a qualifying asset are capitalised by the Group as part of acquisition or production cost of that asset when it is probable that they will result in future economic benefits and the acquisition or production cost can be measured reliably.

Other borrowing costs are recognised by the Group as an expense in the period in which they are incurred.

2.16. Contingent liabilities and commitments

The Group enters into transactions, which, at the time of their inception, are not recognised in the statement of financial position as assets or liabilities, however they give rise to contingent liabilities and commitments. A contingent liability or commitment is:

- 1) a possible obligation that arises from past events and whose existence will be confirmed only at the time of occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group,
- 2) a present obligation resulting from past events, but not recognised in the statement of financial position, because it is not probable that an outflow of cash or other assets will be required to fulfil the obligation, or the amount of the obligation cannot be estimated reliably.

For contingent liabilities and commitment granted which carry the risk of default by the commissioning party, provisions are recognised in accordance with IAS 37.

Credit lines and guarantees are the most significant items of contingent liabilities and commitment granted.

Upon initial recognition, a financial guarantee is stated at fair value. Following the initial recognition, the financial guarantee is measured at the higher of:

- 1) the amount determined in accordance with IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' and
- 2) the amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with IAS 18 'Revenue'.

2.17. Shareholders' equity

Equity constitutes capital and reserves created in accordance with the legal regulations applicable in Poland and the Memorandum of Association. The classification to particular equity components, discussed in Note 2.17 below, results from the Polish Commercial Companies' Code, the Banking Law and the requirements of IAS 1.7, IAS 1.78.e, IAS 1.54.q-r and IAS 1.79.b. In accordance with IAS 1, equity also includes unappropriated profits and accumulated losses, currency translation differences on translating foreign operations, the effective portions of cash flow hedges and net gains or losses on the valuation of financial instruments classified as available-for-sale. Equity components of the subsidiaries, other than share capital, in a proportion equal to the interest in the subsidiary held by the parent company, are added to respective equity components of the parent company. The Group's equity includes only those parts of the equity of the subsidiaries which arose after the acquisition of shares by the parent company.

2.17.1. Share capital

Share capital comprises solely the share capital of the parent company and is stated at nominal value in accordance with Memorandum of Association and entry to the Register of Entrepreneurs.

2.17.2. Reserve capital

Reserve capital is created according to the Memorandum of Association of the Group entities, from the appropriation of net profits and from share premium less issue costs and it is to cover the potential losses of Group entities.

2.17.3. Other comprehensive income

Other comprehensive income comprises the effects of valuation of financial assets available for sale and the amount of the related deferred tax, as well as the effective part of cash flow hedging resulting from hedge accounting and the related deferred tax. Moreover, the item includes the share of the Parent company in the revaluation reserve of associated entities and foreign exchange differences on translation of the net result of the foreign operation as a rate constituting the arithmetical average of foreign exchange rates for the currency as at the day ending each of the months in the financial year published by the National Bank of Poland, and foreign exchange differences arising on the measurement of net assets in the foreign operation.

2.17.4. General banking risk fund

General banking risk fund in PKO Bank Polski SA is created from profit after tax according to 'The Banking Act' dated 29 of August 1997 (Journal of Laws 2002, No. 72, item 665 with subsequent amendments) and it is to cover unidentified risks of the Bank.

2.17.5. Other reserves

Other reserves are created from the appropriation of net profits. It is uniquely to cover the potential losses in the statement of financial position.

2.17.6. Shareholders' equity also includes

- 1) net result prior to the approval less declared dividends,
- 2) dividends declared after the reporting period but not paid.

The net profit or loss for the year is the profit before tax reported in the income statement for the current year, adjusted for the corporate income tax expense and profits (losses) attributable to non-controlling shareholders.

In accordance with the Polish legislation, only the equity of the parent company and the equity of specific subsidiaries, determined on the basis of stand-alone financial statements, are distributable. In the case of joint stock companies - the amount to be distributed between shareholders may not exceed the net profit for the previous year plus retained earnings and amounts reclassified from the supplementary capital and other reserves accumulated from profit appropriation which may be distributed as dividend. The resulting amount must be decreased by the amount of accumulated losses, Treasury shares and amounts which should be transferred from the net profit for the last year to supplementary capital or other reserves based on the law or the Memorandum of Association. In the case of limited liability companies - the amount to be distributed between shareholders may not exceed the net profit for the previous year plus retained earnings and amounts reclassified from the distributable portion of supplementary capital and other reserves accumulated from profit appropriation. The resulting amount must be decreased by the amount of accumulated losses, Treasury shares and amounts which should be transferred from the net profit for the last year to supplementary capital or other reserves based on the law or the Memorandum of Association.

2.17.7. Non-controlling interest

Non-controlling interest represent the part of capital in a subsidiary company, which cannot be directly or indirectly assigned to the parent company.

2.18. Determination of a financial result

The Group recognises all significant expenses and income in accordance with the following policies: accrual basis, matching principle, policies for recognition and valuation of assets and liabilities, policies for recognition of impairment losses.

2.18.1. Interest income and expense

Interest income and expense comprise interest, including premiums and discounts in respect of financial instruments measured at amortised cost and instruments at fair value, with the exception of derivative financial instruments classified as held for trading.

Interest income and interest expenses are recognised on an accrual basis using the effective interest rate method.

Interest income in case of financial assets or group of similar financial assets for which an impairment loss values are calculated from present values of receivables (that is net of impairment loss) by using current interest rate used for discounting future cash flows for the purposes of estimating losses due to impairment.

Interest income/expense in respect of derivative financial instruments classified as held for trading are recognised in 'Net income from financial instruments at fair value through profit and loss' or 'Net foreign exchange gains' (applied to CIRS), with the exception of derivative instruments classified as hedging instruments into hedge accounting, have been presented in interest income.

Interest income also includes fee and commission received and paid, which are part of the effective interest rate of the financial instrument.

2.18.2. Fee and commission income and expense

Fee and commission income is generally recognised on an accrual basis at the time when the related service is performed. Fee and commission income includes one-off amounts charged by the Group for services not related directly to the creation of loans, advances and other receivables, as well as amounts charged by the Group for services performed over a period exceeding 3 months, which are recognised on a straight-line basis. Fee and commission income also includes fee and commission recognised on a straight-line basis, received on loans granted with unspecified schedule of cash flows for which cannot determine the effective interest rate.

2.18.3. Dividend income

Dividend income is recognised in the income statement of the Group at the date on which shareholders' rights to receive the dividend have been established.

2.18.4. Net income from financial instruments designated at fair value

The result on financial instruments at fair value through profit and loss includes gains and losses arising from the disposal of financial instruments classified as financial assets/liabilities at fair value through profit and loss as well as the effect of their fair value measurement.

2.18.5. Gains less losses from investment securities

Gains less losses from investment securities include gains and losses arising from disposal of financial instruments classified as available for sale and held to maturity.

2.18.6. Foreign exchange gains

Foreign exchange gains comprise foreign exchange gains and losses, both realised and unrealised, resulting from daily revaluation of assets and liabilities denominated in foreign currency using the average NBP exchange rates at the balance date, and from the fair value valuation of outstanding derivatives (FX forward, FX swap, CIRS and currency options).

The Group recognises in net foreign exchange gains both realised and unrealised foreign exchange gains and losses on fair value measurement of unrealised currency options. From an economic point of view, the method of presentation of net gains/losses on currency options applied allows the symmetrical recognition of net gains/losses on currency options and on spot and forward transactions concluded to hedge such options (transactions hedging the currency position generated as a result of changes in the market parameters affecting the currency option position).

The effects of changes in fair value and the result realised on the Gold Index option are also included in the foreign exchange gains due to the fact that the Bank treats gold as one of the currencies, in line with the provisions of the Resolution No. 76/2010 of the Polish Financial Supervision Authority dated 10 March 2010 on the scope and detailed principles for setting capital requirements in relation to the individual risk types (Polish Financial Supervision Authority's Journal of Laws 2010, No. 2, item 11 with subsequent amendments).

Monetary assets and liabilities presented by the Group in the statement of financial position and off-balance sheet items denominated in foreign currency are translated into PLN using the average NBP rate prevailing for a given currency as at the balance date. Impairment allowances for loan exposures and other receivables denominated in foreign currencies, which are created in Polish zloty, are updated in line with a change in the valuation of the foreign currency assets for which these impairment allowances are created. Realised and unrealised currency translation differences are recorded in the income statement.

2.18.7. Other operating income and expense

Other operating income and expense includes income and expense not related directly to banking activity. Other operating income mainly includes gains from sale or liquidation of non-current assets and assets possessed in exchange for debts, recovered bad debts, legal damages, fines and penalties, income from lease/rental of properties. Other operating expense mainly includes losses from sale or liquidation of non-current assets, including assets possessed in exchange for debts, costs of debt collection and donations.

Other operating income and expense in relation to the Group's entities include also income from sale of finished goods, goods for resale and raw materials, and the corresponding costs of their production.

Income from construction services (real estate development activities) is recognised on a completed contract basis, which involves recognition of all construction costs that incurred during the period of construction as work-in-progress. Payments received on account of a purchase of apartments are shown within deferred income.

2.19. Income tax

The income tax expense is classified into current and deferred income tax. The current income tax is recognised in the income statement. Deferred income tax, depending on the source of the temporary differences, is recorded in the income statement or in the item 'Other comprehensive income' in the statement of comprehensive income.

2.19.1. Current income tax

Current income tax is calculated on the basis of gross accounting profit adjusted by non-taxable income, taxable income that does not constitute accounting income, non-tax deductible expenses and tax costs which are not accounting costs, in accordance with tax regulations. These items mainly include income and expenses relating to accrued interest receivable and payable, allowances on receivables and provisions for contingent liabilities and commitments.

While calculating corporate income tax, regulations being in force within particular tax jurisdiction with regard to corporate income tax of capital groups are taken into consideration. Simultaneously, the regulations of Decree of the Minister of Finance dated 7 May 2001 on extending the deadlines for paying corporate income tax prepayments for banks granting mortgage loans (Journal of Laws No. 43, item 482) are taken into consideration. According to the above-mentioned Decree moment of taxation of capitalised interest not paid by the borrower and not subject to temporary redemption by the State budget is deferred to the date of actual repayment or redemption of such interest. Therefore, the Group recognises the deferred income tax liability on income due to capitalised interest on mortgage loans, as described in the Decree.

2.19.2. Deferred income tax

The amount of deferred tax is calculated as the difference between the tax base and book value of assets and liabilities for financial reporting purposes. The Group recognises deferred income tax assets and liabilities. An amount of deferred tax recognised in profit and loss is determined using the statement of financial position method – as a change in deferred income tax assets and liabilities. Deferred tax assets and deferred tax liabilities are presented in the statement of financial position respectively as assets or liabilities. The change in the balance of a deferred tax liability or a deferred tax asset is included in income tax expense, except for the effects of valuation of financial assets recognised in other comprehensive income, where changes in the balance of a deferred tax liability or deferred tax asset are accounted for in correspondence with other comprehensive income. The calculation of deferred tax takes into account the balance of the deferred tax asset and deferred tax liability at the beginning and at the end of the reporting period.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax assets and liabilities are measured using tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

The Group uses the 19% tax rate for entities operating on the territory of Poland, a 16% tax rate for entities operating in Ukraine (in 2010: 21%) and 26.3% tax rate for entities operating in Sweden.

Deferred tax assets are offset by the Group with deferred tax liabilities only when there exists enforceable legal entitlement to offset current tax receivables with current tax liabilities and deferred tax is related to the same taxpayer and the same tax authority.

2.20. Critical estimates and judgements

While preparing financial statements, the Group makes certain estimates and assumptions, which have a direct influence on both the financial statements presented and the notes to the financial statements.

The estimates and assumptions that are used by the Group in determining the value of its assets and liabilities as well as revenues and costs, are made based on historical data and other factors which are available and are considered to be proper in the given circumstances. Assumptions regarding the future and the data available are used for assessing carrying amounts of assets and liabilities which cannot be determined interchangeably using other sources. In making assessments the Group takes into consideration the reasons and sources of the uncertainties that are anticipated at the balance sheet date. Actual results may differ from estimates.

Estimates and assumptions made by the Group are subject to periodic reviews. Adjustments to estimates are recognised in the periods in which the estimates were adjusted, provided that these adjustments affect only the given period. If the adjustments affect both the period in which the adjustment was made as well as future periods, they are recognised in the period in which the adjustments were made and in the future periods.

The most significant areas in which the Group performs critical estimates are presented below:

2.20.1. Impairment of loans and advances

An impairment loss is incurred when there is objective evidence of impairment due to events that occurred after the initial recognition of the asset ('a loss event'), when the loss has a reliably measurable impact on the expected future cash flows from the financial asset or group of financial assets. Future cash flows are assessed by the Group on the basis of estimates based on historical parameters.

The adopted methodology used for estimating impairment allowances will be developed in line with the further possibilities of accumulations of historic impairment data from the existing information systems and applications. As a consequence, acquiring new data by the Group could affect the level of impairment allowances in the future. The methodology and assumptions used in the estimates are reviewed on a regular basis to minimise the differences between the estimated and actual loss amounts. In the case of a +/- 10% change in the present value of estimated cash flows for the Bank's loan portfolio individually determined to be impaired, the estimated impairment allowances would decrease by PLN 212 million or increase by PLN 384 million respectively (as at 31 December 2010 respectively would decrease by PLN 181 million or increase by PLN 378 million). This estimate was made for the loan portfolio assessed for impairment on an individual basis, i.e. on the basis of individual analysis of future cash flows arising both from own payments and realisation of the collateral, i.e. the positions for which an individual method is applied.

2.20.2. Valuation of derivatives and non-quoted debt securities available for sale

The fair value of non-option derivatives and debt securities available for sale not listed on an active market is determined using valuation models based on discounted cash flows expected to be received from the given financial instrument. Options are valued using option pricing models. The variables and assumptions used in a valuation include any available data derived from observable markets.

In the valuation of non-quoted debentures available for sale, assumptions are also made about the contractor's credit risk, which may have an impact on the pricing of the instruments. Any change in these assumptions could affect the valuation of the above-mentioned instruments.

The valuation techniques used by the Bank for non-option derivative instruments are based on yield curve based on available market data (deposit margins on interbank market, IRS quotations). The Bank conducted a simulation to assess the potential influence of change of the yield curve on the transaction valuation. Upwards movement of yield curve by 50 b.p. would result in decrease of non-option derivative instruments valuation by PLN 77 million (as at 31 December 2010: PLN 35 million). A similar downwards movement in opposite direction would result in valuation increase by PLN 82 million (as at 31 December 2010: PLN 37 million), including the instruments covered by hedge accounting: a drop of PLN 83 million (in 2010: PLN 42 million) for upward movement of yield curve and increase of PLN 88 million (in 2010: PLN 50 million) for downward movement of the curve.

2.20.3. Calculation of provision for retirement and pension benefits and anniversary bonuses

The calculation of the provision includes all jubilee bonuses and retirement benefits expected to be paid in the future. The Bank performed a reassessment of its estimates as at 31 December 2011, on the basis of calculation conducted by an independent external actuary. The provisions calculated equate to discounted future payments, taking into account staff turnover, and relate to the period ending on the balance date. An important factor affecting the amount of the provision is the adopted financial discount rate. An increase/decrease in the financial discount rate of 0.25 pp. will contribute to an increase/decrease in the amount of the provision for retirement and pension benefits and jubilee bonuses of approx. PLN 9 million (as at 31 December 2010, an increase/decrease in financial discount rate by 0.5 pp. affected a decrease/increase in the value of the provision for retirement and pension benefits and anniversary bonuses by about PLN 19 million).

2.20.4. Useful economic lives of tangible fixed assets, intangible assets and investment properties

In estimating useful lives of particular types of tangible fixed assets, intangible assets and investment properties, the Group considers following factors:

- 1) expected physical wear and tear, estimated based on the average period of use recorded to date, reflecting the normal physical wear and tear rate, intensity of use etc.,
- 2) technical or market obsolescence,
- 3) legal and other limitations on the use of the asset,
- 4) expected use of the asset assessed based on the expected production capacity or volume,
- 5) other factors affecting useful lives of such assets.

When the period of use of a given asset results from a contract term, the useful life of such an asset corresponds to the period defined in the contract. However, if the estimated useful life is shorter than the period defined in the contract, the estimated useful life is applied.

If the useful life of assets being subject to depreciation and classified as land and buildings was changed by +/- 10 years, it would influence the financial result of the Group as follows: a decrease in depreciation costs by PLN 27 million or an increase in depreciation costs by PLN 137 million respectively (as at 31 December 2010: a decrease in depreciation cost by PLN 27 million or increase in depreciation cost by PLN 152 million respectively).

2.21. Changes in accounting policies

Amendments to standards and interpretations which have come into force and have been applied by the Group since 1 January 2011

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of changes</i>
Amendments to IAS 24 'Related party disclosure'	November 2009	Financial year starting on or after 1 January 2011	Yes	<p>The amendments introduce simplifications within requirements that refer to the disclosure of information by the entities related to state institutions and precise the definition of the related party.</p> <p>These changes have no significant influence on the level of disclosures in the financial statements of the Group. Appropriate disclosures of the transactions of the Bank as a government related entity are included in Note 44 'Transactions with the State Treasury and related entities'.</p>
Amendments to IAS 32 'Classification of rights issues'	October 2009	Financial year starting on or after 1 February 2010	Yes	<p>The amendments relate to rights issue accounting (rights issues, options, warrants) denominated in the currency different from the functional currency of the issuer. According to the amendments, if some conditions are met, it is required to disclose rights issue as equity regardless of the currency that the settlement price is set at.</p> <p>These changes do not apply to the Group due to the fact that the Group does not issue rights issues, options, warrants denominated in the currency different from the functional currency of the issuer.</p>
Amendments to IFRS 1 'First-time Adoption of IFRS'	January 2010	Financial year starting on or after 1 July 2010	Yes	<p>The amendments introduce additional exemptions for first-time adopters regarding disclosures required by amendments to IFRS 7 issued in March 2009 regarding fair value valuation and liquidity risk.</p> <p>These changes do not apply to the Group due to the fact that the Group presents financial statements in accordance with IFRS from 2005.</p>
IFRIC 19 'Extinguishing Financial Liabilities with Equity Instruments'	November 2009	Financial year starting on or after 1 July 2010	Yes	<p>This IFRIC clarifies the accounting principles when an entity renegotiates the terms of its debt with the result that the liability is extinguished through the debtor issuing its own equity instruments to the creditor. This IFRIC requires the equity instrument to be measured at fair value and a gain or loss to be recognised in the profit and loss account based on the fair value of the equity instruments compared to the carrying amount of the debt.</p> <p>This information does not apply to the financial statements of the Group due to lack of such transactions in 2011 and 2010.</p>

*Consolidated Financial Statements of
the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group
for the year ended 31 December 2011*

(in PLN thousand)

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of changes</i>
Amendments to IFRIC 14 'Prepayments of a Minimum Funding Requirement'	November 2009	Financial year starting on or after 1 January 2011	Yes	<p>This interpretation provides guidelines on how to disclose earlier prepayments of a minimum funding requirement as an asset of a paying entity.</p> <p>This information does not apply to the financial statements of the Group due to lack of such transactions in 2011 and 2010.</p>
Amendments to IFRS 2010 (amendments to 7 standards)	May 2010	Most amendments are effective for financial years starting on 1 January 2011	Yes	<p>The amendments comprise changes related to the presentation, disclosure and valuation. They also include terminology and editing changes.</p> <p>The amendments to IFRS 2010 included: IFRS 7. In the scope of the valuation of non-controlling interests and contingent consideration, IAS 1 concerning an entity's choice as to the presentation of the analysis of other comprehensive income (in the statement of changes in equity or in the explanatory notes to the financial statements).</p> <p>These improvements do not have a material effect on the financial statements of the Group. The relevant disclosures in respect of IFRS 7 are presented in Note 54 'Risk Management in the Group'. Amendments to IFRS 3 did not apply to the transactions concluded in the years 2011 and 2010. Additionally, the Bank applies the solution of presenting an analysis of other comprehensive income in the statement of changes in equity.</p>

New standards and interpretations and amendments to existing standards and interpretations, which have been published, but are not yet effective nor applied by the Bank

The International Accounting Standards Board and the International Financial Reporting Interpretations Committee have issued the following standards and amendments to existing standards, which are not yet effective:

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
Amendments to IFRS 1 'Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters'	December 2010	Financial year starting on or after 1 July 2011	No	<p>The amendment regarding severe hyperinflation creates an additional exemption when an entity that has been subject to severe hyperinflation resumes presenting or presents for the first time, financial statements in accordance with IFRS. The exemption allows an entity to elect to measure certain assets and liabilities at fair value, and to use that fair value as the deemed cost in the opening IFRS statement of financial position.</p> <p>The IASB has also amended IFRS 1 to eliminate references to fixed dates for one exception and one exemption, both dealing with financial assets and liabilities. The first change requires first-time adopters to apply the derecognition requirements of IFRS prospectively from the date of transition, rather than from 1 January 2004. The second amendment relates to financial assets or liabilities where the fair value is established through valuation techniques due to no active market and allows the guidance to be applied prospectively from the date of transition to IFRS rather than from 25 October 2002 or 1 January 2004. This means that a first-time adopter may not need to determine the fair value of certain financial assets and liabilities at initial recognition for periods prior to the date of transition. IFRS 9 has also been amended to reflect these changes.</p> <p>These changes do not apply to the Group due to the fact that the Group presents financial statements in accordance with IFRS from 2005.</p>

*Consolidated Financial Statements of
the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group
for the year ended 31 December 2011*

(in PLN thousand)

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
Amendments to IFRS 7 'Transfers of Financial Assets'	October 2010	Financial year starting on or after 1 July 2011	Yes	<p>The amendments require additional disclosures in respect of risk exposures arising from transferred financial assets. The amendment includes a requirement to disclose by class of asset the nature, carrying amount and a description of the risks and rewards of financial assets that have been transferred to another party, yet remaining in the entity's balance sheet. Disclosures are also required to enable to understand the amount of any associated liabilities, and the relationship between the certain financial assets and associated liabilities. Where financial assets have been derecognised, but the entity is still exposed to certain risks and rewards associated with the transferred asset, additional disclosure is required to enable the effects of those risks to be understood.</p> <p>These changes will be applicable to the financial statements of the Group for 2012 and will require the Group's broader disclosures, however it is estimated that Group's scale of changes would not be significant.</p>
Amendments to IAS 12 'Recovery of Underlying Assets'	December 2010	Financial year starting on or after 1 January 2012	No	<p>The amendments relate to measuring deferred tax liabilities and deferred tax assets relating to investment property measured using the fair value model in IAS 40, Investment Property and introduce a rebuttable presumption that an investment property is recovered entirely through sale. This presumption is rebutted if the investment property is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. SIC-21, 'Income Taxes – Recovery of Revalued Non-Depreciable Assets', which addresses similar issues involving non-depreciable assets measured using the revaluation model in IAS 16, 'Property, Plant and Equipment', was incorporated into IAS 12 after excluding from its scope guidance on investment properties measured at fair value.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union. As of today, due to a lack of such transactions in the Group, it is estimated that the above amendments shall not apply to the financial statements of the Group.</p>

(in PLN thousand)

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
Amendments to IAS 1 'Presentation of Financial Statements'	June 2011	Financial year starting on or after 1 July 2012	No	<p>The amendments require entities to separate items presented in other comprehensive income into two groups, based on whether or not they may be reclassified to profit or loss in the future. Additionally, the title of statement of comprehensive income has changed to 'statement of profit or loss and other comprehensive income'.</p> <p>The above changes will apply for the first time to the financial statements of the Group for the year 2012, provided that they are adopted by the European Union. Moreover the above change has a presentation character and will not have material impact on the Group's disclosures.</p>
Amended IAS 19 'Employee Benefits'	June 2011	Financial year starting on or after 1 January 2013	No	<p>The amendments introduce new requirements for the recognition and measurement of defined benefit pension expense and termination benefits, and to the disclosures for all employee benefits.</p> <p>The above changes will apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union. As of today, it is estimated that the amendments will not have material impact on the Group.</p>
Amendments to IAS 32 'Offsetting Financial Assets and Financial Liabilities'	December 2011	Financial year starting on or after 1 January 2014	No	<p>The amendments introduce application guidance to IAS 32 to address inconsistencies identified in applying some of the offsetting criteria. This includes i.a. clarifying the meaning of 'currently has a legally enforceable right of set-off' and that some gross settlement systems may be considered equivalent to net settlement.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2014, provided that they are adopted by the European Union. The above additional explanations do not seem to have material impact on the Group.</p>

*Consolidated Financial Statements of
the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group
for the year ended 31 December 2011*

(in PLN thousand)

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
Amendments to IFRS 7 'Disclosures – Offsetting Financial Assets and Financial Liabilities'	December 2011	Financial year starting on or after 1 January 2013	No	<p>The amendments introduce an obligation of new disclosures that will enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements, including rights of set-off.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union.</p> <p>These changes will have a presentation character and will require from the Group additional disclosures if it will be applicable for the events from 2013.</p>
IFRS 9, 'Financial Instruments Part 1: Classification and Measurement'	November 2009, in October 2010 supplemented with the problem of classification and measurement of financial liabilities, in December 2011 changed the effective date	Financial year starting on or after 1 January 2015	No	<p>The standard introduces the model allowing only two categories of the financial assets classification: those to be measured subsequently at fair value, and those to be measured subsequently at amortised cost. The classification is to be made at initial recognition and it depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument.</p> <p>Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The key change is that an entity will be required to present the effects of changes in own credit risk of financial liabilities designated at fair value through profit or loss in other comprehensive income.</p> <p>The above changes will apply for the first time to the financial statements of the Group for the year 2015, provided that they are adopted by the European Union. The European Union makes commencing work on the adaptation conditional upon the IASB issuing a version of IFRS 9 which includes Section 2 'Impairment' and Section 3 'Hedge Accounting', which as of today are in the draft phase.</p> <p>The effect of IFRS 9 on the adopted accounting policies has not yet been evaluated. In 2012, an analysis is to be performed in respect of the gap arising from the new classification and valuation of financial assets and liabilities within the scope of part 1 of IFRS 9.</p>

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
IFRS 10 'Consolidated Financial Statements'	May 2011	Financial year starting on or after 1 January 2013	No	<p>The new standard replaces all of the guidance on control and consolidation in IAS 27 'Consolidated and separate financial statements' and in the interpretation SIC-12 'Consolidation - special purpose entities'. IFRS 10 changes the definition of control so that the same criteria are applied to all entities to determine control. This definition is supported by extensive application guidance.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union.</p> <p>Based on preliminary analyses, the new standard does not seem to have a significant influence on the Group.</p>
IFRS 11 'Joint Arrangements'	May 2011	Financial year starting on or after 1 January 2013	No	<p>The new standard replaces IAS 31 'Interests in Joint Ventures' and the interpretation SIC-13 'Jointly Controlled Entities – Non-Monetary Contributions by Ventures'. Changes in the definitions have reduced the number of types of joint arrangements to two: joint operations and joint ventures. At the same time, the existing policy choice of proportionate consolidation for jointly controlled entities has been eliminated. Equity method is mandatory for all participants in joint ventures.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union. In the case of the Group it is estimated, that the scope of changes will not be material.</p>
IFRS 12 'Disclosure of Interest in Other Entities'	May 2011	Financial year starting on or after 1 January 2013	No	<p>The new standard applies to entities that have an interest in a subsidiary, a joint ventures, an associate or an unconsolidated structured entity. The standard replaces the disclosure requirements currently found in IAS 28 'Investments in associates'. IFRS 12 requires entities to disclose information that helps financial statement readers to evaluate the nature, risks and financial effects associated with the entity's interests in subsidiaries, associates, joint ventures and unconsolidated structured entities. To meet these objectives, the new standard requires disclosures in a number of areas, including significant judgments and assumptions made in determining whether an entity controls, jointly controls, or significantly influences its interests in other entities, extended disclosures on share of non-controlling interests in group activities and cash flows, summarised financial information of subsidiaries with material non-controlling interests, and</p>

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
				<p>detailed disclosures of interests in unconsolidated structured entities.</p> <p>The above changes will apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union. The changes applied will require additional disclosures to the Group's financial statements, but it is estimated that due to the current wide range of disclosures about the Group's entities in case of the Group the additional scope of disclosures will not be material.</p>
IFRS 13 'Fair Value Measurement'	May 2011	Financial year starting on or after 1 January 2013	No	<p>The new standard aims to improve consistency and reduce complexity by providing a revised definition of fair value, and a single source of fair value measurement and disclosure requirements.</p> <p>The above changes will apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union.</p> <p>As of today it is estimated that due to the character of the new IFRS the scope of changes will not be material.</p>
Revised IAS 27 'Separate Financial Statements'	May 2011	Financial year starting on or after 1 January 2013	No	<p>IAS 27 was changed in connection with the publication of IFRS 10 'Consolidated Financial Statements'. The objective of revised IAS 27 is to prescribe the accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements. The guidance on control and consolidated financial statements was replaced by IFRS 10.</p> <p>The above changes will apply for the first time to the financial statements of the Bank for the year 2013, provided that they are adopted by the European Union.</p> <p>It is estimated that the additional scope of disclosures, due to the current wide range of disclosures about the Group's entities will not be material.</p>

for the year ended 31 December 2011*

(in PLN thousand)

<i>Standard/ interpretation</i>	<i>Introduction date</i>	<i>Application date</i>	<i>Approved by the European Union</i>	<i>Description of potential changes</i>
Revised IAS 28 'Investments in Associates and Joint Ventures'	May 2011	Financial year starting on or after 1 January 2013	No	<p>The amendment of IAS 28 resulted from the IASB's project on joint ventures. The Board decided to incorporate the accounting for joint ventures using the equity method into IAS 28 because this method is applicable to both joint ventures and associates. With this exception, other guidance remained unchanged.</p> <p>The above changes will possibly apply for the first time to the financial statements of the Group for the year 2013, provided that they are adopted by the European Union.</p> <p>According to the accounting policies subsidiaries and associates are recognised using equity method.</p>
IFRIC 20 'Stripping Costs in the Production Phase of a Surface Mine'	October 2011	Financial year starting on or after 1 January 2013	No	<p>The interpretation clarifies that costs from the stripping activity are accounted for expenses of the current production in accordance with the principles of IAS 2, 'Inventories', to the extent that benefits from the stripping activity are realised in the form of inventory produced. To the extent the stripping activity leads to the benefits representing improved access to ore, the entity should recognise these costs as a 'stripping activity asset' within non-current assets, subject to certain criteria of interpretation being met.</p> <p>In accordance with the range of activity of the Bank, IFRIC 20 does not apply.</p>

The Management Board does not expect the introduction of the above-mentioned standards and interpretations to have a significant influence on the accounting policies applied by the Group with the exception of IFRS 9 (an influence of IFRS 9 on accounting principles applied by the Group have not been assessed yet). The Group intends to apply them in the periods indicated in the relevant standards and interpretations (without early adoption), provided that they are adopted by the EU.

3. Information on the segments of activities

The PKO Bank Polski SA Group's reporting scheme is primarily based on the criteria of groups of clients – recipients of products and services offered by the parent company and other entities of the PKO Bank Polski SA Group. Each operating business segment comprises activities of providing products and services that are characterised by similar risk and income – different from other business segments. The segment report below is recognised in an internal reporting system, i.e. the way of presenting data to the Management Board of PKO Bank Polski SA, used to assess achieved results and to allocate resources.

The segment report below presents an internal structure of the PKO Bank Polski SA Group. At present, the PKO Bank Polski SA Group comprises three basic segments: retail, corporate and investment segment:

- 1) The retail segment comprises transactions of the parent company with retail clients, small and medium entities and housing market clients, as well as activities of the following subsidiaries: KREDOBANK SA, Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o., PKO BP BANKOWY Powszechne Towarzystwo Emerytalne SA, PKO Towarzystwo Funduszy Inwestycyjnych SA, Inteligo Financial Services SA, PKO BP Finat Sp. z o.o., Centrum Elektronicznych Usług Płatniczych eService SA, Qualia Development Sp. z o.o. Group and Fort Mokotów Inwestycje Sp. z o.o.

This segment comprises, among others, the following products and services: current and saving accounts, deposits, private banking services, investment products, credit and debit cards, consumer and mortgage loans, corporate loans for small and medium enterprises and housing market customers.

- 2) The corporate segment includes transactions of the parent company with large corporate clients, as well as activities of the Bankowy Fundusz Leasingowy SA Group and the Bankowe Towarzystwo Kapitałowe SA Group.

This segment comprises, among others, the following products and services: current and saving accounts, deposits, depositary services, currency and derivative products, sell buy back and buy sell back transactions, corporate loans, leases and factoring. Within the segment, PKO Bank Polski SA also enters, individually or in a consortium with other banks, into loan agreements financing large investment projects.

- 3) The investment segment comprises the Bank's portfolio activity on its own account, i.e. investing and brokerage activities, interbank transactions, derivative instruments and debt securities transactions and activities of PKO Finance AB and Centrum Finansowe Puławska Sp. z o.o. (own activities). In the net result of the segment, the net result of internal settlements (ALM) related to funds transfer pricing, the result on long-term sources of financing and the result on positions classified for hedge accounting is presented. Internal funds transfer is based on transfer pricing dependant on interest rates. The transactions between business segments are conducted on arm's length. Long-term external financing includes the issuance of bonds, subordinated liabilities and funds under the EMTN programme issuance as well as amounts due to financial institutions.

The PKO Bank Polski SA Group typically settles inter-segment transactions as if they were concluded between unrelated parties, using internal settlement rates. The transactions between business segments are conducted on arm's length.

Accounting policies applied in the segment report are consistent with accounting policies described in Note 2 of these financial statements.

Disclosed values of assets and liabilities are operating assets and liabilities applied by operating activities segment. Values of assets, liabilities, income and expenses of a particular segment are based on internal management information. To particular segments there have been assigned assets and liabilities as well as income and expense related to these assets and liabilities.

Consolidated Financial Statements of
the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group
for the year ended 31 December 2011

The current income tax expense was presented only on the Group level.

The tables below present data relating to income and results of individual business segments of the PKO Bank Polski SA Group for the 12-month period ended 31 December 2011 and 31 December 2010 and of selected assets and liabilities as at 31 December 2011 and as at 31 December 2010.

As an additional reporting scheme, the PKO Bank Polski SA Group applies information on segments by geographical areas. The PKO Bank Polski SA Group activity is also conducted in Ukraine – through KREDOBANK SA, Finansowa Kompania ‘Prywatne Inwestycje’ Sp. z o.o. and UKRPOLINWESTYCJE Sp. z o.o.

Total	(2 403 744)	(2 374 901)

*Total expense incurred by the Group related to contributions for retirement pay and pensions.

Operating lease agreements

Operating lease – lessee

Lease agreements, under which the lessor retains substantially the risk and rewards incidental to the ownership of an asset, are classified as operating lease agreements. Lease payments under operating leases are recognised as expenses in the income statement, on a straight-line basis over the lease term.

Rental and tenancy agreements concluded by the Group in the course of its normal operating activities meet the criteria of operating leases. All of the above are arm's length agreements.

The table below presents data on operating lease agreements concluded by the Group.

	31.12.2011	31.12.2010
Total value of future lease payments under irrevocable operating lease		
For the period:		
up to 1 year	106 028	92 788
from 1 year to 5 years	173 614	153 089
above 5 years	61 348	51 125
Total	340 990	297 002

Lease and sub-lease payments recognised as an expense of a given period from 1 January 2011 to 31 December 2011 amounted to PLN 129 812 thousand (in the period from 1 January 2010 to 31 December 2010 PLN 118 392 thousand).

13. Share of profit (loss) of associates and jointly controlled entities

Entity	2011	2010
Jointly controlled entities		
Centrum Obsługi Biznesu Sp. z o.o.	(3 991)	(1 883)
Centrum Haffnera Sp. z o.o. Group	(21 316)	(6 077)

Current income tax liabilities/receivables

	31.12.2011	31.12.2010
Current income tax receivables	5 957	4 318
Current income tax liabilities	78 810	67 744

The Group entities are subject to corporate income tax. The amount of current tax liability is transferred to the appropriate tax authorities. The final settlement of the corporate income tax liabilities of the Group entities for the year 2011 is made within the statutory deadline of 31 March 2012.

According to regulations on considering tax liabilities as past due, tax authorities can verify the correctness of income tax settlements within 5 years from the end of the accounting year in which the tax declaration was submitted.

The item temporary negative differences concerning Group's entities in respect of deferred tax as at 31 December 2011, in accordance with IAS 12, includes the tax effect of unsettled tax losses in the amount of PLN 52 436 thousand, including the tax loss of KREDOBANK SA in the amount of PLN 49 979 thousand. In accordance with the tax jurisdiction binding on the territory of Ukraine, the right to settling of the unsettled tax losses is not in principle restricted by any expiry date. Yet, the ability to settle tax losses which arose before 2011 has been questioned by the Ukrainian tax authorities as a result of a tax inspection carried out. At the same time the Group's analysis of binding tax and judicial decisions and external opinions obtained indicate that there are no effective grounds for questioning the ability to settle those losses. In consequence, KREDOBANK SA appealed to the tax authorities against this decision and is waiting for the decision. The Management Board of the Bank is of the opinion that the appeal will be effective.

15. Earnings per share

Basic earnings per share

The basic earnings per share ratio is calculated on the basis of profit attributable to ordinary shareholders of the Bank, by dividing the respective profit by the weighted average number of ordinary shares outstanding during a given period.

Earnings per share

	2011	2010
Profit per ordinary shareholder (in PLN thousand)	3 807 195	3 216 883
Weighted average number of ordinary shares during the period (in thousand)	1 250 000	1 250 000
Earnings per share (in PLN per share)	3.05	2.57

Earnings per share from discontinued operations

In the periods ended 31 December 2011 and 31 December 2010, the Group did not report any discontinued operations.

Diluted earnings per share

The diluted earnings per share ratio is calculated on the basis of profit attributable to ordinary shareholders, by dividing the respective profit by the weighted average number of ordinary shares outstanding during a given period, adjusted for the effect of all potential dilutive ordinary shares.

There were no dilutive instruments in the year 2011 and 2010.

Diluted earnings per share from discontinued operations

In the periods ended 31 December 2011 and 31 December 2010 the Group did not report any discontinued operations.

16. Dividends paid (in total and per share) on ordinary shares and other shares

Pursuant to the Resolution No. 8/2011 of the Annual General Shareholders' Meeting of Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna passed on 30 June 2011, the dividend for 2010 amounted to PLN 2 475 000 thousand, i.e. PLN 1.98 per share.

The list of shareholders eligible to receive dividend for 2010 was determined as at 31 August 2011, and the payment was made on 15 September 2011.

As at 31 December 2011, the Bank did not decide on whether to pay dividends. In accordance with the Bank's policy on paying dividends, the Management Board of the Bank, while placing proposals on paying dividends, will take into consideration the necessity to ensure an appropriate level of the capital adequacy ratio and the capital necessary to the Bank's development amounting to 40% of the Bank's net profit for a given calendar year.

NOTES TO THE CONSOLIDATED STATEMENT OF FINANCIAL POSITION

17. Cash and balances with the central bank

	31.12.2011	31.12.2010
Current account with the central bank	6 845 759	3 782 717
Cash	2 295 222	2 398 207
Other funds	1 187	1 488
Total	9 142 168	6 182 412

During the course of the working day, the Bank may use funds from the obligatory reserve account for ongoing payments, on the basis of an instruction submitted to the Central Bank of Poland (NBP). However, the Bank must ensure that the average monthly balance on this account complies with the requirements set in the obligatory reserve declaration.

Funds on the obligatory reserve account bear interest of 0.9 of the rediscount rate for bills of exchange. As at 31 December 2011, this interest rate was 4.275%.

As at 31 December 2011 and 31 December 2010, there were no further restrictions as regards the use of these funds.

21. Derivative hedging instruments

As at 31 December 2011, the Group applies the following hedging strategies:

- 1) hedges against fluctuations in cash flows from mortgage loans in CHF and negotiated term deposits in PLN, resulting from the risk of fluctuations in interest rates and foreign exchange rates, using CIRS transactions,
- 2) hedges against fluctuations in cash flows from floating interest rate loans in PLN, resulting from the risk of fluctuations in interest rates, using IRS transactions,
- 3) hedges against fluctuations in cash flows from floating interest rate loans in EUR, resulting from the risk of fluctuations in interest rates, using IRS transactions,
- 4) hedges against fluctuations in cash flows from floating interest rate loans in CHF, resulting from the risk of fluctuations in interest rates, using IRS transactions.

As at 31 December 2010, the Group used the fair value hedge described in points 1-3 above.

As at 31 December 2011 and 31 December 2010, the Group did not use the fair value hedge.

The characteristics of the cash flow hedges applied by the Group are presented in the table below:

Hedging strategy:	Hedges against fluctuations in cash flows from mortgage loans in CHF and negotiated term deposits in PLN, resulting from the risk of fluctuations in interest rates and in foreign exchange rates, using CIRS transactions
Type of hedge relationship	Hedge accounting of cash flow (macro cash flow hedge)
Description of hedge relationship	Elimination of the risk of cash flow fluctuations generated by mortgage loans denominated in CHF and negotiated term deposits in PLN resulting from fluctuations in reference interest rates in CHF and PLN, and changes in foreign exchange rates CHF/PLN during the hedged period.
Hedged risk	Currency risk and interest rate risk.
Hedging instrument	CIRS transactions where the Bank pays coupons based on 3M CHF LIBOR, and receives coupons based on 3M WIBOR on the nominal amount defined in CHF and PLN respectively.
Hedged position	1) The portfolio of floating rate mortgage loans denominated in CHF. 2) The portfolio of short-term negotiable term deposits, including renewals in the future (high probability of occurrence). The Bank designated the hedged position according to the regulations of IAS 39.AG.99C as adopted by the EU.
Hedge efficiency	Hedge effectiveness is verified through the use of prospective and retrospective effectiveness tests. The tests are performed monthly.
Periods in which cash flows are expected and in which they should have an impact on the financial result	January 2012 to October 2026

Hedging strategy: **Hedges against fluctuations from loans in PLN at float rate, resulting from the risk of fluctuations in interest rates, using IRS transactions**

Type of hedge relationship	Hedge accounting of cash flow (macro cash flow hedge)
Description of hedge relationship	Elimination of the risk of cash flow fluctuations generated by floating rate PLN loans resulting from the interest rate risk in the period covered by the hedge.
Hedged risk	Interest rate risk.
Hedging instrument	IRS transactions where the Bank pays coupons based on variable 3M WIBOR, and receives coupons based on a fixed rate on the nominal amount for which they were concluded.
Hedged position	The portfolio of loans in PLN indexed to the variable 3M WIBOR rate.
Hedge efficiency	Hedge effectiveness is verified through the use of prospective and retrospective effectiveness tests. The tests are performed monthly.
Periods in which cash flows are expected and in which they should have an impact on the financial result	January 2012 to December 2013

Hedging strategy: **Hedges against fluctuations from loans in EUR at float rate, resulting from the risk of fluctuations in interest rates, using IRS transactions**

Type of hedge relationship	Hedge accounting of cash flow (macro cash flow hedge)
Description of hedge relationship	Elimination of the risk of cash flow fluctuations generated by floating rate EUR loan portfolio resulting from the interest rate risk in the period covered by the hedge.
Hedged risk	Interest rate risk.
Hedging instrument	IRS transactions where the Bank pays coupons based on variable 3M EURIBOR, and receives coupons based on a fixed rate on the nominal amount for which they were concluded.
Hedged position	The portfolio of loans in EUR indexed to the variable EURIBOR rate.
Hedge efficiency	Hedge effectiveness is verified through the use of prospective and retrospective effectiveness tests. The tests are performed monthly.
Periods in which cash flows are expected and in which they should have an impact on the financial result	January 2012 to June 2016

Hedging strategy:	Hedges against fluctuations from loans in CHF at float rate, resulting from the risk of fluctuations in interest rates, using IRS transactions
Type of hedge relationship	Hedge accounting of cash flow (macro cash flow hedge)
Description of hedge relationship	Elimination of the risk of cash flow fluctuations generated by floating rate CHF loan portfolio resulting from the interest rate risk in the period covered by the hedge.
Hedged risk	Interest rate risk.
Hedging instrument	IRS transactions where the Bank pays coupons based on variable 3M LIBOR CHF, and receives coupons based on a fixed rate on the nominal amount for which they were concluded.
Hedged position	The portfolio of loans in CHF indexed to the variable 3M LIBOR CHF rate.
Hedge efficiency	Hedge effectiveness is verified through the use of prospective and retrospective effectiveness tests. The tests are performed monthly.
Periods in which cash flows are expected and in which they should have an impact on the financial result	January 2012 to July 2016

Loans and advances granted – net	141 634 494	130 668 119

A detailed description of changes in allowance has been presented in the Note 11.

As at 31 December 2011, the share of impaired loans amounted to 8.0% (as at 31 December 2010: 8.0%), whereas the coverage ratio for impaired loans (calculated as total impairment allowances on loans and advances divided by gross carrying amount of impaired loans) amounted to 48.0% (as at 31 December 2010: 44.6%).

As at 31 December 2011, the share of loans overdue by more than 90 days in the gross amount of loans and advances was 4.6% (as at 31 December 2010: 4.3%).

An increase in the volume of loans valued with the portfolio method in 2011 by PLN 1 107 742 thousand resulted mainly from the increase in delays in repayment in the portfolio of mortgage loans and corporate loans (mainly small and medium enterprises).

Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o.	170	-
Total	227 349	229 740

* the Company was established as a result of transformation of the company PKO BP Inwestycje - Nowy Wilanów Sp. z o.o.

As at 31 December 2011, the Group conducted mandatory goodwill impairment tests in accordance with the model developed on the basis of the guidelines included in IAS 36 taking into consideration the specific nature of operations of particular entities.

The goodwill impairment testing model of PKO BP BANKOWY PTE SA was performed using the *embedded value* method, according to which the value in use of PKO Bank Polski SA's share was determined, the goodwill impairment testing model of Centrum Finansowe Puławska Sp. z o.o.- in liquidation was performed by assessing the liquidation value of the Company, and the goodwill impairment testing models for other companies were based on discounted future cash flows and on the condition of continued holding of the shares.

As a result of the above-mentioned testing, consistently with the previous year, goodwill impairment allowance was recognised as a result of purchasing shares in PKO BP Inwestycje - Nowy Wilanów Sp. z o.o. (currently Qualia spółka z ograniczoną odpowiedzialnością - Nowy Wilanów Sp. k.) in the amount of PLN 2 561 thousand, i.e. in proportion to the disposed portion of cash generating units, to which the goodwill had been attributed (i.e. the project stage understood as an separate building or a complex of multi-apartment buildings constructed by the Company).

OTHER NOTES

39. Transferred financial assets which do not qualify for derecognition from consolidated statement of financial position

As at 31 December 2011 and as at 31 December 2010, the Group did not hold any significant transferred financial assets in such a way that part or all of the financial assets would not qualify for derecognition from statement of financial position.

40. Pledged assets

The Group had the following pledged assets:

40.1. Liabilities from negative valuation of financial instruments

The collateral due to negative valuation of financial instruments comprises placements with banks. The amount of these assets as at 31 December 2011 amounted to PLN 435 957 thousand (as at 31 December 2010 PLN 825 718 thousand).

40.2. Liabilities from sell-buy-back transactions (SBB)

	31.12.2011	31.12.2010
Treasury bonds:		
nominal value	665 043	458 322
carrying amount	643 483	445 460

40.3. Bank deposit guarantee fund

PKO Bank Polski SA contributes to a fund for the guarantee of retail deposits in accordance with Article 25 of the Act on the Bank Guarantee Fund (Bankowy Fundusz Gwarancyjny) dated 14 December 1994 (unified text Journal of Laws 2009, No. 84, item 711 with subsequent amendments).

	31.12.2011	31.12.2010
Value of the fund	535 226	489 891
Nominal value of pledge	565 000	515 000
Type of pledge	Treasury bonds	Treasury bonds
Maturity of the pledge	25.01.2021	25.01.2021
Carrying value of the pledged asset	555 135	506 992

The Bank's contribution to the Bank Guarantee Fund is secured by Treasury bonds with maturities sufficient to secure their carrying amount over the period defined by the above Act. The Fund is increased or decreased on 1 July of each year, in proportion to the amount providing the basis for calculation of mandatory reserve deposits.

40.4. Guarantee Fund for the Settlement of Stock Exchange Transactions

Cash pledged as collateral for securities' transactions conducted by Dom Maklerski PKO BP SA (Brokerage House) are deposited in the National Depository for Securities (KDPW SA), as part of the Guarantee Fund for the Settlement of Stock Exchange Transactions.

	31.12.2011	31.12.2010
Guarantee Fund for the Settlement of Stock Exchange Transactions	3 923	6 950

Each direct participant who holds the status of settlements-making participant is obliged to make payments to the settlement fund which guarantees a proper settlement of the stock exchange transactions covered by that fund. The amount of the payments depends on the value of transactions made by each participant, and is updated by KDPW SA on a daily basis.

41. Contingent liabilities

Underwriting programs

As at 31 December 2011, the Group's underwriting agreements covered the following securities (maximum liability of the Group to acquire securities):

Issuer of securities underwritten	Type of underwritten securities	Off-balance sheet liabilities resulting from underwriting agreement	Contract period	Sub-issue type

Assets pledged as collateral for contingent liabilities

As at 31 December 2011 and as at 31 December 2010 the Group had no assets pledged as collateral for contingent liabilities.

Right to sell or pledge collateral established for the Group

As at 31 December 2011 and as at 31 December 2010, there was no collateral established for the Group which the Group was entitled to sell or encumber with another pledge in the event of fulfilment of all obligations by the owner of the collateral.

42. Legal claims

As at 31 December 2011, the total value of court proceedings in which the PKO Bank Polski SA Group's entities are a defendant was PLN 428 623 thousand, of which PLN 79 202 thousand refers to court proceedings in Ukraine (as at 31 December 2010 the total value of above mentioned court proceedings was PLN 315 447 thousand), while the total value of court proceedings in which the Group's entities are the plaintiff was PLN 698 971 thousand, of which PLN 417 673 thousand referred to court proceedings in Ukraine, mainly related to collection of dues from loan agreements granted by KREDOBANK SA, (as at 31 December 2010 the total value of above mentioned court proceedings was PLN 312 731 thousand).

The most significant legal claims of the Group are described below:

a) unfair competition proceedings

The Bank is a party to proceedings initiated on the basis of a decision dated 23 April 2001 of the President of the Competition and Consumer Protection Office (Urząd Ochrony Konkurencji i Konsumentów - UOKiK) upon request of the Polish Trade and Distribution Organisation (Polska Organizacja Handlu i Dystrybucji - Związek Pracodawców) against the operators of the Visa and Europay payment systems and the banks issuing Visa and Europay/Eurocard/Mastercard banking cards. The claims under these proceedings relate to the use of practices limiting competition on the market of banking card payments in Poland, consisting of applying pre-agreed 'interchange' fees for transactions made using Visa and Europay/Eurocard/Mastercard cards as well as limiting access to this market by external entities. On 29 December 2006, UOKiK decided that the practices, consisting of joint establishment of interchange fee, did limit market competition and ordered that any such practices should be discontinued, and imposed a fine on, among others, PKO Bank Polski SA, in the amount of PLN 16 597 thousand. On 20 December 2011 a hearing was held during which no factual resolution of the appeals was reached. The Court obligated MasterCard to submit explanations concerning the issue and set the date for another sitting of the Court for 31 January 2012. The date of the hearing was appointed for 9 February 2012. In connection with the application of the plaintiffs' attorney, including PKO Bank Polski SA, the court postponed the hearing date for 24 April 2012. As at 31 December 2011 and as at 31 December 2010, the Bank had a liability in the above-mentioned amount.

b) legal claims in KREDOBANK SA

KREDOBANK SA is party to a court dispute with its Client who defaulted on a loan. On 31 January 2011 KREDOBANK SA instigated court proceedings against the above-mentioned Client in connection with the commencement of collection of loan dues, as a result of which the Client filed a counter-claim against KREDOBANK SA for annulling the loan agreements and collateral agreements.

The court accepted the client's claim and determined the loan agreements invalid, in effect the Client is obliged to return to KREDOBANK SA the amount of loan received (UAH 40 860 thousand, i.e. PLN 17 386 thousand at the average NBP rate at the end of 2011), and KREDOBANK SA is obliged to return to the Client the amount of interest received (UAH 4 506.6 thousand, i.e. PLN 1 918 thousand at the average NBP rate at the end of 2011). The amounts due from the Customer were covered in the books of KREDOBANK SA by a 100% impairment allowance. In December 2011, the above-mentioned loan was transferred to Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o. and as at 31 December 2011 a 100% impairment allowance was recorded against this impaired loan.

KREDOBANK SA is considering filing a motion for cassation to the Supreme Court of the Ukraine and for sending the case for reconsideration.

At the same time, having obtained a favourable court verdict, on 31 October 2011 the Client filed a claim against KREDOBANK SA for compensation for direct losses, loss of profits and moral losses. The claim is for the amount of UAH 185 million (i.e. PLN 79 million at the average NBP rate at the end of 2011). Court proceedings are pending on the case.

As at 31 December 2011 the Group did not recognise the provision for the above mentioned compensation claim.

c) re-privatisation claims relating to properties held by the Group

As at the date of these financial statements, five administrative proceedings are pending to invalidate decisions issued by public administration authorities with respect to properties held by the Bank and one administrative proceeding concerning a property acquired by the Bank in liquidation process of Centrum Finansowe Puławska Sp. z o.o. - in liquidation. These proceedings, in the event of an unfavourable outcome may result in re-privatisation claims and one administrative proceeding for the establishment of perpetual usufruct right to a property owned by the Bank. Given the current status of these proceedings as regards stating the invalidity of decisions and verdicts of public administration bodies, it is not possible to assess their potential negative financial effects for the Bank. Moreover, with respect to two properties of the Bank claims were submitted by their former owners (court proceedings are pending).

In the opinion of the Management Board of PKO Bank Polski SA, in 2012 the probability of significant claims arising against the Bank in relation to the above mentioned proceedings is remote.

43. Supplementary information to the consolidated cash flow statement

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, cash on nostro accounts with the National Bank of Poland, current amounts due from banks, as well as other cash equivalents with maturities up to three months from the date of acquisition.

44. Transactions with the State Treasury and related entities

The State Treasury has control over the parent entity of the Group as it holds a 40.99% interest in the Bank's share capital. The Bank's shareholding structure is described in detail in Note 1 'General Information' to these financial statements.

Receivables, securities and liabilities arising from transactions conducted with the State Treasury and other state budgetary agencies are disclosed in the Group's statement of financial position.

In accordance with the 30 November 1995 Act in relation to State support in the repayment of certain housing loans, reimbursement of guarantee premium paid and amendments of several acts (Journal of Laws, 2003, No. 119, item 1115 with subsequent amendments) PKO Bank Polski SA receives payments from the State budget in respect of interest receivable on housing loans.

	2011	2010
Income due to temporary redemption by the State budget of interest on housing loans from the 'old' portfolio recognised for this period	152 960	120 371
Income due to temporary redemption by the State budget of interest on housing loans from the 'old' portfolio received in cash	106 392	106 608
Difference between income recognised for this period and income received in cash - 'Loans and advances to customers'	46 568	13 763

The Act on the coverage of repayment of certain housing loans by State Treasury (Journal of Laws, 2000, No. 122, item 1310 with subsequent amendments) guarantees was passed on 29 November 2000 and came into force on 1 January 2001. In execution of the provisions of the Act, on 3 August 2001 PKO Bank Polski SA signed an agreement with the Minister of Finance acting on behalf of the State Treasury under which the Bank was granted a pledge of repayment of debt arising from housing loans in the so-called 'old' portfolio. On 29 December 2011, the validity period of the agreement (originally until 31 December 2011) was extended until 31 December 2017. The coverage of the so called 'old portfolio' housing loan receivables by the guarantees of the State Treasury results in the neutralisation of the default risk on these loans. The State Treasury guarantees are realised when a borrower fails to repay the loan on the dates specified in the loan agreement. The responsibility of the State Treasury is of an auxiliary nature and is effective if the recovery of the unpaid part of principal and interest which the Bank is obliged to commence, before the Bank lays claims to the State Treasury, becomes ineffective. The above-mentioned law covers 90% of unpaid loans taken out by housing cooperatives. As a consequence of the realisation of the State Treasury's responsibilities as guarantor, the State Treasury itself enters into the rights of the satisfied creditor (the Bank) and thus becomes a creditor towards the borrower, in line with the concept of guarantee.

PKO Bank Polski SA receives commission for settlements relating to redemption of interest by the State Treasury on housing loans.

48. Changes to the entities of the Group, jointly controlled entities and associates

In 2011 the following events, concerning subsidiaries (direct and indirect), affecting the structure of the PKO Bank Polski SA Group took place:

1) concerning Bankowe Towarzystwo Kapitałowe SA

On 12 January 2011, an increase in the share capital of Bankowe Towarzystwo Kapitałowe SA of PLN 3 000 thousand was registered in the National Court Register. As a result of the above-mentioned increase, the Company's share capital amounts to PLN 24 243.9 thousand and consists of 242 439 shares, each of PLN 100 nominal value.

All the shares in the increased share capital were acquired by PKO Bank Polski SA for a price equal to the nominal value of the shares taken up.

As at 31 December 2011, the interest of PKO Bank Polski SA in the share capital and in the votes at the General Shareholders' Meeting of the Company was 100%.

2) concerning PKO BP Factoring SA

On 7 March 2011, an increase in the share capital of PKO BP Faktoring SA in the total amount of PLN 1 500 thousand was registered in the National Court Register. As a result of the above-mentioned increase, the Company's share capital amounts to PLN 9 000 thousand and consists of 9 000 shares, each of PLN 1 thousand nominal value.

All shares in the increased share capital were acquired by Bankowe Towarzystwo Kapitałowe SA, a subsidiary of PKO Bank Polski SA, for PLN 3 000 thousand, while PLN 1 500 thousand was recognised in the Company's reserve capital.

Following the registration of the above-mentioned share issue, the interest of BTK SA in the share capital and in the votes at the General Shareholders' Meeting of the Company is 99.9889%.

3) concerning the process of liquidation of Centrum Finansowe Puławska Sp. z o. o.

On 13 June 2011, an increase in the share capital of Centrum Finansowe Puławska Sp. z o.o. of PLN 39 000 thousand was registered with the National Court Register. As a result of the above-mentioned increase, the Company's share capital amounts to PLN 117 808 thousand and consists of 14 726 shares, each of PLN 8 thousand nominal value.

All shares in the increased share capital were acquired by PKO Bank Polski SA for a price equal to the nominal value of the shares taken up. The funds raised as a result of the above-mentioned capital increase were used for early repayment of the loan with PKO Bank Polski SA.

In the result of the above-mentioned share issue, the interest of PKO Bank Polski SA in the share capital and in the votes at the General Shareholders' Meeting of the Company is still 100%.

On 1 July 2011, PKO Bank Polski SA, as the sole shareholder of Centrum Finansowe Puławska Sp. z o.o., passed a resolution on the Company's winding up and opening its liquidation as of 1 July 2011. The relevant motion was filed with the National Court register on 4 July 2011.

The winding up of the Company will not result in any changes to the scope of activities of the PKO Bank Polski SA Group – in the Bank, activities related to the acquisition of management of the Centrum Finansowe Puławska building in Warsaw together with the property are carried out, which is the main activity conducted by the Company.

4) concerning the takeover of direct control of PKO BP Finat Sp. z o.o. by PKO Bank Polski SA

As part of the process related to the takeover of direct control of PKO BP Finat Sp. z o.o. by the Bank, on 12 September 2011 PKO BP Finat Sp. z o.o. repaid to PKO BP BANKOWY Powszechne Towarzystwo Emerytalne SA capital contribution in the amount of PLN 2 500 thousand.

In the third quarter of 2011 PKO Bank Polski SA bought from its subsidiaries all shares of PKO BP Finat Sp. z o.o., of which:

- On 24 August 2011 bought from Inteligo Financial Services SA 75 999 shares of PKO BP Finat Sp. z o.o. with a total nominal value of PLN 7 599.9 thousand; purchase price of the above-mentioned shares amounted to PLN 9 392.7 thousand.
- On 13 September 2011 bought from PKO BP BANKOWY Powszechne Towarzystwo Emerytalne SA 18 610 shares of PKO BP Finat Sp. z o.o. with a total nominal value of PLN 1 861 thousand; purchase price amounted to PLN 2 300 thousand.

As a result of the above-mentioned transaction, PKO Bank Polski SA directly holds shares of PKO BP Finat Sp. z o.o. which represent 100% interest in the share capital of the Company and entitle to 100% of the votes at the General Shareholders' Meeting.

5) concerning Bankowy Leasing Sp. z o.o.

On 27 January 2011, the increase in the share capital of Bankowy Leasing Sp. z o.o. in the total amount of PLN 6 600 thousand was registered with the National Court Register. All the shares were acquired by Bankowy Fundusz Leasingowy SA – a subsidiary of the Bank – for a price equal to the nominal value of the shares taken up.

On 11 May 2011, the increase in the share capital of Bankowy Leasing Sp. z o.o. in the total amount of PLN 12 700 thousand was registered with the National Court Register. All the shares were acquired by Bankowy Fundusz Leasingowy SA – a subsidiary of the Bank – for a price equal to the nominal value of the shares taken up.

On 28 September 2011 Bankowy Fundusz Leasingowy SA bought from PKO Bank Polski SA 1 share in Bankowy Leasing Sp. z o.o. The purchase price was PLN 0.8 thousand. As a result of the above transaction Bankowy Fundusz Leasingowy SA became the sole shareholder of the company Bankowy Leasing Sp. z o.o.

On 30 December 2011 with the National Court Register was registered:

- the increase in the share capital of Bankowy Leasing Sp. z o.o. in the total amount of PLN 15 414.5 thousand by the share issue, which were granted to Bankowy Fundusz Leasingowy SA as a sole shareholder of the company BFL Nieruchomości Sp. z o.o. (acquiree) in a merger of the subsidiaries of Bankowy Fundusz Leasingowy SA,
- the merger of the subsidiaries of Bankowy Fundusz Leasingowy SA, as a result of which the whole assets of the company BFL Nieruchomości Sp. z o.o. was transferred to the company Bankowy Leasing Sp. z o.o.

As at 31 December 2011 share capital of the Company amounted to PLN 57 414.5 thousand and divides on 114 829 shares of a nominal value of PLN 500 each.

6) concerning BFL Nieruchomości Sp. z o.o.

In 2011, the increase in the share capital of BFL Nieruchomości Sp. z o.o. in the total amount of PLN 8 000 thousand, including: on 27 January in the amount of PLN 1 000 thousand and on 9 May in the amount of PLN 7 000 thousand, was registered with the National Court Register. As a result of the above-mentioned increase, the Company's share capital amounts to PLN 18 400 thousand and consists of 36 800 shares of PLN 500 nominal value each.

All the shares in the increased share capital were taken up by Bankowy Fundusz Leasingowy SA – a subsidiary of PKO Bank Polski SA, for a price equal to the nominal value of the shares taken up.

On 28 September 2011 Bankowy Fundusz Leasingowy SA bought from PKO Bank Polski SA 1 share in BFL Nieruchomości Sp. z o.o. The purchase price was PLN 0.8 thousand. As a result of the above transaction, Bankowy Fundusz Leasingowy SA became the sole shareholder in BFL Nieruchomości Sp. z o.o.

On 30 December 2011 the merger of the subsidiaries of Bankowy Fundusz Leasingowy SA was registered with the National Court Register, whereby all the assets of BFL Nieruchomości Sp. z o.o. was transferred to Bankowy Leasing Sp. z o.o., and BFL Nieruchomości Sp. z o.o. was removed from the register.

7) concerning the Qualia Development Sp. z o.o. Group (till 10 May 2011 appearing under the name of the PKO BP Inwestycje Sp. z o.o. Group)

In 2011, the Qualia Development Sp. z o.o. Group carried out actions aimed at implementing a new concept of development activities within the Group structure, which consists mainly of limited partnerships established to execution of investment projects, in which Qualia Development Sp. z o.o. acts as a limited partner and Qualia Sp. z o.o. acts as a general partner.

The above-mentioned capital increase was registered with the National Court Register on 10 January 2012.

49. Fair value of financial assets and financial liabilities

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing, unrelated parties in an arm's length transaction.

49.1. Categories of valuation at fair value of financial assets and liabilities measured at fair value in the statement of financial position

On the basis of applied methods of valuation at fair value, the Group classifies financial assets and liabilities to the following categories:

- 1) **Level 1:** Financial assets and liabilities whose fair value is stated directly at prices quoted (not adjusted) from active markets for identical assets and liabilities. The Group classified to that category the following items:
 - debt securities valued at fixing from Bondspot platform.
 - debt and equity securities in the Brokerage House (Dom Maklerski) portfolio.
 - debt and equity securities which are traded on regulated market.
- 2) **Level 2:** Financial assets and liabilities whose fair value is determined with use of valuation models where all significant entry data are observable on the market directly (as prices) or indirectly (based on prices). The Group classified to that category the following items:
 - debt securities valued to the curve or those whose price comes from Bloomberg platform or brokerage pages in Reuters system but for which market is not active,
 - non-treasury debt securities issued by other financial entities, local government bodies, non-financial entities quoted on the stock exchange or not traded on a regulated market,
 - securities issued by Ministry of Finance of Ukraine in KREDOBANK SA portfolio,
 - derivative instruments.
- 3) **Level 3:** Financial assets and liabilities whose fair value is determined with use of valuation models, for which available data is not derived from observable markets. The Group classified to this category shares not quoted on Warsaw Stock Exchange (WSE), equity securities portfolio and debt securities portfolio of KREDOBANK SA.

Note 2 'Summary of significant accounting policies and estimates and judgements' provides detailed information on the method of fair value calculation.

The table below presents a classification of financial assets and liabilities presented in the financial statements at fair value divided into three levels of the fair value hierarchy as at 31 December 2011:

Assets and liabilities valued at fair value as at 31.12.2011	Note	Carrying amount	Level 1	Level 2	Level 3
			Prices quoted on the active markets	Valuation techniques based on observable market data	Other valuation techniques
Trading assets	19	1 311 089	1 261 687	49 402	-
Debt securities		1 300 164	1 250 762	49 402	-

TOTAL	10 219 400	5 746 686	4 463 428	9 286

Between 2011 and 2010, there was a change in the approach to the Polish Treasury bonds denominated in Polish zloty for which there is no BondSpot fixing, including the bonds which in line with the principles of the BondSpot market do not have BondSpot fixing due to the short term to maturity. In 2010, the prices for such bonds were obtained from Bloomberg websites or from broker sites in the Reuters system. As from 2011, the revaluation price for the above-mentioned bonds is the market price in the regulated BondSpot market. Apart from the above change, there were no significant transfers between levels 1 and 2 in 2011 and 2010.

The table below presents the classification of financial assets and liabilities measured in the period at fair value divided into a three-level hierarchy (1 January 2011 - 31 December 2011):

	Financial assets designated at fair value through profit and loss	Investment securities available for sale	Total
Opening balance as at 1 January 2011	-	9 286	9 286
Total gains or losses	3 628	3 994	7 622
in financial result	3 628	3 994	7 622
Purchase	-	25 900	25 900
Sales	(3 628)	(3 260)	(6 888)
Closing balance as at 31 December 2011	-	35 920	35 920
Total gains or losses for the period in the financial result for assets held at the end of the period	3 628	3 994	7 622

	Financial assets designated at fair value through profit and loss	Investment securities available for sale	Total
Opening balance as at 1 January 2010	4 159	7 846	12 005
Total gains or losses	(3 885)	1 182	(2 703)
in financial result	(3 885)	262	(3 623)
total in other comprehensive income	-	920	920
Purchase	-	4 950	4 950
Sales	(274)	(3 663)	(3 937)
Transfer to or from level 3	-	(1 029)	(1 029)
Closing balance as at 31 December 2010	-	9 286	9 286
Total gains or losses for the period in the financial result for assets held at the end of the period	(3 885)	262	(3 623)

49.2. Financial assets and liabilities not presented at fair value in the statement of financial position

The Group holds certain financial instruments which are not stated at fair value in the statement of financial position.

Where there is no market value of financial instruments available, their fair values have been estimated using various valuation techniques. The fair value of financial instruments was measured using a model based on estimating the present value of future cash flows by discounting them using relevant interest rates. All models calculations include certain simplifying assumptions and therefore are sensitive to those assumptions. Set out below is a summary of the main methods and assumptions used for estimation of fair values of financial instruments which are not presented at fair value.

For certain categories of financial instruments it has been assumed that their carrying amount equals approximately their fair values, which is due to lack of expected material differences between their carrying amount and their fair value resulting from the features of these groups (such as short term character, high correlation with market parameters, unique character of the instrument). This applies to following groups of financial instruments:

- loans and advances to customers: a portion of the mortgage loans portfolio (the so-called 'old portfolio'), loans with no specified repayment schedule, which are due at the moment of valuation
- amounts due to clients: liabilities with no specified payment schedule, other specific products for which no active market exists, such as housing plan passbooks and bills of savings,
- deposits and interbank placements with maturity date up to 7 days or with a variable interest rate,
- loans and advances granted and taken on interbank market at a variable interest rate (change of interest rate maximum on a three month basis),
- cash and balances with the Central Bank and amounts due to the Central Bank,
- other financial assets and liabilities,
- debt securities in issue (at variable interest rate), issued by KREDOBANK and BFL.

With regard to loans and advances to clients, the fair value of these instruments has been calculated using discounted future cash flows, and applying current interest rates plus a risk margin and relevant scheduled repayment dates. The current margin level has been established based on transactions with similar credit risk executed during the last quarter of the year ended as of the balance sheet date.

The fair value of deposits and other amounts due to customers other than banks, with specified maturities, has been calculated using the discounted expected future cash flows and applying current interest rates for given deposit products.

The fair value of the subordinated debt of the Bank has been estimated based on the expected future cash flows discounted using the yield curve.

The fair value of debt securities issued by PKO Bank Polski SA has been estimated based on expected future cash flows discounted using the current interbank interest rates.

The fair value of debt securities issued by PKO Finance AB has been estimated using Bloomberg data.

The fair value of interbank placements and deposits has been estimated based on the expected future cash flows discounted using the current interbank interest rates.

Receivables on financial lease have been estimated based on expected cash flows discounted using internal rate of return for lease transactions of the same kind, concluded by the Group in the period directly preceding the balance sheet date.

The table below shows a summary of the carrying amounts and fair values for the individual groups of financial instruments which have not been presented at fair value in the Group's statement of financial positions as at 31 December 2011 and 31 December 2010:

	31.12.2011		31.12.2010	
	carrying amount	fair value	carrying amount	fair value
Cash and balances with the central bank	9 142 168	9 142 168	6 182 412	6 182 412

due to retail clients	104 183 094	104 204 950	95 107 854	95 104 891
Debt securities in issue	7 771 779	7 773 693	3 298 867	3 298 867
Subordinated liabilities	1 614 377	1 618 446	1 611 779	1 617 238
Other financial liabilities	1 857 592	1 857 592	1 307 838	1 307 838

50. Fiduciary activities

The Bank is a direct participant in the National Depository for Securities (Krajowy Depozyt Papierów Wartościowych) and the Securities Register (at the National Bank of Poland). The Bank maintains investment accounts, services transactions on the domestic and foreign markets, and provides fiduciary services and performs depository role for pension and investment funds. Assets placed in the Bank within fiduciary services are not included in these financial statements as they do not meet the criteria of an asset.

Moreover, as a member of the Council of Depository Banks and the Council of Non-treasury Debt Securities by the Polish Bank Association, PKO Bank Polski SA takes part in developing regulations and market standards.

51. Sale of impaired loan portfolios

The Group did not enter any securitisation transactions, although:

- in 2010, the Bank performed a bundle sale of 120 thousand retail receivables classified as 'loss' in relation to individuals who do not conduct business activities. The debt portfolio amounted to PLN 1 127 million and 1.4 thousand of receivables from institutional clients classified as 'loss', with a total value of PLN 307 million,
- in the first half of 2011, the Bank carried out another bundle sale of 51 thousand retail receivables classified as 'loss' in relation to individuals who do not conduct business activities. The sale covered a bundle with a total debt of PLN 565 million.
- in the second half of 2011, the subsequent bundle sales were carried for which sales agreements were signed in 2011:
 - a) in the third quarter, over 49 thousand retail receivables classified as 'loss' in relation to individuals who do not conduct business activities. The sale covered a portfolio with a total debt of PLN 418 million,

- b) in the fourth quarter, over 43 thousand retail receivables classified as 'loss' in relation to individuals who do not conduct business activities. The sale covered a portfolio with a total debt of PLN 533 million,
 - c) in the fourth quarter, over 4 thousand receivables from institutional customers in the impaired loans portfolio classified as 'loss' with a total value of PLN 520 million,
- the total carrying amount of the provision for potential claims on impaired loans portfolios sold as at 31 December 2011 amounted to PLN 3 945 thousand (as at 31 December 2010 it was PLN 11 430 thousand). The Bank did not receive any securities on account of the above-mentioned transactions.

52. Differences between previously published financial statements and these financial statements

In 2011 there were no significant changes in relation to previously published financial statements.

53. Influence of macroeconomic situation on the Group's results

The macroeconomic situation, including the continued economic revival in the conditions of high uncertainty related to the fiscal crisis in the euro zone, had a significant effect on the activities and financial standing of the Group in 2011. In 2011, the increased volatility of financial markets continued; it was mainly related to the deterioration in the economic growth perspectives in the largest global economies and the escalation of the debt crisis in euro zone countries. The highest scale of volatility occurred in the third quarter of 2011, as a result of the deterioration in global economy growth perspectives, the increased risk of Greece's insolvency and the downgraded credit rating of the USA. In response to the further deterioration in conditions on the financial markets, the euro zone countries continued working on mechanisms that would stabilise public finance and on another financial support programme for Greece. In recent months, the European Central Bank has also announced a number of actions aimed at relaxing the monetary policy and stabilising the situation in the banking sector, including a 3-year LTRO (Long-Term Refinancing Operation) loan, which significantly reduced the systemic risk for the European banking system.

The economic growth in Poland accelerated to 4.3% in 2011 (from 3.9% in 2010), making Poland one of the leaders in economic growth in Europe. The economic growth dynamics were stimulated by stable private consumption in conditions of a stabilised situation on the labour market and the continuation of public investments in infrastructure. On the other hand, the continued uncertainty which was mainly related to the situation in Poland's external environment determined prudent investment activities of enterprises. The increase in the risk premium in the third quarter of 2011 was a cause for the weakening of the Euro and Polish złoty exchange rates.

PKO Bank Polski SA has positively passed the pan-European stress tests carried out in the middle of 2011 by the European Banking Authority (EBA) in cooperation with national supervision authorities. The tests which constituted a theoretical test of resistance in the event of a potential macroeconomic downturn, showed that the Bank considerably exceeded the minimum ratios adopted for the tests. The Bank has also successfully passed the stress tests carried out by the Polish Financial Supervision Authority and an examination carried out by the EBA concerning the effect of introducing the minimum level of equity in relation to risk-weighted assets (Common Equity Tier 1 ratio) at a level of 9%. It is worth noting that the Group does not have exposures in debt securities issued by governments of the euro zone peripheral countries and the Hungarian government. The results for 2012, including the level of dividend paid, may be significantly affected by the expectation formulated by the PFSA in December 2011 concerning maintaining the capital adequacy ratio on a level above 12%.

Taking into account the impact of the macroeconomic situation on the condition of the customers of PKO Bank Polski, the Group strictly follows a conservative approach to risk by recognising impairment losses whose scale and structure reflects the impact of the current macroeconomic situation on the Group's financial statements.

In 2011, the Group earned the best financial results in its history. At the same time, the Group is the leader of the banking sector in terms of total assets, equity, loans granted and deposits accepted.

In 2011, the Group developed its business activities based on a safe and effective structure of financing. The dynamic development of the loan activity was financed with the increase in amounts due to customers (including funds from the issue of Eurobonds) and the increase in amounts due in respect of own issue of debt securities to the domestic market.

High financial results have been achieved with considerable growth dynamics of net interest income compared with the previous year, accompanied by an increase in administrative expenses. At the same time, the aggregate dynamics of the Bank's income items considerably exceeded the growth dynamics of administrative expenses, which translated into the increased effectiveness of the Bank's operations.

The financial results achieved by the Group are an important component of the 'Leader' Strategy of PKO Bank Polski SA adopted by the Management Board of the Bank and approved by its Supervisory Board in February 2010. The strategy set out two main strategic objectives for 2010-2012: PKO Bank Polski SA being a clear leader of the Polish banking sector and being a stable, profitable and effective bank. The strategy, focused on fulfilling the needs of the Bank's customers, as well as the expectations of its owners and employees, provides for the continuation of sustainable growth, synergies and leveraging the potential of the entire Group. PKO Bank Polski is the central entity of an efficient Group, offering comprehensive services to its customers. The actions undertaken as part of the Bank's Strategy include a number of initiatives aimed at fully utilising the potential of all the subsidiaries in order to optimise the business benefits.

Due to the exposure in Ukrainian companies, in particular KREDOBANK SA, the Group is exposed to the effects or risks characteristic to the Ukrainian market. In 2011, economic growth in the Ukraine accelerated to 5.2% y/y. The favourable economic situation and the drop in dynamics of prices resulted in maintaining a strong real increase in salaries. At the same time, the actions undertaken by the central bank ensured the stability of the exchange rate, in spite of the disturbances on the international financial markets. In the context of a good economic condition, the situation of the banking sector improved gradually, which was expressed in a growth in the profitability ratios and a drop in the ratio of impaired loans to the total loan portfolio.

PKO Bank Polski SA continues to implement measures aimed at ensuring the safe functioning of its companies in Ukraine in the environment of the current macroeconomic situation in the Ukraine. These measures include strengthening oversight activities, monitoring funds transferred to the Companies by the Bank and the development of the regulatory requirements determined by the National Bank of Ukraine in KREDOBANK SA.

OBJECTIVES AND PRINCIPLES OF RISK MANAGEMENT RELATED TO FINANCIAL INSTRUMENTS

54. Risk management in the Group

Risk management is one of the most important internal processes both in PKO Bank Polski SA and other entities of the PKO Bank Polski SA Group. Risk management aims at ensuring an appropriate level of security and profitability of business activity in the changing legal and economic environment and the level of the risks plays an important role in the planning process.

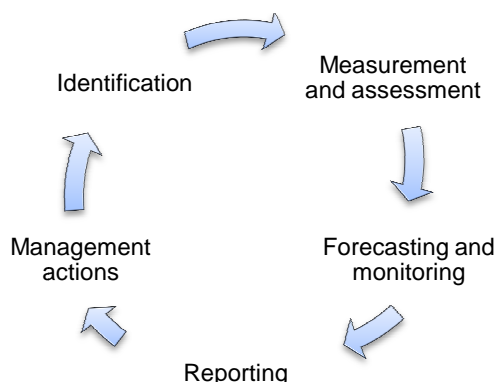

At the PKO Bank Polski SA Group the following types of risk have been identified, which are subject to management: credit risk, interest rate risk, currency risk, liquidity risk, price risk of equity instruments, operational risk, compliance risk, business risk (including strategic risk) and reputation risk. Derivatives risk is a subject to a special control due to the specific characteristics of these instruments.

The process of banking risk management in the Group consists of the following stages:

- risk identification - the identification of actual and potential sources of risk and estimation of the significance of the potential influence of a given type of risk on the financial situation in the Group. Within the risk identification process, types of risk perceived as material in the banking activity, the entities of the Group and the whole Group's activity are identified,
- risk measurement and assessment - defining risk assessment tools adequate to the type and significance of the risk, data availability and quantitative risk assessment by means of defined tools, as well as risk assessment aimed at identifying the scale or scope of risk, taking into account the achievement of goals of risk management. Within risk measurement, stress-test are being conducted on the basis of assumption providing a fair risk assessment,

- risk forecasting and monitoring – preparing risk level forecasts and monitoring deviances from forecasts and adopted reference points (e.g. limits, thresholds, plans, measurements from the previous period, issued recommendations and suggestions). Risk monitoring is performed with the frequency adequate to the materiality and volatility of a specific risk type,
- risk reporting – periodic informing the Management of the Bank about the results of risk assessment, taken actions and recommendations. Scope, frequency and the form of reporting is adjusted to the managing level of the recipients,
- management actions – including, among others, issuing internal regulations, establishing the level of risk tolerance, establishing limits and thresholds, issuing recommendations, making decisions about the use of tools supporting risk management. The objective of taking management actions is to form the risk management and credit risk level.

The risk management process is described on the chart below.

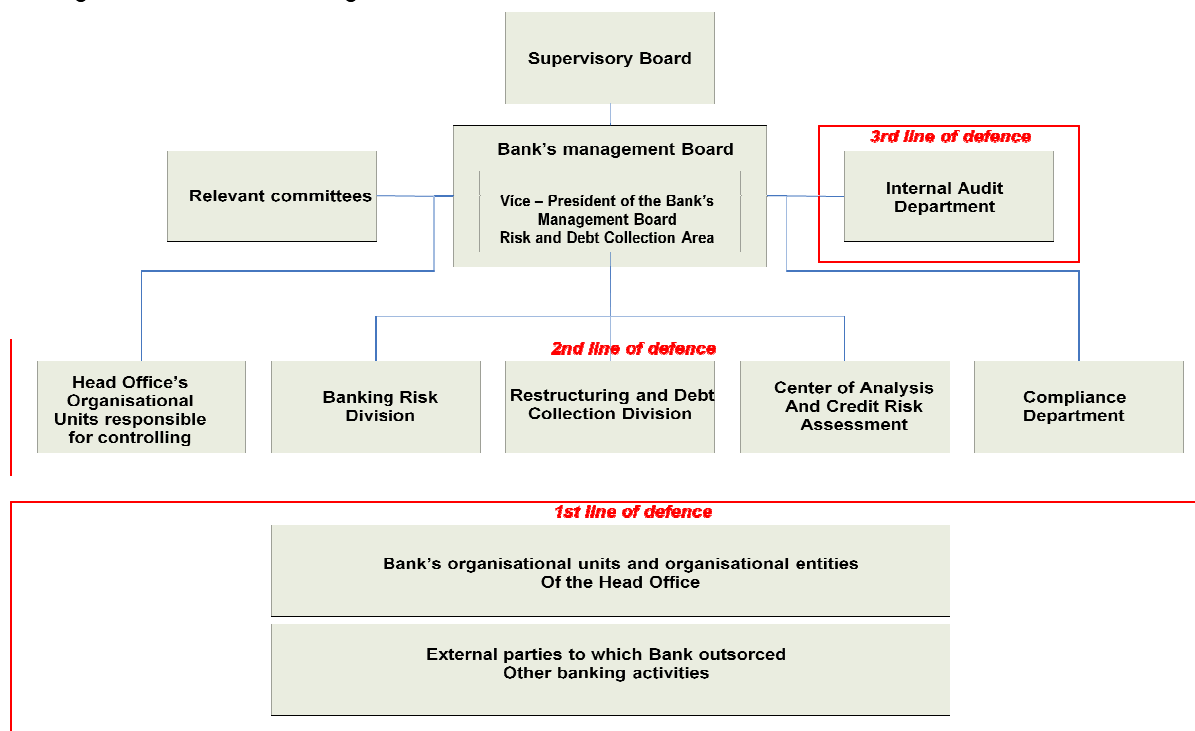

Risk management in the Group is based specially on the following principles:

- the Group manages all of the identified types of banking risk,
- the risk level is monitored on a current basis,
- the risk management process is appropriate to the scale of the operations and to the materiality, scale and complexity of a given risk and tailored to new risk factors and sources on a current basis,
- the risk management methods (in particular the models and their assumptions) and the risk measurement systems are tailored to the scale and complexity of the risk and verified and validated on a periodical basis,
- the risk management process supports the pursuit of the Group's strategy in keeping with the risk management strategy, in particular with regard to the level of tolerance of the risk,
- the area of risk and debt recovery remains organisationally independent of business activities,
- risk management is integrated with the planning and controlling systems.

Risk management in the Bank takes place in all of the organisational units of the Bank.

The organisation of risk management is presented in the chart below:

The organisation of risk management chart

The risk management process is supervised by the Supervisory Board of the Bank, which is informed on a regular basis about the risk profile of the Bank as well as of the PKO Bank Polski SA Group and the most important activities taken in the area of risk management.

The Bank's Management Board is responsible for the risk management, including supervising and monitoring of activities taken by the Bank in the area of risk management. The Bank's Management Board approves the most important decisions affecting the risk profile of the Bank and enacts internal regulations defining the risk management system.

The risk management process is carried out in three, mutually independent lines of defence:

- 1) the first line of defence, which is functional internal control that ensures using risk controls and compliance of the activities with the generally applicable laws,
- 2) the second line of defence, which is the risk management system, including risk management methods, tools, process and organisation of risk management,
- 3) the third line of defence, which is an internal audit.

The independence of the lines of defence consists of preserving organisational independence in the following areas:

- the function of the second line of defence as regards creating system solutions is independent of the function of the first line of defence,
- the function of the third line of defence is independent of the functions of the first and second lines of defence,
- the function of managing the compliance risk reports directly to the Member of the Management Board of the Bank.

The first line of defence is being performed in the organisational units of the Bank, the organisational units of the Head Office and entities of the Group and concerns the activities of those units and entities which may generate risk. The units, cells and entities of the Group are responsible for identifying risks, designing and implementing appropriate controls, including in the external entities, unless controls have been implemented as part of the measures taken in the second line of defence. At the same time the Group's entities are obliged to have comparable and cohesive systems of risk control in the bank and in the Group's entities, taking into account the specific business characteristic of each entity and market conditions.

The second line of defence is being performed, in particular, in the Risk and Debt Collection Area, the specialist organisational units of the Bank responsible for credit analyses, the organisational unit of the Head Office managing the compliance risk, as well as the organisational units of the Head Office responsible for controlling.

The third line of defence is being performed as part of internal audit, including the audit of the effectiveness of the system of managing the risk relating to the Bank's activities.

The organisational units of the Head Office of the Bank that are grouped within the Banking Risk Division, the Restructuring and Debt Collection Division, and the Credit Risk Assessment Department manage risk within the limits of competence assigned to them.

The Banking Risk Division is responsible for:

- identifying risk factors and sources,
- measuring, assessing, and monitoring and reporting risk levels (material risks) on a regular basis,
- measuring and assessing capital adequacy,
- preparing recommendations for the Management Board of the Bank or committees regarding the acceptable level of risk,
- creating internal regulations on managing risk and capital adequacy,
- developing IT systems dedicated to supporting risk and capital adequacy management.

The Restructuring and Debt Collection Department is responsible for:

- recovering receivables from difficult clients swiftly and increasing the effectiveness of such measures,
- effective and early monitoring of delays in the collection of receivables of retail market clients,
- selling difficult receivables effectively and outsourcing the tasks carried out, as well as effective management of assets taken over as a result of recovering the Bank's receivables.

The Analysis and Credit Risk Assessment Centre (*Centrum Analiz i Oceny Ryzyka Kredytowego*) is responsible for evaluating and verifying the level of credit risk level assessed in respect of individual credit exposures, which due to the scale of the exposure, client's segment or risk level required independent assessment. In connection with the implementation of the T Recommendation by the Bank, the Analysis and Credit Risk Assessment Centre takes lending decisions in respect of individual clients.

Risk management is supported by the following committees:

- Risk Committee (RC),
- Assets & Liabilities Committee (ALCO),
- Bank's Credit Committee (BCC),
- Central Credit Committee (CCC),
- the Operating Risk Committee (ORC),
- credit committees which operate in the regional retail and corporate branch offices.

The RC monitors the integrity, adequacy and efficiency of the bank risk management system, as well as capital adequacy and implementation of the risk management policies consistent with the Bank's Strategy, and analyses and evaluates the application of strategic risk limits specified in the PKO Bank Polski SA's Bank Risk Management Strategy.

The RC supports the Supervisory Board in the bank risk management process by formulating recommendations and making decisions concerning capital adequacy and the efficiency of the bank risk monitoring system.

ALCO makes decisions within the scope of granted authorisations and issues recommendations to the Bank's Management Board with regard to portfolio credit risk management, interest rate risk management, currency risk, liquidity risk and the Bank's asset and liabilities management. The Committee is chaired by the President of the Bank's Management Board.

BCC makes loan decisions with regard to significant individual loan exposures, or issues recommendations in this respect to the Bank's Management Board.

CCC supports the decisions taken by the relevant managing directors and the Bank's Management Board members with its recommendations and the credit committees operating in the regions support branch directors and directors of the Regional Corporate Branches in matters bearing a higher risk level.

ORC supports the Bank's Management Board in the process of managing operating risk by:

- giving recommendations, inter alia, as to the Bank's Management Board approval of the level of operating risk tolerance, operating risk limits reserved for the competences of the Bank's Management Board, defining operating risk stress tests and other activities related to systemic management of the operating risk,
- taking decisions in respect of thresholds and critical values of key risk indicators (KRI), operating risk limits reserved for the competences of ORC, values of key parameters used in calculating value at risk (VaR) in respect of operating risk, and individual approach to outliers.

Moreover, ORC prepares operating risk management recommendations for member companies of the PKO Bank Polski SA Group, which are submitted to the Group's entities as part of the Bank's corporate governance.

The Bank supervises activities of the individual subsidiaries of the PKO Bank Polski SA Group. As part of this supervision, the Bank sets out and approves their development strategies, including the level of the risk. The Bank also supervises the entities' risk management systems and provides support in the development of these systems. Additionally, it reflects business risk of the particular Group entities in the risk reporting and risk monitoring system of the entire Group.

The internal regulations concerning management of certain types of risk in the entities of the Group are defined by internal regulations implemented by those entities, after consulting the Bank's opinion and having taken into account the recommendations issued to the entities by the Bank. The internal regulations of the entities concerning risk management allow for consistent and comparable assessment of particular types of risk within the Bank and entities of the Group, as well as reflect the specific nature of the entity's activity and the market on which it operates.

PKO Bank Polski SA's top priority is to maintain its strong capital position and to further increase its stable sources of financing underlying the stable development of business activity, while maintaining the priorities of efficiency and effective cost control.

On 21 June 2011 PKO Bank Polski SA obtained the consent of the Polish Financial Supervision Authority (PFSA) for applying statistical methods to calculate capital requirements for operating risk (AMA) as of 30 June 2011, with temporary limitation (until the elimination of the PFSA conditions) on a decrease in capital requirements no more than to the level of 75% of the requirement calculated by the standardised approach.

Moreover, in 2011 the PKO Bank Polski Group participated in a stress tests organised by EBA (European Banking Authority). The test results confirmed the Group's strong equity position and significant resistance to potential negative market scenarios.

In 2011, actions were carried out in relation to the development of the credit risk measurement methodology in KREDOBANK SA aimed at adapting the solutions to IAS. Active efforts were also made to automate the crediting process, including the assessment of the credit risk by adapting and implementing a system analogical to the application used by PKO Bank Polski SA. Additionally, internal regulations related to the process of crediting individuals and legal entities were updated.

In 2011 actions started in the Bankowy Fundusz Leasingowy SA Group on amending the 'Procedures for assessing the risk of lease transactions and the scoring methodology, and reconstruction of the decision-making process'. These together with the new IT system are planned to be implemented in 2012.

54.1. Identification of significant types of risk

The significance of the individual types of risk is established at the Bank's and Group's entities level. When determining criteria of classifying a given type of risk as significant, an influence of a given type of risk on the Bank's, Group's entities and whole Group's activities are taken into account, whereas three types of risk are recognised:

- considered as significant a priori - being managed actively,
- potentially significant - for which significance monitoring is being made,

- other non-defined or non-occurring in the Bank or Group types of risk (insignificant and non-monitored).

Based on quantitative and qualitative information, an assessment of significance of given types of risk is performed in the Bank periodically. As a result of assessment, a given type of risk is being classified as significant/insignificant. Similar assessment is concluded periodically in the Group's entities. Monitoring is conducted if significant change in activities took place or the profile of the Bank or the Group changed.

55. Credit risk management

Credit risk is defined as a risk of occurrence of losses due to counterparty's default of payments to the Bank or as a risk of decrease in economic value of amounts due to the Bank as a result of deterioration of counterparty's ability to repay amounts due to the Bank.

The objective of credit risk management is to minimise losses on the credit portfolio as well as to minimise the risk of occurrence of loans threatened with impairment exposure, while keeping expected level of profitability and value of credit portfolio at the same time.

The Bank and subsidiaries of the Group apply the following principles of credit risk management:

- each loan transaction is subject to comprehensive credit risk assessment, which is reflected in an internal rating or credit scoring,
- credit risk relating to potential and concluded loan transactions is measured on a cyclical basis, taking into consideration changes in external conditions and in the financial standing of the borrowers,
- credit risk assessment of exposures which are significant due to their risk levels is subject to additional verification by credit risk assessment teams, which are independent of the business teams,
- terms of loan contracts that are offered to a client depend on the credit risk generated by the contract,
- loan granting decisions are made only by authorised persons, within their authority,
- credit risk is diversified by geographical location, by industry, by product and by clients,
- expected credit risk is mitigated by setting collateral, appropriate credit margins and appropriate allowances for credit losses.

The above-mentioned policies are executed by the Bank through the use of advanced credit risk management methods, both on the level of individual exposures and on the level of the whole credit portfolio of the Bank. These methods are verified and developed to ensure compliance with the internal ratings based requirements (IRB) i.e. advanced credit risk management method, which can be used while calculating capital requirements for credit risk after being approved by the Financial Supervision Authority.

The Group entities, which have significant credit risk levels (KREDOBANK SA, the BFL SA Group, the BTK SA Group) manage their credit risk individually, but the methods used by them for credit risk assessment and measurement are adjusted to the methods used by PKO Bank Polski SA, taking into account the specific nature of the activities of these companies.

Any changes to the solutions used by the Group companies are agreed every time with the Bank's units responsible for risk management.

The BFL SA Group, the BTK SA Group and KREDOBANK SA measure credit risk regularly and the results of such measurements are submitted to the Bank.

KREDOBANK SA, the BFL SA Group and the BTK Group have units responsible for risk in their organisational structures, which are in particular responsible for:

- developing methods of credit risk assessment, recognising provisions and allowances,
- controlling and monitoring credit risk during the lending process,
- the quality and efficiency of restructuring and enforcement of the amounts due from clients.

In these companies, the credit decision limits depend primarily on: the amount of the exposure to a given client, the amount of an individual credit transaction and the period of credit transaction.

The process of credit decision-making at KREDOBANK SA, the BFL SA Group and the BTK SA Group is supported by credit committees, which are involved in the case of transactions which generate increased credit risk.

Appropriate organisational units of the Banking Risk Division participate in managing the credit risk in the Group companies by giving their opinions on projects and periodically reviewing internal regulations of these companies relating to the assessment of credit risk and preparation of recommendations relating to amendments in the drafts of regulations. The Bank supports implementation of the recommended changes in principles for assessing credit risk in the Group entities.

Measurement of credit risk

Credit risk measurement methods

In order to assess the level of credit risk and profitability of loan portfolios, the Bank uses different credit risk measurement and valuation methods, including:

- Probability of Default (PD),
- Expected Loss (EL),
- Credit Value at Risk (CVaR),
- effectiveness measures used in scoring methodologies (Accuracy Ratio),
- share and structure of non-performing loans (according to IAS),
- coverage ratio of non-performing loans with impairment allowances (according to IAS),
- cost of risk.

PKO Bank Polski SA extends regularly the scope of credit risk measures used, taking account of the internal rating-based method (IRB) requirements, and extends the use of risk measures to cover the whole Bank's loan portfolio with these methods.

The portfolio credit risk measurement methods make it possible, i.e. to reflect the credit risk in the price of products, determine the optimum cut-off levels and determine impairment allowances.

The Bank performs analysis and stress-tests regarding the influence of potential changes in macroeconomic environment on the quality of Bank's loan portfolio. The test results are reported to the Bank's Executives. The above-mentioned information enables the Bank to identify and take measures to limit the negative influence of unfavourable market changes on the Bank's performance.

The Bank assesses the risk of individual credit transactions with the use of scoring and rating methods, which are created, developed and supervised by the Banking Risk Division. The assessment methods are supported by specialist application software. The scoring method is defined by Bank's internal regulations whose main aim is to ensure uniform and objective assessment of credit risk during the credit process.

The Bank assesses the credit risk of retail clients on two levels: the client's borrowing capacity and his creditworthiness. The assessment of borrowing capacity involves an examination of the client's financial situation, whereas the creditworthiness assessment involves scoring and evaluating the client's credit history obtained from external sources and internal records of the Bank.

In 2011, the parameters for assessing the creditability of individual customers were adapted to the amended provisions of the Recommendation S, in particular as regards the following:

- changing the method of determining disposable income for foreign currency loan transactions drawn to finance real property and foreign currency loan transactions secured by mortgage,
- changing (shortening) the maximum lending period adopted in the assessment of creditability,
- taking into account the probability that the level of the borrower's income will change after acquisition the pension entitlement in the assessment of creditability.

The evaluation of credit risk related to financing institutional clients is performed in two dimensions: in respect of the client and of the transaction. The assessment measures comprise ratings of clients and transactions. The comprehensive measure of credit risk which reflects both risk factors is the aggregate rating. Since 1 September 2010, Bank uses a scoring method for credit risk evaluation of clients in the SME

segment, and a dedicated software application. This method is available apart from the rating method. Its implementation resulted in shortening the assessment process of loan applications as well as improvement of credit risk management effectiveness. As a result of the positive scoring of the institutional clients' portfolio in November 2011 the scoring procedure was extended.

The information about ratings and scoring is widely used at the Bank for the purposes of credit risk management, the system of credit decision-making powers, determining the amounts above which independent credit assessment services are activated and in the credit risk assessment and reporting system.

In order to reduce the period of response as regards warning signals suggesting an increase in credit risk level, the Bank implemented a dedicated application the Early Warning System (EWS) in August 2010. In 2011 this tool was being developed, in result of which in June 2011 the automatic identification of adverse events was implemented.

In 2011 in its rating system the Bank took into consideration the identification of default events, achieving consistency between the rating system and the system for identifying individual premises for impairment of credit exposures. The scale of rating non-financial customers was also expanded: in place of 8 rating classes, 10 rating classes were introduced and at the same time it was decided that credit exposures which had been classified into the rating class 'G' (due to the low likelihood of default) were not to be automatically considered to be individually impaired. Moreover, as a rule the terms and conditions for determining availability of financing were maintained.

In the second half of 2011, in determining the write-downs against the portfolio of mortgage loans for individuals, the Bank used the portfolio parameters estimated on the basis of the methodology for estimating parameters for the purpose of calculating the capital requirements using the IRB method. The new methodology takes into account intense restructuring processes conducted in respect of the above-mentioned portfolio and allows more precise assessment of the related credit risk.

Forecasting and monitoring of credit risk

The Group's exposure to credit risk

Amounts due from banks	Exposure	
	31.12.2011	31.12.2010
Amounts due from banks impaired, of which:	32 499	28 559

Credit quality of financial assets which are neither past due nor impaired

Taking the type of Group's business activity and the amount of credit and leasing debts into consideration, the most important portfolios are managed by the Bank and Bankowy Fundusz Leasingowy SA. Information about credit quality of loans granted by the Bank and BFL SA Group is presented below.

Exposures to corporate clients who are not individually impaired are classified according to customer rating as part of the individual rating classes, from A to G (in respect of financial institutions from A to F).

The following loan portfolios are covered by the rating system:

- corporate clients,
- housing market corporate clients,
- small and medium enterprises (excluding certain product groups which are assessed in a simplified manner).

Financial assets neither past due nor impaired	31.12.2011	31.12.2010

* In 2011 the Bank reclassified the catalogue of premises for individual loan impairment consisting specifically of discontinuing to recognise the premise of 'deterioration in the customer's financial position during the crediting period' in respect of customers who until then were in this group and are characterised by a relatively low probability of default.

Loans and advances which are not individually impaired and are not rated, are characterised with a satisfactory level of the credit risk. It concerns, in particular, retail loans (including mortgage loans) which are not individually significant and thus do not create significant credit risk.

Structure of debt securities and inter-bank deposits, neither past due nor impaired by external rating class is presented below:

Concentration of credit risk within the Group

The Group defines credit concentration risk as one of arising from a considerable exposure to single entities or to group of entities whose repayment capacity depends on a common risk factor. The Group analyses the risk of credit risk concentration in respect of:

- the largest business entities,
- the largest capital groups,
- industries,
- geographical regions,
- currencies,
- exposures with established mortgage collateral.

Concentration by the largest business entities

The Banking Law specifies maximum concentration limits for the Bank, which has an influence upon the Group. According to Article 71.1 of the Banking Law, the total value of the Bank's exposures, off-balance sheet liabilities and commitments granted or shares held by the Bank directly or indirectly in another entity, additional payments into a limited liability company as well as contributions or limited partnership sums - whichever higher - in a limited partnership or limited joint-stock partnership with a risk of one entity or a group of entities related by capital or management, cannot exceed concentration limit, which is 25% of the Bank's own consolidated funds.

As at 31 December 2011 and 31 December 2010, those concentration limits had not been exceeded.

As at 31 December 2011, the level of concentration risk in Group with respect to individual exposures was low - the largest exposure to a single entity was equal to 9.2% and 7.7% of the Bank's own consolidated funds.

Among 20 largest borrowers of the Group there are exclusively clients of PKO Bank Polski SA.

Total exposure of the Group towards the 20 largest non-banking sector clients:

31.12.2011			31.12.2010		
No.	Exposure*	Share in the loan portfolio**	No.	Exposure*	Share in the loan portfolio**

Total	6 850 809	4.65%	Total	5 765 022	4.25%

* Total exposure includes loans, advances, purchased debts, discounts on bills of exchange, realised guarantees and interest receivable.

** Loan portfolio does not include off-balance sheet and capital exposures.

Concentration by the largest capital groups

The greatest exposure of the PKO Bank Polski SA Group towards a group of borrowers amounted to 1.31%. The 5 largest capital groups include only clients of PKO Bank Polski SA.

As at 31 December 2011, the concentration of credit risk by the largest capital groups was low. The greatest exposure of the Group towards a capital group amounted to 10.5% and 9.4% of the Group's own consolidated funds.

Total exposure of the Group towards the 5 largest capital groups:

31.12.2011			31.12.2010		
No.	Exposure*	Share in the loan portfolio**	No.	Exposure*	Share in the loan portfolio**

* Total exposure includes loans, advances, purchased debts, discounts on bills of exchange, realised guarantees, interest receivable and off-balance sheet and capital exposures.

** Loan portfolio does not include off-balance sheet and capital exposures.

*** Concentration in respect of the entities exempted from concentration limits under the Article 71.3 of the Banking Law.

Concentration by industry

As compared with 31 December 2010 the exposure of the Group in industry sectors has increased by over PLN 7.5 billion. The total exposure in the four largest industry sectors: 'Industrial processing', 'Wholesale and retail trade (...)', 'Maintenance of real estate' and 'Construction' amounted to approx. 63% of the total loan portfolio covered by an analysis of the sector.

The analysis of exposure by industry segments is presented in the table below.

Section	Description	31.12.2011		31.12.2010	
		Exposure	Number of entities	Exposure	Number of entities
C	Industrial processing	19.19%	11.67%	21.94%	11.51%
G	Wholesale and retail trade, repair of motor vehicles, including motorcycles	16.64%	24.52%	17.08%	23.63%
L	Maintenance of real estate	15.18%	10.00%	13.29%	11.08%
F	Construction	12.17%	13.20%	14.09%	11.35%
O	Public administration and national defence, obligatory social security	8.03%	0.47%	6.77%	0.46%
D	Electricity, gas, water vapour, hot water and air conditioning production and supply	1.49%	0.20%	1.49%	0.14%
Other exposure		27.30%	39.94%	25.34%	41.83%
Total		100.00%	100.00%	100.00%	100.00%

Concentration by geographical regions

The Group's loan portfolio is diversified in terms of geographical location.

As at 31 December 2011, the largest concentration of the Group's loan portfolio was in the mazowiecki region. Half of the Group's loan portfolio is concentrated in four regions: mazowiecki, śląsko-opolski, wielkopolski and małopolsko-świętokrzyski, which is consistent with the regions' domination both in terms of population and economy of Poland.

Region	31.12.2011	31.12.2010
Poland		
mazowiecki	18.12%	17.27%
śląsko-opolski	11.69%	13.04%
wielkopolski	10.44%	10.29%
małopolsko-świętokrzyski	9.47%	9.43%
dolnośląski	7.65%	7.71%
lubelsko-podkarpacki	7.04%	6.87%
zachodnio-pomorski	6.68%	6.96%
łódzki	6.43%	6.49%
pomorski	6.32%	6.41%
kujawsko-pomorski	5.02%	4.94%
warmińsko-mazurski	3.61%	3.57%
podlaski	3.21%	3.14%
other	3.26%	2.74%
Ukraine	1.06%	1.14%
Total	100.00%	100.00%

Concentration of credit risk by currency

As at 31 December 2011, the share of exposure in convertible currencies, other than PLN, in the total loan portfolio of the Group amounted to 24.2%. Increase of loans denominated in foreign currencies in 2011 is mainly the consequence of increase of foreign exchange rates in 2011.

The greatest part of the Group's currency exposures are those in CHF and they relate mainly to the currency loan portfolio of the Bank. In case of particular Group entities, the situation is different, i.e. for the BFL SA Group, the greatest currency exposures are those in EUR (88.2% of currency loan portfolio), similarly for the BTK SA Group – EUR denominated loans (80.9% of currency loan portfolio) and for KREDOBANK SA – USD denominated loans (76.5% of the currency loan portfolio and 30.4% of the company's total loan portfolio).

Significant concentration risk was identified in KREDOBANK SA, and resulted from the character of the Ukrainian market, where due to weak local currency the majority of loans are granted in a foreign currency.

Concentration of credit risk by currency

Currency	31.12.2011	31.12.2010
PLN	75.76%	76.43%
Foreign currencies, of which:	24.24%	23.57%
CHF	16.46%	16.85%
EUR	5.71%	4.73%
USD	1.41%	1.44%
UAH	0.64%	0.54%
GBP	0.02%	0.01%
Total	100.00%	100.00%

Other types of concentration

In accordance with the Recommendation S and T of the Polish Financial Supervision Authority, the Bank uses internal limits on credit exposures related to the Bank's customers defining the appetite for the credit risk.

As at 31 December 2011, these limits have not been exceeded.

Renegotiated receivables

The purpose of the restructuring activity of the Group is to maximise the effectiveness of non-performing loan management. The aim is to receive the highest possible recoveries and, at the same time, incur the minimal costs relating to these recoveries in the case of enforcement proceedings.

The restructuring activities include a change in payment terms which is individually agreed on an each contract basis. Such changes may concern:

- 1) repayment deadline,
- 2) repayment schedule,
- 3) interest rate,
- 4) payment recognition order,
- 5) collateral,
- 6) amount to be repaid (reduction of the amount).

As a result of signing and a timely service of a restructuring agreement the loan being restructured is reset from overdue to current. Evaluation of the ability of a debtor to fulfil the restructuring agreement conditions (debt repayment according to the agreed schedule) constitutes an element of the restructuring process. Active restructuring agreements are monitored on an on-going basis.

Past due financial assets

Financial assets which are past due but not impaired at the reporting date include the following financial assets:

Financial Assets	31.12.2011				31.12.2010			
	up to 1 month	1 - 3 months	over 3 months	Total	up to 1 month	1 - 3 months	over 3 months	Total
Loans and advances to customers	2 543 933	1 348 716	114 626	4 007 275	3 259 441	1 021 127	96 110	4 376 678
financial sector	4 469	153	-	4 622	-	-	102	102
non-financial sector	2 494 974	1 348 563	114 626	3 958 163	2 657 540	1 021 127	96 008	3 774 675
budget sector	44 490	-	-	44 490	601 901	-	-	601 901
Amounts due from banks	-	-	-	-	351	-	-	351
Other assets - other financial assets	477	-	516	993	-	292	-	292
Total	2 544 410	1 348 716	115 142	4 008 268	3 259 792	1 021 419	96 110	4 377 321

Collateral for the above receivables includes: mortgages, registered pledges, transfers of property rights, account lock-ups, loan exposure insurances, warranties and guarantees.

The Bank made an assessment which proved that for the above-mentioned loan exposures the expected cash flows exceed the carrying amount of these exposures.

Financial assets individually determined to be impaired for which individual impairment allowance has been recognised by carrying amount gross

	31.12.2011	31.12.2010
Amounts due from banks	32 385	28 089
Loans and advances to customers	5 701 547	5 899 231
Financial sector	44 757	41 188
corporate loans	44 757	41 188
Non-financial sector	5 649 239	5 850 521
consumer loans	84 444	91 982
mortgage loans	1 262 477	903 038
corporate loans	4 302 318	4 855 501
State budget sector	7 551	7 522
corporate loans	7 551	7 522
Financial assets available for sale	18 058	21 376
issued by financial entities	9	8
issued by non-financial entities	18 049	21 368
Total	5 751 990	5 948 696

Financial assets available for sale for which individual objective evidence of impairment was identified were secured by the following collaterals established for the Group:

- for loans and advances to customers: ceiling mortgages and ordinary mortgages, registered pledges, promissory notes and transfers of receivables and property right for cash. The financial effect of the collateral held in respect of the amount that best represents the maximum exposure to credit risk as at 31 December 2011 amounted to PLN 3 436 427 thousand (as at 31 December 2010 the amount was PLN 3 751 558 thousand).
- for investment securities available for sale: blank promissory notes, guarantee, registered pledges on the bank account and on debtor's shares.

In determining impairment allowances for the above assets, the Group considered the following factors:

- delay in payment of the amounts due by the debtor,
- the debt being declared as due and payable,
- enforcement proceedings against the debtor,
- declaration of the debtor's bankruptcy or filling a petition to declare bankruptcy,
- the amount of the debt being challenged by the debtor,
- commencement of corporate recovery proceedings against the debtor,
- establishing imposed administration over the debtor or suspending the debtor's activities,
- a decline in debtor's rating to a level indicating a significant threat to the repayment of debt,
- restructuring actions taken and payment reliefs applied,
- additional impairment indicators identified for exposures to housing cooperatives arising from mortgage loans of the so called 'old portfolio', covered by State Treasury guarantees,
- expected future cash flows from the exposure and the related collateral,
- expected future economic and financial position of the client,
- the extent of execution of forecasts by the client.

Allowances for credit losses

The PKO Bank Polski SA Group performs a monthly review of loan exposures in order to identify loan exposures threatened with impairment, measure the impairment of loan exposures and record impairment charges or provisions. The process of determining the impairment charges and provisions consists of the following stages:

- identifying the indications of impairment and events significant from the point of view of identifying those indications,
- registering in the Group's IT systems the events that are material from the point of view of identifying indications of impairment of credit exposures,
- determining the method of measuring impairment,
- measuring impairment and determining an impairment charge or provision,
- verifying and aggregating the results of the impairment measurement,
- recording the results of impairment measurement.

The PKO Bank Polski SA Group applies three methods of estimating impairment:

- the individualised method applied in respect of individually significant loans, for which the objective evidence of impairment was identified or requiring individual assessment due to the transactions specifics and resulting from events determining the repayment of exposure,
- the portfolio method applied in respect of individually insignificant loans, for which the objective evidence of impairment was identified,
- the group method (IBNR) applied in respect of the loans for which no objective evidence of impairment was identified, but there is a possibility of losses incurred but not recognised occurring.

The structure of the loan portfolio and loan impairment allowances of the PKO Bank Polski SA Group are presented in Note 23 'Loans and advances to customers'.

With regard to other credit exposures, the provision is determined as the difference between the expected amount of exposure in the statement of financial position, which will arise as a result of an off-balance sheet liabilities (from the date at which the assessment is performed till the date of overdue amounts due arising considered as constituting an indication of individual impairment) and the present value of the expected future cash flows obtained from the exposure in the statement of financial position arising out of the off-balance sheet liabilities.

When determining a provision under the individualised method, the expected future cash flows are estimated for each loan exposure separately.

When determining a provision under the portfolio method or the group method, the portfolio parameters are used, estimated using statistical methods, based on the historic observation of exposures with the same features.

The structure of the loan portfolio and loan impairment allowances of the PKO Bank Polski SA Group are presented in Note 23 'Loans and advances to customers'.

Credit risk of financial institutions

As at 31 December 2011, the largest exposures of the PKO Bank Polski SA Group were as follows:

Counterparty	Type of instrument		Total
	Deposits	Derivatives	
Counterparty 1	485 944	1 918	487 863
Counterparty 2	366 725	7 854	374 579

Counterparty 32	-	993	993
Counterparty 13	-	862	862

* Excluding exposure to the State Treasury and the National Bank of Poland.

For the purpose of determining exposures: placements and securities issued by the counterparties are stated at nominal values, while derivative instruments are stated at market values, excluding the collateral established by the counterparty.

Total exposure to each counterparty (column 'Total') is the sum of exposures arising from placements and securities, increased by the exposure arising from derivative instruments, if it is positive (otherwise the exposure arising from derivatives is not included in total exposure). Exposure arising from all instruments is calculated from the moment of entering into transaction.

As at 31 December 2011 the Bank had signed master agreements (in accordance with ISDA/ Polish Banks Association standards) with 27 local banks and 51 foreign banks and credit institutions. Additionally the Bank was a party of 55 CSA agreements (Credit Support Annex)/Polish Banks Association Agreements with established collateral and 4 ISMA agreements (International Securities Market Association).

Geographical localisation of counterparties

The counterparties generating the 20 largest exposures as at 31 December 2011 and as at 31 December 2010 come from the following countries (classified by location of registered office):

No.	Country	Counterparty
1.	Austria	Counterparty 2
2.	Belgium	Counterparty 28
3.	Denmark	Counterparty 10
4.	France	Counterparty 9, Counterparty 13, Counterparty 15
5.	Netherlands	Counterparty 27
6.	Canada	Counterparty 32
7.	Germany	Counterparty 6, Counterparty 20
8.	Norway	Counterparty 1
9.	Poland	Counterparty 3, Counterparty 4, Counterparty 12, Counterparty 14, Counterparty 18, Counterparty 19, Counterparty 22, Counterparty 23, Counterparty 24
10.	Switzerland	Counterparty 17
11.	Sweden	Counterparty 26
12.	USA	Counterparty 31
13.	United Kingdom	Counterparty 5, Counterparty 7, Counterparty 8, Counterparty 11, Counterparty 16, Counterparty 25, Counterparty 29, Counterparty 30
14.	Italy	Counterparty 21

Counterparty structure by rating

Exposure structure by rating is presented in the table below. The ratings were determined based on external ratings granted by Moody's, Standard&Poor's and Fitch (when a rating was granted by two agencies, the lower rating was applied, whereas when a rating was granted by three agencies, the middle rating was applied). Rating for counterparties 1 to 32 was accepted as at 31 December 2011.

Rating	Counterparty
AA	Counterparty 15, Counterparty 30, Counterparty 32, Counterparty 8
A	Counterparty 1, Counterparty 10, Counterparty 11, Counterparty 13, Counterparty 16, Counterparty 17, Counterparty 2, Counterparty 25, Counterparty 26, Counterparty 27, Counterparty 28, Counterparty 3, Counterparty 31, Counterparty 5, Counterparty 6, Counterparty 7, Counterparty 9
BBB	Counterparty 12, Counterparty 18, Counterparty 20, Counterparty 21, Counterparty 23, Counterparty 24, Counterparty 4
BB	Counterparty 14, Counterparty 22
Without rating	Counterparty 19, Counterparty 29

Credit risk of financial institutions on retail markets

In addition to the interbank market exposure discussed above, as at 31 December 2011 the Group had an exposure to financial institutions on the retail market (over PLN 5 million). The structure of this exposure is presented in the table below:

	Nominal value of exposure (in thousand PLN)		Country of the counterparty
	Statement of financial position item	Off-balance	
Counterparty 33	50 000	200 000	Poland
Counterparty 34	-	170 870	Ukraine

Management of foreclosed collateral

Foreclosed collaterals as a result of restructuring or debt collection activities are either used by the Group for internal purposes or designated for sale. Details of the foreclosed assets are analysed in order to determine whether they can be used by the Group for internal purposes. All of the assets taken over as a result of restructuring and debt collection activities in the years ended 31 December 2011 and 31 December 2010, respectively, were designated for sale.

Activities undertaken by the Group are aimed at selling assets as soon as possible. In individual and justified cases, assets may be withheld from sale. This occurs only if circumstances indicate that the sale of the assets at a later date is likely to generate greater financial benefits. The primary procedure for a sale of assets is open auction. Other procedures are acceptable in cases where they provide a better chance of finding a buyer and generate higher proceeds for the Group.

The Group takes steps to disseminate broadly to the public the information about assets being sold by publishing it on the Group's website, placing announcements in the national press, using internet portals i.a. carried out internet auctions and sending offers. In addition, the Group cooperates with external firms operating all over Poland in respect of collection, transportation, storage and intermediation in the sale of assets taken over by the Group as a result of restructuring and debt collection activities. The Group has also entered into cooperation agreements with external companies, which perform valuations of the movable and immovable properties that the Group has foreclosed or would like to foreclose in the course of realisation of collateral.

The carrying amounts of non-financial assets held by the Group, taken over in exchange for debts as at 31 December 2011 amounted to PLN 59 086 thousand and as at 31 December 2010 amounted to PLN 56 585 thousand. The above mentioned amounts are presented in Note 29 'Other assets', in line item 'Other' (PLN 11 319 thousand and PLN 11 188 thousand respectively), in Note 26 'Inventories', in line item 'Supplies' (PLN 47 767 thousand and PLN 45 397 thousand respectively).

Credit risk reporting

The Bank prepares monthly and quarterly credit risk reports for i.a. ALCO, BCC, the Bank's Management Board and the Bank's Supervisory Board. The reporting of credit risk covers specifically cyclic information on the results of risk measurement and the scale of risk exposure of the credit portfolio. In addition to the information concerning the Bank, the reports also contain information about the credit risk level for Group entities (i.a. KREDOBANK SA and the BFL SA Group), which have significant credit risk levels.

Management decisions concerning credit risk

Basic credit risk management tools used by the Bank include:

- minimum transaction requirements determined for a given type of transaction (e.g. minimum LTV, maximum loan amount, required collateral),
- the principles of defining credit availability, including cut-offs - the minimum number of points awarded in the process of creditworthiness assessment with the use of a scoring system (for retail clients) or the client's rating class or cumulative rating class (for corporate clients), which a client must obtain to receive a loan,

- concentration limits – the limits defined in the Article 71, clause 1 of the Banking Law,
- industry-related limits – limits which reduce the risk level related to financing institutional clients that conduct business activities in industries characterised by high level of credit risk,
- limits on credit exposures related to the Bank's customers – the limits defining the appetite for credit risk as result of i.a. the recommendations S and T,
- credit limits defining the Bank's maximum exposure to a given client or country in respect of wholesale operations and settlement limits and limits for the period of exposure,
- competence limits – they define the maximum level of credit decision-making powers with regard to the Bank's clients, the limits depend primarily on the amount of the Bank's exposure to a given client (or a group of related clients) and the loan transaction period; the competence limit depends on the credit decision-making level (in the Bank's organisational structure),
- minimum credit margins – credit risk margins relating to a given credit transaction concluded by the Bank with a given corporate client but the interest rate offered to a client cannot be lower than the reference rate plus credit risk margin.

Collateral management policy plays a significant role in establishing minimum transaction terms as regards credit risk. The Bank's and the entities' of the Group collateral management is meant to secure properly the credit risk to which the Group is exposed, including first of all the fact of establishing collateral that will ensure the highest possible level of recovery in the event of realisation of collateral.

The Bank applies the following rules with respect to accepting legal collateral for loans:

- in the case of substantial loans (in terms of value), several types of collateral are established, if possible, personal guarantees are combined with collateral established on assets,
- liquid types of collateral i.e. collateral established on tangible assets, which the Bank is likely to dispose of quickly for a price approximating the value of the assets put up as collateral are preferred,
- types of collateral which are exposed to a risk of significant adverse fluctuations of value are treated as auxiliary collateral,
- when an asset is accepted as collateral, an assignment of rights from the insurance policy relating to this asset or the insurance policy issued to the Bank are accepted as additional collateral,
- effective establishment of collateral in compliance with the loan agreement is necessary to make the funds available.

The policy regarding legal collateral is defined by internal regulations of Group's subsidiaries.

The type of collateral depends on the product and the type of the client. With regard to real estate financing products, collateral is required to be established as mortgage on the property. Until an effective mortgage is established, the following types of collateral are used (depending on type and amount of loan): an increased credit margin or/and a collateral in the form of a cession of receivables related to the construction agreement, bill of exchange, guarantee or an insurance of receivables.

With regard to retail banking loans for individuals, usually personal guarantees are used (a civil law surety/guarantee, a bill of exchange) or collateral is established on the client's bank account, his car or securities.

With regard to loans for the financing of small and medium enterprises and corporate clients, collateral can be established on i.a.: trade receivables, bank accounts, movable property, real estate or securities.

When signing a leasing agreement, BFL SA Group, as a proprietor of leased objects, treats them as collateral.

56. Interest rate risk management

The interest rate risk is a risk of incurring losses on the Bank's balance and off-balance sheet items sensitive to interest rate fluctuations, as a result of changes in the interest rates on the market.

The objective of interest rate risk management is to mitigate the risk of incurring losses arising from market interest rate changes to an acceptable level by shaping the structure of balance and off-balance sheet items.

Measurement of interest rate risk

In the process of interest rate risk management, the Group uses, in particularly, the Value at Risk (VaR) model, interest income sensitivity measure, stress tests and a repricing gap.

The value at risk (VaR) is defined as a potential loss arising from the maintained structure of balance and off-balance sheet items and the volatility of interest rates, with the assumed probability level and taking into account the correlation between the risk factors.

The sensitivity of interest income is a measure showing changes in interest income resulting from abrupt changes in the interest rates. This measure takes into account the diversity of revaluation dates of the individual interest-bearing items in each of the selected time horizons.

Stress-tests are used to estimate potential losses arising from a held structure of the statement of financial position and off-balance sheet items under market conditions that cannot be described in a standard manner using statistical measures. Two types of scenarios are used by the Bank:

- 1) hypothetical scenarios – which are based on arbitrary interest rate fluctuations: a parallel move in interest rate curves for the particular currencies by ± 50 b.p., ± 100 b.p. and by ± 200 b.p.,
- 2) historical scenarios – in which interest rate fluctuations are adopted based on the behaviour of interest rates in the past, including: the highest historical change, a bend of a yield curve along with portfolio positions, a bend of yield curve of peak and twist types, the largest historical non-parallel fluctuation of the interest rate curves for securities and derivative instruments that hedge them.

The repricing gap shows the difference between the present value of assets and liabilities exposed to interest rate risk, subject to revaluation in a given time range, and these balances are recognised on the transaction date.

Measures of interest rate gap are determined for other Group entities using similar methods to those used for determining the interest rate gap for the Bank itself, taking into account the specific nature of the entities.

Repricing Gap	0-1month	1-3 months	3-6 months	6-12 months	1-2 years	2-5 years	>5 years	Total

The Group - cumulative gap	302 630	(249 962)	(253 562)	(258 022)	(258 062)	(256 542)	(249 772)	-

At the end of 2011 and 2010 the Group had a positive cumulative gap in PLN in all time horizons.

Forecasting and monitoring of interest rate risk

As at 31 December 2011 and 31 December 2010, the exposure of the PKO Bank Polski SA Group to the interest rate risk comprised mainly of the exposure of the Bank. Interest rate risk generated by the other Group entities with regard to PLN, EUR and CHF did not have a significant effect on the interest rate risk of the entire Group and therefore did not significantly affect its risk profile. Interest rate risk with regard to USD was significantly altered by exposure of the Group, in which the biggest part has the exposure of KREDOBANK SA.

VaR of the Bank and stress tests analysis of the Group's exposure to the interest rate risk are presented in the following table:

Name of the sensitivity measure	31.12.2011	31.12.2010
VaR for a 10-day time horizon (in PLN thousand)*	62 661	39 004
Parallel movement of interest rate curves by 200 b.p. (in PLN thousand) (stress test)	530 726	522 641

* Due to the nature of the activities carried out by the other Group entities generating significant interest rate risk as well as a the specific nature of the market on which they operate, the Group does not calculate consolidated VaR. These companies apply their own risk measures in the interest rate risk management. KREDOBANK SA uses the 10-day interest rate VaR for the main currencies, which amounted to PLN 29 673 thousands as at 31 December 2011 and PLN 30 150 thousand as at 31 December 2010, respectively.

As at 31 December 2011 the interest rate VaR for a 10-day time horizon (10-day VaR) amounted to PLN 62 661 thousand, which accounted for approximately 0.36% of the value of the Bank's own funds. As at 31 December 2010, VaR for the Bank amounted to PLN 39 004 thousand, which accounted for approximately 0.24% of the Bank's own funds*.

Reporting of the interest rate risk

The Bank prepares daily, weekly, monthly and quarterly reports addressing interest rate risk. The quarterly reports are also applicable to the Group. Reports present the information on interest rate risk exposure and usages of available limits regarding the risk. Reports are prepared mainly for RC, ALCO, the Bank's Management Board and the Bank's Supervisory Board.

Management decisions as regards interest rate risk

The main tools used in interest rate risk management in the Group include:

- procedures for interest rate risk management,
- limits and thresholds for interest rate risk,
- defining allowable transactions based on interest rates.

The Group established limits and thresholds for interest rate risk comprising the following: price sensitivity, interest income sensitivity, limits and threshold for losses and limits on instruments sensitive to interest rate fluctuations.

Methods of interest rate risk management in the Group entities are defined by internal regulations implemented by those entities which are characterised by significant values of interest rate risk measure outcomes. These regulations are developed after consultation with the Bank and include recommendations issued by the Bank for Group entities.

57. Currency risk management

Currency risk is the risk of incurring losses due to unfavourable exchange rate changes. The risk is generated by maintaining open currency positions in a given foreign currency.

The objective of currency risk management is to mitigate the risk of incurring losses arising from exchange rate fluctuations to an acceptable level by shaping the structure of balance and off-balance sheet items.

Measurement of the currency risk

The Bank measures the currency risk using the Value at Risk (VaR) model and stress tests.

The value at risk (VaR) is defined as a potential loss arising from currency position and foreign exchange rate volatility under the assumed confidence level and taking into account the correlation between the risk factors.

* Own funds calculated in accordance with regulations concerning calculation of the capital adequacy ratio.

Stress-tests and crash-tests are used to estimate potential losses arising from currency position under extraordinary market conditions that cannot be described in a standard manner using statistical measures. Two types of scenarios are used by the Bank:

- 1) hypothetical scenarios – which assume a hypothetical appreciation or depreciation of currency rates (by 20% and 50%),
- 2) historical scenarios – bases on the behaviour of currency rates observed in the past.

Forecasting and monitoring of currency risk

VaR of the Bank and stress-testing of the Group's financial assets exposed to currency risk are stated cumulatively for all currencies in the table below:

Name of sensitivity measure	31.12.2011	31.12.2010
VaR for a 10-day time horizon (in PLN thousand)*	1 470	3 171
Change in CUR/PLN +20% (in PLN thousand) (stress-test)**	17 210	8 109

* Due to the nature of the activities carried out by the other Group entities generating significant currency risk as well as the specific nature of the market on which they operate, the Bank does not calculate consolidated VaR. These companies apply their own risk measures in the currency risk management. KREDOBANK SA uses the 10-day VaR, which amounted to approx. PLN 467 thousands as at 31 December 2011 and approx. PLN 182 thousand as at 31 December 2010, respectively.

** The table presents the value of the most adverse stress-test of the scenarios: PLN appreciation by 20% and PLN depreciation by 20%. The value of stress-test at the end of 2010 was brought to comparability.

The level of currency risk was low both at 31 December 2011 and 31 December 2010.

The Group's currency positions are presented in the table below:

	31.12.2011	31.12.2010
	Currency position	Currency position
EUR	83 153	(4 035)
GBP	50	48 073
CHF	(37 266)	(18 820)
USD	(180 781)	(78 916)
Other (Global Net)	11 630	11 257

The volume of currency positions is a key factor determining the level of currency risk on which the Group is exposed (except for volatility of foreign exchange rates). The level of currency positions is determined by all foreign currency transactions, which are concluded by the Group, both in the statement of financial position and off-balance sheet transactions. The Bank's exposure to currency risk is low (with reference to own funds, VaR for a 10-day time horizon for the Bank's currency position at the end of 2011 amounted to ca. 0.01%).

Currency structure

The tables below present currency exposure by the specific types of assets, liabilities and contingent liabilities:

	<i>Currency translated to PLN - 31.12.2011</i>				
	PLN	EUR	CHF	Other	Total

Reporting of the currency risk

The Bank prepares daily, weekly, monthly, and quarterly reports addressing currency risk. The quarterly reports are also applicable to the Group. Reports gather the information on currency risk exposure and updates on available limits regarding the risk. Reports are prepared mainly for RC, ALCO, the Bank's Management Board and the Bank's Supervisory Board.

Management decisions concerning currency risk

Main tools used in currency risk management in the Group include:

- procedures for currency risk management,
- limits and thresholds for currency risk,
- defining allowable types of transactions in foreign currencies and the exchange rates used in such transactions.

The Group has set limits and threshold values for currency risk, i.a.: currency positions, Value at Risk calculated for a 10-day time horizon and daily loss from transactions on currency market.

58. Liquidity risk management

The liquidity risk is defined as the lack of possibility to pay the debts on time due to the lack of liquid assets. Lack of liquidity may arise from inappropriate structure of statement of financial position, misfit of cash flows, not received payments from contractors, sudden withdrawal of cash by clients or other market events.

The objective of liquidity risk management is to pay present and future debts (also potential) on time, taking into account the nature of performed activities and requirements which may occur due to changes in market environment, by shaping the structure of statement of financial position and contingent liabilities and commitments.

The Group's policy concerning liquidity is based on keeping a portfolio of liquid securities and increasing stable sources of financing (stable deposits, in particular). In its liquidity risk management policy, also uses money market instruments, including NBP open market operations.

Measurement of the liquidity risk

The Group makes use of the following liquidity risk measures:

- the contractual liquidity gap method and the liquidity gap in real terms,
- liquidity reserve,
- measure of stability of deposit and loan portfolios,
- stress tests (liquidity stress tests).

Forecasting and monitoring of liquidity risk

Liquidity gaps presented below include the sum of Bank's adjusted liquidity gap (adjusted in terms of the following: permanent balances on deposits of non-financial sector and their maturity, permanent balances on loans in current accounts for non-financial entities and their maturity and liquid securities and their maturity) and contractual liquidity gap of other Group's entities.

	a'vista	0 - 1 month	1 - 3 months	3 - 6 months	6 - 12 months	12 - 36 months	36 - 60 months	over 60 months
31.12.2011								
The Group - adjusted gap in real terms	7 299 484	12 094 029	(1 599 805)	1 399 996	(1 169 611)	10 276 571	16 150 066	(44 450 730)
The Group - cumulative adjusted gap in real terms	7 299 484	19 393 513	17 793 708	19 193 704	18 024 093	28 300 664	44 450 730	-
31.12.2010								
The Group - adjusted gap in real terms	3 207 473	14 102 549	(949 842)	(106 638)	3 800 570	5 160 414	(1 014 208)	(24 200 318)
The Group - cumulative adjusted gap in real terms	3 207 473	17 310 022	16 360 180	16 253 542	20 054 112	25 214 526	24 200 318	-

In all time horizons, the PKO Bank Polski SA Group's cumulative adjusted liquidity gap* as at 31 December 2011 and 31 December 2010 was positive. This means a surplus of assets receivable over liabilities payable.

The table below presents liquidity reserve of the Bank as at 31 December 2011 and 31 December 2010:

	31.12.2011	31.12.2010
Liquidity reserve up to 1 month* (in PLN million)	17 723	10 151

*Liquidity reserve equals the gap between the most liquid assets and expected and potential liabilities which mature in a given period of time.

As at 31 December 2011 the level of permanent balances on deposits constituted approx. 94.8% of all deposits in the Bank (excluding interbank market), which means an decrease by approximately 0.4 pp. as compared to the end of 2010.

The chart below presents the structure of the Bank's sources of financing as at 31 December 2011 and as at 31 December 2010.

The contractual flows of the Group's liabilities excluding derivative financial instruments as at 31 December 2011 and 2010 respectively, by maturity.

The tables below show the contractual maturity analysis presenting the outstanding contractual maturity dates by individual categories of balance sheet and off-balance sheet liabilities, excluding derivative financial instruments as at 31 December 2011 and 2010 respectively.

The amounts denominated in foreign currencies have been translated using the average NBP exchange rate as at 31 December 2011 and 31 December 2010. The amounts disclosed comprise non-discounted future flows, both in respect of principal and interest (if applicable), in accordance with the contract, for the entire period to the date of the liability's maturity. In situations where the party to whom the Group has a liability is able to select the settlement deadline, it has been assumed that the earliest date on which the Group is obliged to settle the liability shall be taken into account. In situations where the Group is obliged to settle the liabilities in instalments, each instalment is allocated to the earliest period in which the Group might be obligated to settle. In the case of liabilities where the instalment date is not fixed, the terms binding as at the reporting date have been adopted.

* The PKO Bank Polski SA Group's liquidity gap in real terms has been determined as the sum of PKO Bank Polski SA's liquidity gap in real terms and contractual liquidity gaps of the remaining entities of the PKO Bank Polski SA Group.

Contractual flows of the Group's liabilities as at 31 December 2011 by maturity

	Up to 1 month	1 - 3 months	3 months - 1 year	1 - 5 years	Over 5 years	Contractual value	Carrying amount
Liabilities:

The contractual flows related to derivative financial instruments as at 31 December 2011 and 2010 respectively, by maturity dates

Derivative financial instruments settled in net amounts

Derivative financial instruments settled by the Group on a net basis include:

- interest rate swaps (IRS),
- Forward Rate Agreements (FRA),
- Non Deliverable Forwards (NDF),
- options.

The tables below show the contractual maturity analysis presenting the outstanding contractual maturity dates by individual categories of derivative financial instruments in respect of which the balance sheet date valuation was negative (a liability) as at 31 December 2011 and as at 31 December 2010 respectively.

The amounts denominated in foreign currencies have been translated using the average NBP exchange rate as at 31 December 2011 and as at 31 December 2010. In the case of IRS transactions, non-discounted future net cash flows in respect of interest have been presented and in the case of the remaining derivative instruments settled on a net basis, the amount of the valuation as at 31 December 2011 and as at 31 December 2010 respectively was adopted as the value of cash flows.

Moreover, in the table the cash flows from IRS transactions which constitute cash flow hedges in respect of loans with variable interest rates are shown separately.

Derivative financial instruments settled in gross amounts

Derivative financial instruments settled by the Group on a gross basis include:

- foreign currency swaps,
- foreign currency forwards,
- Cross Currency IRS (CIRS).

The tables below show the contractual maturity analysis, presenting the outstanding contractual maturity dates by individual categories of derivative financial instruments (inflows and outflows) in respect of which the balance sheet date valuation was negative (a liability) as at 31 December 2011 and 2010 respectively.

The amounts denominated in foreign currencies have been translated using the average NBP rate as at 31 December 2011 and as at 31 December 2010. The amounts disclosed comprise non-discounted future cash flows, both in respect of principal and interest (if applicable).

In the table below cash flows from CIRS transactions which constitute cash flow hedges in respect of mortgage loans denominated in CHF and deposits negotiated in PLN are shown separately.

31 December 2011	Up to 1 month	1 - 3 months	3 months - 1 year	1 - 5 years	Over 5 years	Contractual value

Reporting of the liquidity risk

The Bank prepares daily, weekly, monthly, and quarterly reports addressing liquidity risk. The quarterly reports are also applicable to the Group. Reports present the information on liquidity risk exposure and usages of available limits regarding the risk. Reports are prepared mainly for RC, ALCO the Bank's Management Board and the Bank's Supervisory Board.

Management decisions concerning liquidity risk

The main tools for liquidity risk management in the PKO Bank Polski SA Group are as follows:

- procedures for liquidity risk management, in particular emergency plans,
- limits and thresholds mitigating liquidity risk,
- deposit, investment and derivative transactions, including structural currency transactions and transactions for sale or purchase of securities,
- transactions ensuring long-term financing of Bank's lending activities.

To ensure an adequate liquidity level, the Bank and the entities of the PKO Bank Polski SA Group have accepted limits and thresholds for liquidity risk. The limits and thresholds were set for both current liquidity measures and medium and long-term liquidity measures.

Methods of liquidity risk management in the entities of the Group are defined by internal regulations implemented by the Group's entities which are characterised by high levels of liquidity risk measure outcomes.

These regulations are developed after consultation with the Bank and take into account recommendations issued by the Bank to the entities.

59. Management of price risk of equity securities

The price risk of equity securities is the risk of incurring a loss due to changes in the prices of equity securities on the public market or stock exchange indices, generated by maintaining open positions in instruments sensitive to changes in these market parameters.

The price risk of equity securities results from operations conducted as part of trading activities (DM PKO BP SA), investing activities and from other operations as part of banking activities generating a position in equity securities.

Managing the equity securities risk is aimed at limiting possible losses due to changes in the prices of equity securities on the public market or stock exchange indices to a level acceptable to the Bank, by optimising the positions taken in instruments sensitive to changes in these market parameters.

The risk is managed by imposing limits on the activities of Dom Maklerski PKO BP broken down into the banking portfolio and the trading portfolio, and by monitoring the utilisation thereof.

The effect of the price risk of equity securities on the financial position of the Bank was assessed as immaterial. The positions taken in equity securities and index instruments are limited, and the Bank does not expect them to increase significantly.

60. Other price risk

Taking into consideration other price risks, at the end of the year 2011, the Bank was exposed to price risk of investment fund participation units in collective investment funds.

This risk is immaterial – a capital requirement, pursuant to the Resolution No. 76/2010 of the Polish Financial Supervision Authority (with subsequent amendments) *, to cover the above mentioned risk was at the end of the year 2011 lower than PLN 1 million.

61. Management of derivative instruments risk

The risk of derivative instruments is a risk of incurring losses arising from the Bank taking up a position in financial instruments, which meet all of the following conditions:

- 1) the value of an instrument changes with the change of the underlying instrument,
- 2) it does not require any initial net investment or requires only a small initial net investment compared with other types of contracts which similarly respond to changes in market terms,
- 3) it is to be settled at a future date.

The process of derivative instruments risk management is integrated with the process of: interest rate, currency, liquidity as well as credit risk management. However, due to the specific nature of derivatives it is subject to special control specified in the internal regulations of the Bank.

Measurement of the derivative instruments risk

The Bank measures the derivative instrument risk using, among others, the Value at Risk (VaR) model described in the section on interest rate risk or currency risk, depending on the risk factor which affects the value of the instrument.

In the measurement of other Group members' derivative-related risk, information on the companies' positions in specific instruments is used, as indicated by the Bank.

Forecasting and monitoring of the derivative instruments risk

Monitoring the risk of derivative instruments takes place as part of monitoring of other types of financial and credit risk. The Bank pays special attention to monitor financial risk related to the maintenance of currency options portfolio and customer credit risk resulting from amounts due to the Bank in respect of derivative instruments.

* Amendments to the Resolution No. 76/2010 were introduced by the following PFSA resolutions: Resolution No. 369/2010 dated 12 October 2010, PFSA Resolution No. 153/2011 dated 7 June 2011, PFSA Resolution No. 206/2011 dated 22 August 2011 and PFSA Resolution No. 324/2011 dated 20 December 2011.

Reporting of the derivative instruments risk

The Bank prepares daily, weekly, monthly, and quarterly reports addressing the risk of the derivative instruments. The quarterly reports are also applicable to the Group. Reports present the information on the derivative risk exposure and updates on available limits regarding the risk. Reports are prepared mainly for RC, ALCO the Bank's Management Board and the Bank's Supervisory Board.

Management decisions concerning risk of derivative instruments

The main tools used in derivative risk management are as follows:

- written procedures for derivative risk management,
- limits and thresholds set for the risk related to derivative instruments,
- master agreements specifying, among others, settlement mechanisms.

Risk management is carried out by imposing limits on the derivative instruments included in the Bank's trading and banking portfolios, monitoring limits and reporting risk level.

Master agreements concluded by the Bank with the major business partners based on the standards developed by the Polish Bank Association (domestic banks) and ISDA (foreign banks and credit institutions), which allow offsetting mutual liabilities, both due (mitigation of settlement risk) and not yet due (mitigation of pre-settlement risk), are particularly important for mitigating the risk associated with derivative instruments. Additional collateral for exposures, resulting from derivative instruments are collateral deposits escrowed by counterparties as a part of CSA agreement (Credit Support Annex).

Methods of derivative risk management in the Group entities are defined by internal regulations implemented by these entities which take up a position in financial instruments or plan to take positions in such instruments. These regulations are developed after consultation with the Bank and take into account the recommendations issued by the Bank for the Group entities.

Positions taken by the other Group entities in particular derivative instruments are determined using similar methods to those used for positions taken by the Bank in such instruments, taking into account the specific nature of the business conducted by the Group entities.

62. Operational risk management

Operational risk is defined as the risk of occurrence of a loss due to non-compliance or unreliability of internal processes, people and systems or external events.

The objective of operational risk management is to optimise operational efficiency by reducing operating losses, costs streamlining and improving the timing and adequacy of the response of the Group to events which are beyond its control.

Measurement of the operational risk

Measurement of operational risk at the Bank aims at defining the scale of threats related to the existence of operational risk with the use of defined risk measures. The measurement of operational risk comprises:

- KRI calculation,
- calculation of VaR for operating risk,
- scenario-based analyses (stress-tests).

Identification and assessment of operational risk comprises operational risk appearing in the existing products, processes and IT applications of the Bank, the above is conducted with the use of:

- accumulation of data on operational events,
- results of internal audit,
- results of functional internal control,
- Key Risk Indicators (KRI).

Forecasting and monitoring of operational risk

The Bank regularly monitors:

- utilisation level of strategic tolerance limits on operational risk,
- utilisation level of operational risk losses,
- effectiveness and timeliness of actions taken to reduce or transfer the operational risk,
- setting threshold values of Key Risk Indicators (KRI),
- operating events and their effects,
- effects of actions taken following external control recommendations or internal audits,
- quality of the internal functional controls.

In 2011, the dominant impact on the operational risk profile of the Group was exercised by the following three entities: PKO Bank Polski SA, the BFL SA Group and KREDOBANK SA. The other Group entities, considering their significantly smaller scale and type of activity, generate only reduced operational risk. Group entities manage operational risk according to principles of risk management in PKO Bank Polski SA, considering their specific nature and scale of activity.

Reporting of operational risk

The Bank prepares reports concerning operational risk of the Bank and the entities of the Group on a quarterly basis. The reports are addressed to the Operational Risk Committee, the Bank's Management Board and the Bank's Supervisory Board. The reports contain among others:

- information on the operational risk profile of the Bank resulting from the process of identifying and assessing the threats for products, processes and IT software of the Bank,
- information on the results of measuring and monitoring operational risk,
- information on operating events and their financial effects,
- the most important projects and initiatives as regards operational risk management.
- recommendation or proposal of actions for the Operational Risk Committee or the Bank's Management Board,
- information about utilisation level of strategic tolerance limit and losses limits on operational risk.

Each month, information on operational risk is prepared and forwarded to members of the Bank's Management Board and organisational units of the Bank responsible for system-based operating risk management. The scope of information is diversified and tailored to the scope of responsibilities of individual recipients of the information.

Management decisions concerning operational risk

Operational risk management is performed through systemic solutions as well as regular ongoing management of the risk. Systemic operational risk management is centralised at the PKO Bank Polski SA Head Office level. The ongoing operational risk management is conducted by every organisational unit of the Bank.

In order to manage the operational risk, the Bank gathers internal and external data about operating events and their causes, data on the operating environment, and data related to the quality of internal functional controls.

In order to mitigate exposure to operational risk, following tools are used by the Bank:

- 1) control instruments,
- 2) human resources management instruments (proper staff selection, enhancement of professional qualification of employees, motivation packages),
- 3) setting threshold values of Key Risk Indicators (KRI),
- 4) tolerance and operational risk limits,
- 5) contingency plans,
- 6) insurance,
- 7) outsourcing.

The instruments used for mitigating operating risk are selected among other things depending on:

- 1) availability and adequacy of risk-mitigating instruments,
- 2) the nature of operations or of the process in which the operating risk was identified,
- 3) materiality of the risk,
- 4) the cost of using the instrument.

Additionally, the Bank's internal regulations stipulate the duty to refrain from excessively risky operations, and if such operations are being conducted – to withdraw from them or to limit their scope. The level of operating risk is deemed to be excessive when the potential benefits from a given type of operation are lower than the potential operating losses.

If the level of operational risk is too high, the Bank takes the following actions:

- risk avoidance – withdrawing from too risky activity or resigning from undertaking it if there is no possibility of managing it,
- reducing the scale of activities characterised by too high level of risk, if it can be possibly managed and it is possible to take actions reducing risk,
- risk transfer – insurance against the risk of occurring operational events ensuring the maintenance of operational risk on such a level that the Bank's activities are not threatened.

The Group entities manage the operational risk in accordance with the rules implemented by the PKO Bank Polski SA, taking into account the specific nature of the business conducted by the Group entities.

63. Compliance risk management

Compliance risk is defined as the risk of legal sanctions, incurring financial losses or losing reputation or reliability due to failure of the Group, its employees or entities acting on its behalf to comply with the provisions of the law, internal regulations, standards adopted by the Group, including ethical standards.

The objective of compliance risk management is to ensure the Group's compliance with law and adopted standards and the Bank's acting as a entity that is reliable, fair and honest, through mitigating compliance risk, reputation risk or risk of the Group's credibility and mitigating the risk of occurring financial losses or legal sanction risk resulting from breach of regulations and ethical standards.

Appropriate organisational units or designated employees are responsible for finding systemic solutions in the area of ensuring the Group's entities comply with the binding regulations and operating standards. Compliance Department is responsible for finding such solutions, development of the method for evaluation, monitoring and reporting compliance risk. The Compliance Department is a unit which was granted independence and which reports directly to the President of the Bank's Management Board.

The rules concerning the process of compliance risk management adopted by all Group entities are inherent within the PKO Bank Polski SA Group.

Compliance risk management involves in particular:

- preventing involvement of the Group in illegal activities,
- ensuring data protection,
- development of ethical standards and monitoring of their application,
- conflict of interest management,
- preventing situations where the Group's employees could be perceived as pursuing their own interest in the professional context,
- professional, fair and transparent formulation of product offers, advertising and marketing messages,
- prompt, fair and professional consideration of complaints, requests and quality claims of clients.

In order to identify and assess compliance risk, information on cases of non-compliance and their origins is being used, including information based on internal audits results, functional control and external controls.

Identification and assessment of compliance risk is mainly based on:

- estimating the most probable number of typical cases of non-compliance arising during the year,
- estimating the severity of the potential cases of non-compliance,
- assessing the existence of any additional factors of compliance risk.

While performing an assessment a character and potential losses are defined together with methods of reducing or eliminating compliance risk. Assessment is held through workshops.

Monitoring of compliance risk is conducted with the use of information submitted by the Companies and consists of:

- the analysis of non-compliance events in the Group and in banking sector, the reasons for their occurrence and their effects,
- the assessment of amendments in key legal regulations which have an impact on the Bank's and the Group's activity,
- the assessment of actions taken by the Group in respect of managing compliance risk.

Reporting of information concerning compliance risk includes both the Bank, and Group's entities. Reports prepared quarterly contain information, including cases of non-compliance, passed by the Group's entities. Reports are addressed to the Bank's Management Board, the Bank's Supervisory Board, and the Supervisory Board's Audit Committee. Reports contain among others:

- the results of identifying and assessing compliance risk,
- the non-compliance events,
- the key amendments in regulatory environment.

The Group has adopted a zero tolerance policy against compliance risk, which means that the Group focuses its actions towards eliminating this risk.

64. Strategic risk management

The strategic risk is defined as a risk related to the possibility of negative financial consequences caused by erroneous decisions, decisions made on the basis of an inappropriate assessment or failure to make correct decisions relating to the direction of the Bank's strategic development.

Managing the strategic risk is aimed at maintaining, on an acceptable level, the negative financial consequences resulting from bad decisions, decisions made on the basis of an incorrect assessment or failing to make appropriate decisions on the direction of the strategic development of the Bank.

In measuring the strategic risk, the Bank takes into account an impact of selected types of factors, distinguished in the activity and in the environment, which comprise in particular:

- external factors,
- factors related to the growth and development of the banking operations,
- factors related to the management of human resources,
- factors related to investment activities,
- factors related to the organisational culture.

The monitoring of the strategic risk level is performed in the Bank at least on an annual basis at minimum.

Strategic risk reporting is conducted annually in the Bank. The reports on strategic risk are prepared mainly for the Bank's Management Board and for managing directors of the Bank's Head Office.

The management of strategic risk in the Bank is mainly applied in the form of actions undertaken if an elevated level of strategic risk occurs.

65. Reputation risk management

The reputation risk is defined as the risk related to a possibility of negative variations from the planned results of the Group due to the deterioration of the Group's image.

The objective of managing the reputation risk is to protect the Group's image and limit the probability of the occurrence and level of reputation-related losses.

Reputation risk ratios are calculated based on annual assessment of negative image-related events identified in a given calendar year for particular types of image-related events. Main tools used to determine the Group's reputation risk level are:

- a catalogue of image-related events categories containing a list of image-related categories with appropriate weights assigned,
- a register of image-related events containing a list of negative image-related events that occurred grouped by image-related events categories.

Monitoring of image-related events is performed on an ongoing basis and includes:

- monitoring the external and internal communication channels of the Group with the environment in terms of identifying the negative impact of image-related events,
- gathering and analyzing information related to the occurrence or a possibility of occurrence of image related events;
- recording data on the identified negative impact of image-related events.

The reports on the level of reputation risk are prepared in the Bank on an annual basis. The reports are addressed to the organisational units of the Banking Risk Division.

Management of reputation risk in the Group mainly comprises preventive activities aimed at reducing or minimising the scale and the scope of reputation events, as well as selection of effective tools for protective measures aimed at eliminating, mitigating or minimising the unfavourable effect of unfavourable events on the Group's image.

66. Capital adequacy

Capital adequacy is the maintenance of a level of capital by the PKO Bank Polski SA Group exceeds sum of regulatory capital requirements (the so-called Pillar 1) and sum of internal capital requirements (the so-called Pillar 2).

The objective of capital adequacy management is to maintain capital on a level that is adequate to the risk scale and profile of the Group's activities.

The process of managing the Group's capital adequacy comprises:

- identifying and monitoring of all of significant risks,
- assessing internal capital to cover the individual risk types and total internal capital,
- monitoring, reporting, forecasting and limiting of capital adequacy,
- performing internal capital allocations to business segments, client segments and entities in the Group in connection with profitability analyses,
- using tools affecting the capital adequacy level (including: tools affecting the level of equity, the scale of equity item reductions and the level of the loan portfolio).

The main measures of capital adequacy are:

- the capital adequacy ratio whose minimum level in accordance with the Banking Act is 8%,
- the ratio of equity to internal capital whose acceptable minimum level in accordance with the Banking Act is 1.0.

As at 31 December 2011 compared with 31 December 2010 (comparable data calculated in accordance with the amended regulations concerning rules of calculating capital requirements as well as own funds), the Group's capital adequacy ratio dropped by 0.10 pp. to 12.37%, mainly due to an increase in the Group's credit risk capital requirement, resulted mainly from the fast loan portfolio growth of the Group.

Despite the drop in the capital adequacy ratio, the Group's capital adequacy 2011 remained at a safe level, significantly above the statutory limits.

66.1. Own funds calculated for the capital adequacy purposes

Own funds for the purposes of capital adequacy are calculated based on the provisions of the Banking Law and the Resolution No. 325/2011* of the Polish Financial Supervision Authority of 20 December 2011 on decreasing core funds (Official journal of the PFSA nr 13 item 49 as of 30 December 2011).

Own funds comprise basic funds, supplementary funds and short-term capital.

Basic funds are comprised of the following items:

- 1) principal funds comprising: share capital, reserve capital, other reserve capital,
- 2) general banking risk fund,
- 3) unappropriated profits from previous years,
- 4) net profit prior to approval and net profit for the current reporting period, calculated based on appropriate accounting standards, decreased by any expected charges and dividends, in amounts not exceeding amounts audited by certified public accountants, in accordance with the Banking Law, Article 127.2, Point 2)c).

Basic funds are reduced by deducting the following items:

- 1) intangible assets stated at carrying amount,
- 2) the Bank's equity exposures to financial institutions, lending institutions, domestic banks, foreign banks and insurance companies – in the amount of 50% of the value of such exposures,
- 3) unrealised losses on debt, equity instruments and other receivables classified as available for sale,
- 4) negative currency translation differences from foreign operations,
- 5) negative amounts in respect of adjustments on revaluation of assets in the trading portfolio.

* the Resolution No. 325/2011 of the Polish Financial Supervision Authority of 20 December 2011 on other deductions from the primary funds - their value, scope and methods of application; other balance sheet items included in complementary funds – their value, scope and methods of allocation to the bank's additional funds; deductions from the additional funds – their value, scope and methods of application; the scope and method of considering the bank's activities in groups while calculating own funds.

Supplementary funds are comprised of the following items:

- 1) subordinated liabilities,
- 2) unrealised gains on debt and equity instruments classified as available for sale – in the amount of 80% of their pre-tax value,
- 3) positive currency translation differences from foreign operations.

Moreover, the supplementary funds are reduced by 50% of the value of the Bank's equity exposures to financial institutions, lending institutions, domestic banks, foreign banks and insurance companies. If the amount of reduction would result in supplementary funds falling below nil, the excess above the value of the supplementary funds is subtracted from the basic funds.

The own funds of the Group include also short-term capital.

In addition, the following items are included in the calculation of consolidated own funds of the Group:

- 1) goodwill of subsidiaries (which decreases the value of own funds),
- 2) non- controlling interests in equity (which increase the value of own funds).

As at 31 December 2011, the Group's own funds increased by PLN 724 370 thousand, mainly as a result of including in the funds the Bank's net profit for 2010, net of dividend paid (of PLN 836 209 thousand) and an increase in the reserve capital and other reserves of the Group's entities of PLN 41 132 thousand. Compared with the balance as at the end of 2010, the accumulated profit dropped by PLN 135 459 thousand, and the amount of unrealised losses on debt and equity securities in the AFS portfolio increased by PLN 62 112 thousand, with a simultaneous drop in the value of other reductions of PLN 36 861 thousand.

The structure of the Group's own funds is presented in the table below:

GROUP'S OWN FUNDS	31.12.2011	31.12.2010
Basic funds (Tier 1)	16 664 233	15 960 072
Share capital	1 250 000	1 250 000
Reserve capital	13 041 390	12 212 177
Other reserves	3 460 368	3 412 239
General banking risk fund for unidentified banking activities risk	1 070 000	1 070 000
Profits from previous years	(23 162)	112 297
Unrealised losses on debt and equity instruments and other receivables classified as available for sale	(129 518)	(67 406)
Assets valuation adjustments in trade portfolio	(143)	(183)
Intangible assets, of which:	(1 800 008)	(1 802 037)
goodwill of subsidiaries	(227 349)	(229 740)
Equity exposures	(109 054)	(118 285)
Negative currency translation differences from foreign operations	(94 350)	(110 720)
Non-controlling interest	(1 290)	1 990
Supplementary funds (Tier 2)	1 545 549	1 512 546
Subordinated liabilities classified as supplementary funds	1 600 700	1 600 700
Unrealised profits on debt and equity instruments classified as available for sale (up to 80% of their values before tax)	51 576	29 158
Positive currency translation differences from foreign operations	2 327	973
Equity exposures	(109 054)	(118 285)
Short-term equity (Tier 3)	133 134	145 928
TOTAL EQUITY	18 342 916	17 618 546

66.2. Capital requirements (Pillar 1)

The Group calculates capital requirements in accordance with the Resolution No. 76/2010 of the Polish Financial Supervision Authority dated 10 March 2010 on scope and detailed principles of setting capital requirements in connection with the individual risk types (Polish Financial Supervision Authority's Journal of Laws No 2, item 11 dated 9 April 2011 with subsequent amendments): in respect of the Bank's operational risk - using the standard method, in respect of operating risk - starting from 30 June 2011 using the advanced method (AMA) (for the year 2010 using the standard method (TSA)) and in respect of market risk - using the basic methods.

The scale of the Bank's and the Group's trading activities is significant, therefore the total capital requirements constitute sum of the capital requirements for:

- 1) credit risk - including credit risk of the banking book and counterparty credit risk,
- 2) market risk - including foreign exchange risk, commodities risk, equity securities risk, specific risk of debt instruments, general risk of interest rates,
- 3) operational risk,
- 4) other types of capital requirements in respect of:
 - a) settlement/delivery risk,
 - b) the risk of exceeding the exposure concentration limit and the large exposure limit,
 - c) the risk of exceeding the capital concentration threshold.

The table below shows the Group's exposure to particular types of risk.

Capital requirements	31.12.2011	31.12.2010
Credit risk	10 657 309	9 821 710
credit risk (banking book)	10 534 714	9 756 757
counterparty risk (trading book)	122 595	64 953
Market risk	355 284	422 154
equity securities risk	1 604	767
specific risk of debt instruments	262 412	341 058
general risk of interest rates	91 268	80 329
Operational risk	852 099	1 057 922
Total capital requirements	11 864 692	11 301 786
Capital adequacy ratio	12.37%	12.47%

An increase in the capital requirement in 2011 in respect of credit risk resulted from a significant increase in the volume of loan portfolio (statement of financial position and off-balance-sheet exposure) by approx. 6.6%.

A decrease in the capital requirement in respect of market risk by 15.8% to the level of PLN 355 million resulted mainly from a decrease in the value of issue underwriting, whereas an increase in the value of corporate bonds (total decrease in the requirements on bonds approx. by 29%).

The Bank's capital requirements in respect of operating risk as at 31 December 2011 has been calculated under the advanced measurement approach (AMA). On 21 June 2011, the Bank obtained approval from the PFSA for implementing this approach with a temporary limitation (until the conditions set by the PFSA have been met) on the drop in the capital requirement by no more than up to a level of 75% of the requirement calculated under the standardised approach (TSA). As a consequence, as at December 2011 the requirement in respect of operating risk for the Group compared with the value at the end of December 2010 dropped by PLN 206 million to PLN 852 million. The requirement in respect of operational risk of Group entities was calculated using the basic index approach (BIA) both in 2011 and 2010.

The Group calculates capital requirements on account of credit risk according to the following formula:

- in case of statement of financial position items - a product of a carrying amount, a risk weight of the exposure calculated according to the standardised method of credit risk requirement and 8% (considering collateral),

- in case of granted contingent liabilities and commitments – a product of nominal value of liability (considering value of allowances on the liability), a risk weight of the product, a risk weight of exposure calculated according to the standardised method of credit risk requirement and 8% (considering recognised collateral),
- in case of off-balance sheet transactions (derivative instruments) – a product of risk weight of the exposure calculated according to the standardised method of credit risk requirement, equivalent in the statement of financial position of off-balance sheet transaction and 8% (the value of the equivalent in the statement of financial position is calculated in accordance with the mark-to-market method).

Risk-weighted amount divided into portfolios (on account of credit risk of instruments included into banking book, counterparty credit risk and specific risk of instruments from the trading portfolio) as at 31 December 2011 is as follows:

Type of instrument	Carrying amount	Risk - weighted value
Bank portfolio	183 766 482	118 090 798
Trading portfolio	6 981 555	2 643 592
Total instruments in the statement of financial position	190 748 037	120 734 390

Type of instrument	Nominal value	Statement of financial position equivalent	Risk - weighted value
Bank portfolio	35 815 703	13 639 658	12 642 199
Trading portfolio	1 074 685	1 074 685	656 608
Total off-balance sheet instruments	36 890 388	14 714 343	13 298 807

Type of instrument	Nominal value	Statement of financial position equivalent	Risk - weighted value
Bank portfolio	83 382 850	2 448 267	950 931
Trading portfolio	318 503 683	2 918 421	1 532 443
Total derivative instruments	401 886 533	5 366 688	2 483 374

Risk-weighted amount divided into portfolios (on account of credit risk of instruments included into banking book, counterparty credit risk and specific risk of instruments from the trading portfolio) as at 31 December 2010 is as follows:

Type of instrument	Carrying amount	Risk - weighted value
Bank portfolio	163 897 606	110 839 073
Trading portfolio	5 762 895	1 976 896
Total instruments in the statement of financial position	169 660 501	112 815 969

Type of instrument	Nominal value	Statement of financial position equivalent	Risk - weighted value
Bank portfolio	34 289 347	11 654 884	10 662 583
Trading portfolio	2 496 031	2 496 031	2 295 917
Total off-balance sheet instruments	36 785 378	14 150 915	12 958 500

Type of instrument	Nominal value	Statement of financial position equivalent	Risk - weighted value
Bank portfolio	65 615 762	1 401 166	457 802
Trading portfolio	212 165 405	1 994 358	811 914
Total derivative instruments	277 781 167	3 395 524	1 269 716

66.3. Internal capital (Pillar 2)

The Group calculates internal capital in accordance with the Resolution No 258/2011 of the Financial Supervision Authority of 4 October 2011* on detailed principles for functioning of risk management system and internal control system and detailed terms of estimating internal capital by banks and reviewing the process of estimating and maintaining internal capital (Financial Supervision Authority's Journal of Laws 2011, No. 11, item 42 as at 23 November 2011).

Internal capital is the amount of capital estimated by the Group that is necessary to cover all of the significant risks characteristic of the Group's activities and the effect of changes in the business environment, taking account of the anticipated risk level.

The internal capital in the PKO Bank Polski SA Group is intended to cover each of the significant risk types:

- credit risk (including default and concentration risk),
- currency risk,
- interest rate risk,
- liquidity risk,
- operational risk,
- business risk (including strategy risk).

The Bank regularly monitors the significance of the individual risk types relating to the activities of the Bank and other Group's subsidiaries.

The internal capital for covering the individual risk types is determined using the methods specified in the internal regulations. In the event of performing internal capital estimates based on statistical models, the annual forecast horizon is adopted and a 99.9% confidence level.

The total internal capital of each entity of the Group is the sum of internal capital amount necessary to cover all of the significant risks for the entity.

The total internal capital of the Group is the sum of internal capital amount of the Bank and all Group's entities.

The correlation coefficient for different types of risk and different Group's entities used in the internal capital calculation is equal to 1.

In 2011, the relation of the Group's own funds to its internal capital remained on a level exceeding both the threshold set by the law and the Group's internal limits.

66.4. Disclosures (Pillar 3)

In accordance with § 6 of the Resolution No. 385/2008 of the Polish Financial Supervision Authority dated 17 December 2008, on the detailed principles and methods for banks to disclose qualitative and quantitative information concerning capital adequacy and the scope of the information to be announced (Polish Financial Supervision Authority's Journal of Laws 2008, No. 8, item 39 with subsequent amendments), the PKO Bank Polski SA, which is the parent company within the meaning of §3 of the resolution, publishes information about capital adequacy in a separate document on an annual basis, not later than within 30 days of the date of authorisation of the annual financial statements by the Ordinary General Shareholders' Meeting.

* As at 31 December 2010 PKO Bank Polski SA calculates internal capital in accordance with the Resolution No. 383/2008 of the Financial Supervision Authority dated 17 December 2008 (Financial Supervision Authority's Journal of Laws 2008, No. 8, item 37).

Details of the scope of capital adequacy information disclosed, the method of its verification and publication are presented in the PKO Bank Polski SA Capital Adequacy Information Policies, which are available on the Bank's website (www.pkobp.pl).

INFORMATION ON THE ENTITY AUTHORISED TO AUDIT FINANCIAL STATEMENTS AND EVENTS AFTER THE REPORTING PERIOD

67. Information on the entity authorised to audit financial statements

Entity authorised to audit financial statements with which PKO Bank Polski SA concluded an agreement is PricewaterhouseCoopers Sp. z o.o. The agreement concerns auditing the financial statements of PKO Bank Polski SA as well as auditing the consolidated financial statements of the PKO Bank Polski SA Group. The above agreement was concluded on 14 April 2011.

Total net remuneration of PricewaterhouseCoopers Sp. z o.o. for the audit of the separate financial statements and consolidated financial statements of PKO Bank Polski SA in 2011 amounted to PLN 1 140 thousand (2010: PLN 1 140 thousand), total net remuneration of PricewaterhouseCoopers Sp. z o.o. for the certifying services, including the review of the financial statements amounted in 2011 to PLN 1 910 thousand (2010: PLN 560 thousand).

Total net remuneration of PricewaterhouseCoopers Sp. z o.o. related to rendering PKO Bank Polski SA other services in 2011 amounted to PLN 2 031 thousand (2010: PLN 1 066 thousand).

68. Events after the reporting period

On 9 January 2012, in the Qualia Development Sp. z o.o. Group new companies agreements were concluded: Qualia Spółka z ograniczoną odpowiedzialnością - Władysławowo Spółka Komandytowa, Qualia Spółka z ograniczoną odpowiedzialnością - Zakopane Spółka Komandytowa, Qualia Spółka z ograniczoną odpowiedzialnością - Jurata Spółka Komandytowa. These companies were established for the purpose of realisation of investment projects. Ongoing registration of above-mentioned companies with the National Court Register.

On 16 January 2012, PKO Bank Polski SA was registered with the State Ukrainian Register of Businesses as the sole shareholder of 'Inter-Risk Ukraina' Additional Liability Company with its seat in Kiev (the additional liability means that the shareholder is responsible for the company's liabilities up to 103% of its share). PKO Bank Polski SA acquired 1 share constituting 100% of the Company's share capital which entitles it to 100% of votes at the shareholders' meeting. The acquisition price was PLN 2 500 thousand. On 30 January 2012, the Bank made a capital contribution of the above-mentioned Company of UAH 43 million (PLN 17 212.9 thousand). The main purpose of acquiring and subsequently the operation of the Company is to use it to perform effective debt collection of the impaired loans portfolio of KREDOBANK SA and the impaired loans portfolio purchased by Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o.

On 27 January 2012, Qualia Development Sp. z o.o. made an additional payment to the company Qualia Residence Sp. z o.o. amounted to PLN 13 000 thousand.

On 31 January 2012 was signed a sales agreement of a Holiday and Recreation Center 'Daglezja' in Zakopane by the Bank with the company Qualia Residence Sp. z o.o.

On 31 January 2012, the increase in the share capital of Bankowy Leasing Sp. z o.o. in the total amount of PLN 9 500 thousand was registered with the National Court Register. All the shares were taken up by Bankowy Fundusz Leasingowy SA - the Bank's subsidiary- for the price equal to the nominal value of the shares taken up.

In January and February 2012, PKO Bank Polski SA made a capital contribution to Qualia Development Sp. z o.o. totalling PLN 35 319 thousand.

In 2012 during the period to the publication of the report the Bank conducted activities connected with the liquidation of Centrum Finansowe Puławska Sp. z o.o. On 1 March 2012, in order to take over its assets, including property, in which is the Bank's Head Office registered office is located.

In February 2012, PKO Bank Polski SA carried out a transaction consisting of selling 2% interest in Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o. to 'Inter-Risk Ukraina' Spółka z dodatkową odpowiedzialnością. The above-mentioned transaction was carried out as part of the process of transforming Finansowa Kompania 'Prywatne Inwestycje' Sp. z o.o. into a subsidiary of 'Inter-Risk Ukraina' Spółka z dodatkową odpowiedzialnością.

On 10 February 2012, the Bank carried out an issue of own bonds based on the Scheme for issuing bonds for the domestic market. The nominal value of the bonds issued as part of the Issue is PLN 1,500,000 thousand. The nominal value of one bond is PLN 100 thousand. The bonds issued as part of the Issue are bearer zero-coupon discount bonds. The redemption of the bonds issued as part of the Issue will be performed at their nominal value.
