\* Result on business activities defined as operating profit before administrative expenses and net impairment allowance.

In the 1st quarter of 2011, the situation in the banking sector in Poland improved. The situation on the deposits and loans market was influenced by the further stable growth in sales of housing loans, improvement on the corporate loans market and limited activity in consumer loans, as well as faster growth in deposits than in the prior year.

In this period, PKO Bank Polski SA continued its measures to maintain its strong deposit and equity base – these measures constitute a basis for a stable development of business activities, while the priorities relating to business effectiveness and effective cost control being maintained.

The net profit of the PKO Bank Polski SA Group generated in the 1st quarter of this year amounted to PLN 871.0 million, which represents an increase of PLN 151.0 million (+21.0%) compared with the corresponding period of the previous year. The profit generated was determined by:

- ⇒ the high level of the result on business activities of the PKO Bank Polski SA Group – PLN 2 580.9 million, mainly due to the increase in net interest income by PLN 245.0 million compared with the corresponding period of the previous year (mainly due to interest income increase by PLN 241.2 million),
- ⇒ increase in administrative expenses by PLN 39.9 million y/y along with the dynamic growth of net result of business activities assured the decrease of C/I ratio y/y to 40.8%,
- ⇒ the stable level of net impairment allowance,
- ⇒ increase in the PKO Bank Polski SA Group's total assets by PLN 16.0 billion y/y to the level of PLN 172.7 billion resulting from an intensive growth of the sales of loans (portfolio of loans and advances to customers has increased by PLN 14.5 billion y/y) financed by the increase in amounts due to customers as well as the issue of Eurobonds,
- ⇒ the effective structure of the statement of financial position – an increase in the deposits of the PKO Bank Polski SA Group of PLN 12.6 billion y/y and Eurobonds issue allowed business activities to increase dynamically. The loan to deposit ratio amounted to 97.7% as at the end of the 1st quarter of 2011, and considering the long-term financing 91.7%.

## 2. External environment

### Macroeconomic environment

In the 1st quarter of 2011:

- compared with the 2nd half of 2010, a slight slowing was noted in the national economy, which was accompanied by a slightly slower growth in foreign demand and export production, lower dynamics of private consumption (following the accumulation of purchases in view of the taxation changes expected as of the beginning of 2011) and considerably smaller scale of re-building stocks by enterprises. At the beginning of 2011, investment dynamics should be stimulated by an increase in GDP which is considerably reinforced by the effect of the very low prior year statistical reference base in the construction sector (resulting from unfavourable weather conditions),
- the average annual growth of wages and salaries in the corporate sector amounted to 4.1% p.a., the increase in old-age and disability pensions reached 6.0% p.a.; the annual dynamics of employment in enterprises gradually increased to 4.1% in March; in March the registered unemployment increased to 13.1% from 12.3% in December 2010,
- inflation measured with CPI increased to 4.3% y/y in March 2011, compared with 3.1% y/y in December 2010, mainly as a result of an increase in VAT rates at the beginning of the year and a significant acceleration of growth in the annual rate of food prices which reflected the trends on global markets.
- in January the Monetary Policy Council (RPP - *Rada Polityki Pieniężnej*) increased interest rates by 25 b.p. in conditions of a considerable increase in inflation and stabilizing of the national economy.

### Situation on the financial market

In the 1st quarter, the yield curve of Polish Treasury Securities (SPW) slightly levelled out, while the profitability of bonds in all maturity segments increased. The difference between the profitability of 10-year and 2-year bonds dropped from 133 b.p. to 123 b.p. The increased return on SPW stemmed from anticipated tightening of the domestic monetary policy by RPP. The increase in profitability at the longer end of the yield curve followed from a clear increase in profitability on the base markets, which in turn was due to the correction of expectations relating to the US monetary policy (lower expectations of consecutive financial assets purchase plans) and the already smaller scale of foreign capital inflow to the domestic Treasury Bonds market compared with the last months of 2010. The limited supply of Treasury Bonds significantly limited the growth in returns on Treasury Bonds.

In the 1st quarter of 2011, rates on the interbank market increased due to RPP's tightening of the monetary policy. 1-12 month WIBOR rates went up by ca. 20-25 b.p. Shorter term rates, including the POLONIA rate, increased much more. Average monthly POLONIA rate in March was only ca. 20 b.p. below the NBP reference rate, compared with nearly 70 b.p. in December 2010. This situation resulted from NBP's policy of increasing issues of NBP bills with maturities shorter than 7 days in order to draw the POLONIA market rate closer to the NBP reference rate.

In the first weeks of the year, a strengthening of the Polish zloty was noted due to the market's increased anticipation of increased NBP interest rate growth. During the rest of the 1st quarter of 2011, Polish zloty weakened in respect of the euro reflecting the increased global risk aversion due to the escalation of the social and political conflict in the Middle East as well as uncertainty as to the implications of the natural disaster in Japan. At the same time, the zloty strengthened against the US dollar, in consequence of a stable drop in the rate of the US dollar to the euro due to the anticipated tightening of the monetary policy by the European Central Bank. At the end of the 1st quarter of 2011, the zloty went down by 1.3% compared with the euro and went up by 4.8% compared with the US dollar, and the exchange rates amounted to 4.01 PLN/EUR and 2.82 PLN/USD.

### Situation on the stock exchange

In the 1st quarter of 2011 the conditions on the basic market of the Warsaw Stock Exchange (GPW) remained under the influence of the situation on foreign securities exchanges, investors' evaluation of the economic situation in Poland, and the financial standing of listed companies. This resulted in a slightly fluctuating upward trend on the stock market. WIG went up by 2.6%, whereas German DAX30 went up by 1.8%, and American S&P500 Comp. and Nasdaq Comp. went up by 5.4% and 4.8%, respectively. In the 1st quarter of 2011, the annual rates of return on the main GPW indices also increased at single digit rates, lower than the growth rates in the 4th quarter of 2010. The small companies index, sWIG80 (+4.2% q/q), as well as the medium-size companies index mWIG40 (+3.8 q/q) and the largest companies index WIG20 (+2.7 q/q) grew faster than WIG. The WIG Banki index grew slower than the main WIG index (+2.5% q/q). At the end of the 1st quarter of 2011, WIG reached the level of 48 730 pts, and WIG Banki 7 092 pts. At the end of the 1st quarter of 2011, 402 companies were listed on the basic GPW market, including 29 foreign companies (compared with 400 and 27 at the end of 2010).

The good situation on the stock exchange and the increased number of companies listed on the main market resulted in the increased capitalization of the companies listed on the main GPW market, which increased by 7.3% in the 1st quarter of 2011 (compared with a drop of 0.9% in the prior quarter) to PLN 847 billion.

The conditions on GPW had impact on the situation on the banking and non-banking financial market, including an increase in capitalization of banks listed on GPW, an increase in the value of investment fund and pension fund assets compared with the end of the 4th quarter of 2010, changes in the structure of savings (including: a slight decrease in the proportion of stocks, stabilization in the proportion of investment funds, and an increase in the proportion of bank deposits in savings).

### Situation in the Polish banking sector

During the first two months of 2011, the situation in the banking sector further improved. At the end of February 2011, the result of the banking sector amounted to PLN 2 billion and was 33.5% higher than in the same period in the prior year. Banks recorded a drop of over 30% in net impairment allowance and an increase of more than 13% in net interest income.

Non-performing loans increased at a slower pace than in the prior year, and at the end of February the increase amounted to ca. 22% y/y compared with 36% y/y at the end of February 2010. The increase was mainly related to the household sector and resulted from the ever deteriorating quality of the consumer loan portfolio. In turn, the value of non-performing corporate loans dropped. At the end of February 2011, the ratio of non-performing loans to total loans amounted to 8.9%.

The stable increase in housing loans, improved situation on the corporate loans market, limited activity in granting consumer loans, and faster growth in deposits than in the prior year had an impact on the deposit and the loan market. Changes in the volume of PLN loans and deposits were still to a large extent affected by the changes in exchange rates, including the appreciation of PLN in the 1st quarter of 2011 which reduced the value of foreign currency loans and deposits.

After the adjustment for foreign exchange fluctuations, the increase in the loan portfolio at the end of first quarter of current year was decidedly higher than a year ago. Total loans increased by PLN 13.8 billion compared with PLN 2.2 billion in the corresponding period of prior year and their growth amounted to 8.7% y/y.

The improved situation on the corporate loans market had a significant impact on the increase in loans. The value of those loans increased by ca. PLN 6.3 billion (after the exchange rate adjustment) compared with a decrease of PLN 1.2 billion recorded in the prior year. Almost the whole increase was related to

loans granted to small and medium-sized enterprises, whereas the segment of loans to large enterprises stagnated. According to the NBP survey, banks continued to gradually ease the criteria for granting loans, but the low demand for loans from enterprises, which relied on their own funds or used alternative forms of financing, was a barrier to further growth.

Systematic and stable growth was recorded in housing loans, which was due to less stringent lending policies applied by banks as a result of increasing competition on the housing loans market, and proposed changes to the "Rodzina na swoim" Programme. The value of the housing loan portfolio increased by ca. PLN 5.7 billion (after the adjustment for the exchange rates) compared with ca. PLN 5.6 billion in the same period of 2010.

Banks continued to narrow their lending activities in respect of consumer loans. Their value decreased by over PLN 2.4 billion, and the growth rate dropped to -1.2% y/y compared with ca. 11% y/y in the corresponding period of 2010. Banks maintained stringent criteria and conditions for granting loans due to the deteriorating quality of the loan portfolio.

At the end of the 1st quarter of 2011, the total increase in deposits was higher than in the prior year. The value of deposits went up by ca. PLN 28 billion (after the adjustment for the exchange rates) compared with PLN 10.8 billion in the same period of the prior year, i.e. they increased by 11.7% compared with the 10% in the prior year. Nevertheless, more than 60% of the increase in deposits resulted from one-off events. In March 2011, as a result of transfers relating to the end of the call of the Spanish Santander Bank for the shares of BZ WBK, deposits of non-monetary financial institutions increased by ca. PLN 18 billion, i.e. by 66% y/y. The growth rate in other deposits was lower than in the same period of the prior year. Deposits placed by individuals increased by ca. 10.4% compared with 11.4%, and deposits of central and local authorities increased by 3.3% compared with 9.8% in the prior year. Corporate deposits went down by over PLN 12 billion.

### **Regulatory factors**

The following new regulatory solutions influenced the financial and organizational situation of the PKO Bank Polski SA Group in the 1st quarter of 2011:

- Resolution of the Monetary Policy Council No. 9/2010 of 27 October 2010 (*Journal of Laws of NBP* No. 15, item 16) which increased the mandatory reserve rate for banks to 3.5% as of 31 Dec 2010,
- Resolution of the Monetary Policy Council No. 1/2011 of 19 January 2011 (*JoL of NBP* No. 1, item 1) which as of 20 January 2011 increased the reference rate to 3.75%, the interest rate on refinanced loans backed with securities to 5.25%, the interest rate on term deposits accepted from banks by the National Bank of Poland to 2.25%, and the re-discount rate for bills of exchange accepted from banks for rediscounting by the National Bank of Poland to 4.0%,
- Resolution of the Council of the Bank Guarantee Fund of 17 November 2010 which more than doubled the percentage rate used to calculate the mandatory annual contribution of banks to the Bank Guarantee Fund for 2011,
- Resolution of the Polish Financial Supervision Authority (PFSA) No. 367/2010 of 12 October 2010 (*JoL of PFSA* No. 8, item 36) and No. 434/2010 of 20 December 2010 (*JoL of PFSA* No. 1 of 2011, item 36) implementing, as of 31 December 2010, changes in respect of the items comprising banks' basic and supplementary funds,
- Resolution No. 369/2010 of the PFSA of 12 October 2010 (*JoL of PFSA* No. 8, item 38) implementing, as of 31 December 2010, changes in respect of determining capital requirements for specific risk types,
- Resolution No. 52/2010 of the PFSA of 23 February 2010 (*JoL of PFSA* No. 2, item 12) which required banks to comply, as of 23 December 2010, with all rules of Recommendation T in respect of retail loan exposure risk management,
- amendments to the Act on mortgage registers and mortgages of 26 June 2009 (*JoL* of 2009 No. 131, item 1075) which, inter alia, cancelled the distinction between ordinary mortgage and capped mortgage (effective as of 20 February 2011),
- amendments to the Act on the tax on goods and services (VAT) and the Act on road transport of 16 December 2010 (*JoL* No. 247, item 1652) which implemented, in the period from 1 January 2011 to 31 December 2012, limitations in respect of deductibility of output VAT assessed on the lease of passenger cars with truck homologation,
- Decree of the Minister of Finance of 23 December 2010 (*JoL* No. 244, item 1692) extending the list of titles comprising public debt by, inter alia, loans and borrowings and lease agreements.

The position of the PKO Bank Polski SA Group was also influenced by regulatory solutions which would come into effect after the *vacatio legis* period, such as Resolution No. 18/2011 of the PFSA of 25 January 2011 (*JoL of PFSA No. 3, item 6*) which requires banks to comply, as of 25 July 2011, with Recommendation S on good practices in respect of mortgage-backed loan exposures, and the planned limitations to the "Rodzina na swoim" Programme, as well as changes in the assessment of tax on income from investments.

### Ukrainian market

The operation and results of the PKO Bank Polski SA Group in the 1st quarter of 2011 were affected by macroeconomic factors in the Ukraine, where the subsidiary of PKO Bank Polski SA – KREDOBANK SA operates. These factors included:

- the information of the International Monetary Fund (IMF) published in mid-February referring to the economic situation in the Ukraine, which was an element of regular monitoring of countries which use financial aid from IMF under the Stand-by-Arrangement (SBA) Programme. According to the IMF information, financial aid to the Ukraine will be continued in line with the scale of loans granted in August 2010, although certain delays in payments of specific tranches are not to be ruled out in the nearest months. Due to the relatively stable financial situation in the Ukraine in the short term, these shifts are not significant to the perspectives of its economic and financial stability,
- continuation of economic growth after the strong recession in 2009, in the climate of global economic recovery and growth in foreign demand; however, the pace of growth remained at a very low level due to the very slight increase in private consumption and investments due to the extremely difficult internal position of the Ukrainian economy,
- continuing improvement in Ukraine's external stability, and on the other hand, an increasing risk of its deterioration in the upcoming quarters due to growing import demand, increased oil prices, and only limited inflow of foreign capital,
- a slight drop in the exchange rate of Ukrainian hryvnia (UAH): the official exchange rate of the National Bank of Ukraine amounted to ca. 7.95 UAH/USD during the quarter, compared with 7.90 UAH/USD at the end of 2010,
- stabilization of the situation in the banking sector due to capital infusion to banks, the NBU supplying additional liquidity and improvement of economic conditions; at the same time the situation in the sector is still described as very difficult, due to low returns, high share of non-performing loans, and low quality of bank assets,
- continued decrease in Ukraine's credit risk in the light of the improving situation on global markets and good internal financial perspectives, with continued financial assistance from the IMF programme.

According to the data of the National Bank of Ukraine, as at the end of the 1st quarter 2011, 176 banks operated in the country. The share of foreign capital in the total capital of the Ukrainian banking sector increased to 41.6%. In the 1st quarter of 2011, the banking sector's assets increased by ca. 13% y/y, which was the effect of an upturn on the loan market. The increase in loans during the 1st quarter amounted to UAH 19 billion, compared with a decrease of UAH 22 billion in the 1st quarter of 2010, and the growth rate was 7% y/y. The total increase in loans was due to an increase in the volume of corporate loans (+15% y/y, compared with 4% in the prior year), accompanied by a downward trend in loans for households noted as of March 2009. The scale of the drop in the volume of loans granted to households was lower than in the previous quarters (-9.5% y/y). The share of foreign currency loans in total loans decreased and amounted to ca. 45%. The increase in deposits in the 1st quarter of 2011 was

stronger than the increase in loans and amounted to ca. UAH 32 billion (an increase of 27% y/y), which supposedly follows from an increase in confidence in the banking sector. Household savings increased by ca. 31%, and corporate deposits by 33% compared with the same period of the prior year.

In the 1st quarter of 2011, equity of the banking sector increased by 3.5% y/y, which resulted from capital injection to the banks and regulatory solutions implemented which allowed increasing the basic funds by 100% of subordinated loans obtained.

Despite the stabilization in growth of non-performing loans in the 1st quarter of 2011, the low quality of the loan portfolio is still a challenge for the Ukrainian banking sector. A further increase in non-performing loans and provisions set up was noted. According to the National Bank of Ukraine, as of the beginning of the year, the value of non-performing loans increased by ca. 19.2%.

In the 1st quarter of 2011, the banking sector incurred a loss, and return on assets and capital was still negative – ROE amounted to -0.6% and ROA to -0.1%.

In the income statement of the PKO Bank Polski SA Group for the 1st quarter of 2011, the sum of revenue positions amounted to PLN 2 580.9 million and was PLN 234.4 million, i.e. 10.0%, higher than in the corresponding period of 2010.

### Net interest income

In the 1st quarter of 2011, net interest income was PLN 245.0 million higher than in the corresponding period in prior year, mainly due to interest income growth by PLN 241.2 million.

In the 1st quarter of 2011, interest income amounted to PLN 2 720.4 million and in comparison with the corresponding period of 2010 was higher by 9.7%, mainly as a result of an increase in:

- revenue in respect of loans and advances to customers (+)10.8% y/y – the effect of high growth in the loan portfolio (+12.3% y/y) as well as of interest rates growth,
- revenue in respect of hedging instruments (+)10.5% y/y, of which among others the growth of CIRS transaction volume,

The rate of growth in interest expense amounted to (-)0.4% y/y, mainly in effect of a drop in the costs of amounts due to customers (-1.7% y/y) as well as other costs, partly offset by an increase in the cost of issuing own debt securities.

Interest margin rose by 0.4 pp. y/y to the level of 4.4% in the 1st quarter of 2011, as a result of an increase in net interest income of 16.6% y/y, accompanied by increase in average level of interest-earning assets by 13.6% y/y.

### Net fee and commission income

In the 1st quarter of 2011, net fee and commission income was PLN 11.8 million higher than in the corresponding period of prior year, mainly due to commission expense decrease by PLN 20.5 million.

Net fee and commission income increased by 1.6% y/y as a result of:

- a decrease in costs of payment cards (-14.1% y/y), loan insurance costs (-9.0% y/y) and other commission costs (-11.2% y/y), inter alia, costs of fees paid by Dom Maklerski (Brokerage House) to GPW and KDPW (National Securities Depository),

along with

- an increase in commission income in respect of loans and advances granted (+21.7% y/y),
- an increase in commission income in respect of the servicing of investment and pension funds (+14.9% y/y);

The total drop of fee and commission income by PLN 8.7 million y/y was mainly determined by the decrease of loan insurance income.

### **Administrative expenses**

In the 1st quarter of 2011 administrative expenses increased by PLN 39.9 million as compared to the corresponding period in prior year (+3.9 y/y). They were mainly determined by:

- an increase in costs of contributions and payments to the Bank Guarantee Fund of PLN 20.8 m (+2.6x y/y) – the effect of an increase in the rate of the annual fee contributed to the BGF,
- an increase in staff costs by PLN 13.3 million (+2.3% y/y), affected mainly by increase in wages and salaries expenses by PLN 12.7 million (+2.7% y/y),
- an increase in depreciation expenses by PLN 5.5 million (+4.6% y/y),
- an increase in overheads by PLN 0.9 million (+0.3% y/y).

A slight increase of administrative expenses, accompanied by the substantial growth of the PKO Bank Polski SA Group's income by 10.0% y/y, resulted in maintaining high operating efficiency of the PKO Bank Polski SA Group, measured via the C/I ratio, which as at the end of 1st quarter of 2011 amounted to 40.8% (-2.4 pp. y/y).

### **Net impairment allowance and write-downs**

Net impairment allowance and write-downs is an effect of maintaining a conservative approach of PKO Bank Polski SA to recognition and measurement of credit risk and the growth of credit base. An increase in net impairment allowance in the 1st quarter of 2011 compared with the corresponding period of the prior year (+3.1% y/y), mainly as a result of an increase in net impairment allowance and write-downs on the housing loans portfolio.

The share of loans for which an individual objective evidence of impairment was identified and the share of impaired loans decreased respectively by (-)0.4 pp. y/y (to the level of 7.9% at the end of the 1st quarter of 2011) and by (-)0.2 pp. y/y (to the level of 7.5% at the end of the 1st quarter of 2011) as a result of consistent use of stricter credit quality assessment criteria by the Bank as well as the change in the classification of objective evidence of impairment in 2011<sup>1</sup>.

---

<sup>1</sup> In the 1st quarter of 2011, the rules for classifying the objective evidence of impairment of loan exposures were modified, the main result of which was that 'deterioration in the client's financial standing during the loan term' ceased to be included in the catalogue of individual objective evidence of impairment as regards clients who used to be classified to this group and who are a subject of low probability of default.

The statement of financial position of the parent company has the biggest influence on the statement of financial position of the PKO Bank Polski SA Group. It determines the structure of the statement of financial position as well as both total assets and total liabilities.

The total assets of PKO Bank Polski SA Group amounted as at the end of 1st quarter of 2011 to PLN 172.7 billion, which means increase of 1.8% compared to the end of 2010. As a result, the PKO Bank Polski SA Group maintained the position of the largest financial institution in the Polish banking sector.

The increase in assets of the PKO Bank Polski SA Group in the 1st quarter of 2011 was mainly due to an increase in the volume of loans and advances granted to customers of 1.3% compared with the end of 2010 as well as an increase in the volume of trading assets (2,2x compared with the end of 2010). The increase in total assets was financed mainly by an increase in amounts due to customers (+1.9% compared with the end of 2010).

### Loans and advances to customers

In the break-down of the gross loan portfolio by type, the main items are housing loans and borrowings of PLN 62.9 billion (+0.7% compared with the end of 2010), the share of which in the structure of the gross loan portfolio went down by 0.4 pp. compared with the end of 2010. The largest increase in the volume compared with the end of 2010 (+3.9%) was recorded in corporate loans and borrowings whose share in the portfolio increased by 0.8 pp.

### Amounts due to customers

In the structure of amounts due to customers by types, the main item were amounts due to retail clients of PLN 97.3 billion (+2.4% compared with the end of 2010) whose share in the portfolio structure compared to the end of 2010 increased by 0.3 pp. along with a decrease in amounts due to companies by 0.4 pp.

### Equity and capital adequacy ratio

Equity increased by 3.3% compared with the end of 2010 and at the end of 1st quarter of 2011 accounted for 12.8% of total liabilities and equity of the PKO Bank Polski SA Group (the increase in share by 0.2 pp. as compared with the end of 2010).

The capital adequacy ratio of the PKO Bank Polski SA Group amounted to 13.38% as at the end of 1st quarter of 2011. Despite the drop of 0.9 pp. compared with the end of 2010, the level significantly exceeds the minimum level for the ratio required by the Banking Law. Capital adequacy measured with the capital adequacy ratio remained at a safe level with simultaneous dynamic growth of the loan portfolio.

In the 1st quarter of 2011, efficiency ratios improved: the return on assets (ROA) and the return on equity (ROE), by 0.3 pp. and 0.8 pp. respectively. The increase was due to a high growth rate of the annualized net profit (+35.5% y/y) combined with an increase in average assets of 12.2% y/y and in average equity of 28.5% y/y.

### 3.3. Business development<sup>2</sup>

#### 3.3.1. Market shares of PKO Bank Polski SA

In the 1st quarter of 2011, the Bank stabilized its lead position in the banking sector in respect of its share of the loan market. In relation to the end of 2010, the largest increase was noted in loans to individuals, including consumer and other loans (+0.2 pp.) and loans to institutions (+0.1 pp.).

The share of deposits went down by 0.4 pp. compared with the end of 2010, which resulted mainly from a decrease in the amounts due to institutions (a one-off event in March 2011 had an impact on this drop – as a result of the cash flows related to the end of the call of Spanish Santander Bank for shares of BZ WBK, the market of non-monetary deposits of financial institutions increased by ca. PLN 18 billion).

efficiency. PKO Bank Polski SA as a leader of Polish retail banking builds its market position on understanding the needs of customers with whom it wants to build long-term relationships. Therefore in the 1st quarter of 2011 new packages of personal accounts, which have been prepared on the basis of customer preferences, were introduced to the Bank's offer – based on behavioral segmentation. The new offer as well as improving the quality of services is to contribute to lasting change in the Bank's image. PKO Bank Polski SA is a current (ROR) accounts market leader, and new packages will be used in acquisition of new customers. In the 1st quarter of 2011 five new products dedicated to various group of customers were introduced: PKO Konto za Zero, PKO Konto Pierwsze, PKO Konto dla Młodych, PKO Konto Pogodne as well as Superkonto Oszczędne.

As at 31 March 2011, the total value of deposits of the retail segment of PKO Bank Polski SA amounted to PLN 105.9 billion. Since the beginning of the year, the volume has increased by PLN 1.5 billion (i.e. by 1.4%) as a result of an increase in retail and private banking deposit volumes (+3.1% since the beginning of the year), mainly due to the dynamic increase in volume of current account.

<b>Solidny Złoty EUR/PLN</b>	The 2-year and 3-year structured deposit based on the EUR/PLN exchange rate is an investment product with full protection of the principal amount and possibility of obtaining higher yields than on a standard term deposit. The minimum payment is PLN 2 000. Profit on the investment is subject to the tax on capital gains.
<b>Pakiet Biznes Waluta</b>	The package is a tool for attracting dynamically developing SMEs which carry out regular foreign transactions (export, import, foreign exchange). The basis of the package is an internet transactional platform <i>iPKO dealer</i> . The launch of "Pakiet Biznes Waluta" was aimed at attracting new clients on the market who perform foreign exchange transactions and at increasing the competitiveness of the offer of PKO Bank Polski SA for SMEs.
<b>Mortgage loan</b>	In order to support sales, two loans were promoted: a mortgage loan called 'WŁASNY KĄT hipoteczny' and a preferential housing loan with interest subsidized by BGK. Moreover, a special offer was launched for clients who purchase real property as part of investments realized by selected developers (comprising a list of ca. 116 developers) and for employees of selected corporations (comprising 4 firms), as well as a special offer for clients of industry fairs – in respect of ca. 30 fairs organized. A special offer was also prepared for a selected group of clients of PKO BP who have not yet drawn any housing loans.
<b>Credit cards</b>	In the 1st quarter of 2011 PKO BP SA's credit card offer was reorganized in a comprehensive manner, which involved a new tariff of fees and commissions, and: 1) expanding the insurance offer for credit cards, 2) introducing a new functionality ( <i>instalment</i> ) for PKO Bank Polski SA's credit cards which allows splitting non-cash credit card transactions into instalments, 3) introducing a new, attractive design for credit cards issued with the Visa logo from the so-called gallery (production of cards using the photo technology), 4) possibility of obtaining a credit card without the first annual fee for the card on condition that the user opens a ROR account under the new offer, applies for the card and orders transferring his/her salary (or pension) to the ROR account.
<b>INTELIGO</b>	Under the Inteligo account a debit card <i>MasterCard PayPass</i> in the EMV standard was launched which enabled making payments using the <i>PayPass</i> contactless technology. The card is offered both in the segment of individual clients (from February 2011) and in the SME segment (since March 2011).

### 3.3.2.3 Activities taken by PKO Bank Polski SA towards KREDOBANK SA

In the 1st quarter of 2011, the Management Board of PKO Bank Polski SA undertook a series of measures which directly contributed to securing the operations of KREDOBANK SA and strengthening corporate supervision over its investment in Ukraine.

#### **Enhancing the safety of KREDOBANK SA operations**

On 28 March 2011, on the basis of an agreement, PKO Bank Polski SA rolled over partly a loan facility of USD 50 million to KREDOBANK SA. The loan facility was granted until 28 March 2014 on arm's length.

### **Investment Policy towards KREDOBANK SA**

The investment policy adopted by PKO Bank Polski SA in 2009 for KREDOBANK SA assumed that the operations of KREDOBANK SA would be restructured in the period 2010-2011. In the 1st quarter of 2011, the activities focused on the following areas:

- debt collection and restructuring activities in respect of the loan portfolio of KREDOBANK SA,
- cost control, procurement optimization and investments in tangible fixed assets optimization of KREDOBANK SA – in this manner cost restructuring, in areas of staff and rent costs, is being continued,
- optimizing the network of KREDOBANK SA outlets, which consists in closing down unprofitable outlets – in the 1st quarter of 2011 one branch was closed down,
- a further strengthening of supervision over KREDOBANK SA:
  - ✓ extending the composition of the Supervisory Board of KREDOBANK SA;
  - ✓ introducing at 17 January 2011 4th Polish representative to the Management Board of KREDOBANK SA, to oversee the areas of corporate and retail business – Mr Marcin Kuksinowicz,

Moreover, PKO Bank Polski SA, as part of the intensified supervision over its investment:

- ✓ conducted detailed monitoring of the financial and economic situation of KREDOBANK SA,
- ✓ continued cooperation in the area of implementing procedures at KREDOBANK SA that are similar to those applicable at PKO Bank Polski SA, including the development of amendments to already binding regulations,
- ✓ organized experience-sharing trips by its employees to KREDOBANK SA and traineeships for KREDOBANK SA's employees at PKO Bank Polski SA.

These above mentioned activities are intended to ensure a sustainable basis for the rebuilding of the value of the shareholding of PKO Bank Polski SA in KREDOBANK SA.

### **3.3.3. Corporate segment**

#### **3.3.3.1. Activities of PKO Bank Polski SA in the corporate segment**

The 1st quarter of 2011 was a period of balanced growth for corporate banking operations of PKO Bank Polski SA. During this period, operations in this segment focused on maintaining the high market position achieved at the end of 2010.

The sales activities in the corporate segment over the last three quarters of the prior year showed stable growth in the volume of newly granted loans to corporate clients. The active sales policy in respect of financing Polish undertakings over 2010 and the 1st quarter of 2011 enabled PKO Bank Polski SA to continuously increase its market share in the shrinking market, and as a result to maintain its lead position. The first three months of 2011 showed the effects of gradual revival on the corporate loans market. In the 1st quarter of 2011 sales dynamics (q/q) of new corporate loans granted by PKO Bank Polski SA was once again above the market level. At the end of March 2011, the Bank's share in financing institutions amounted to 10.9% (according to NBP data). Currently, the barrier to the growth of lending activities (which in the prior period consisted primarily of constant business uncertainty, which discouraged many companies from investing) is disappearing. In PKO Bank Polski SA, the 1st quarter of 2011 brought visible upturn in sales of corporate loans (an increase in new sales of 26% compared with the same period of the prior year). Acceleration of the Bank's lending activities is particularly important in respect of corporate investment loans. The volume of corporate loans granted for investment purposes in the 1st quarter of 2011 amounted to 38% of such loans granted in the entire 2010.

PKO Bank Polski SA is developing transactional banking operations by expanding and improving internal operational applications. In the 1st quarter of 2011 operational processes for transactional products were further modernized. The Bank started automating its processes for transferring orders between corporate

centres and back-office units which participate in handling the products. In the 1st quarter of 2011, the first stage of establishing a new type of night deposit chutes which enable corporate clients on-line recording of payments was also completed. At the same time, the Bank is developing and improving its internet banking system. In the 1st quarter of 2011 several functionalities were implemented to improve the safety of iPKO Biznes. In the first three months of 2011, the number of payroll accounts sold by the corporate banking segment continued to increase dynamically. After a very high increase in the second half of 2010, in the 1st quarter of 2011 the number of such accounts increased by another 8%. Revenue on this product increased by 111% y/y.

Additionally, PKO Bank Polski SA is strengthening relations with corporate customers by launching its first marketing action aimed at building and maintaining positive contacts and cooperation between the bank and its clients. As at the end of March 2011, the loyalty programme covered 451 corporate customers.

PKO Bank Polski SA cooperates with budget customers which include primarily local government units. PKO Bank Polski SA actively engages in financing innovative investment projects (infrastructural projects in respect of waste management, healthcare, sports and recreation, water and sewerage systems).

The number of branches in the corporate segment decreased by 1 corporate centre in the comparison to the end of 2010.

### 3.3.4. Investment segment

#### 3.3.4.1. Activities of PKO Bank Polski SA in the investment segment

During the 1st quarter of 2011, one of the main factors which determined changes in interest rates in Poland and on other markets was the increasing inflation pressure. The increase in inflation resulted from the constant growth in the prices of raw materials (primarily oil and food) and one-off increases in indirect taxes. Inflation ratios in the Euro zone, in the United Kingdom and in Poland reached levels considerably exceeding the inflation targets of central banks.

The concerns about the state of public finances of the peripheral countries of the Euro zone receded into the background. The financial market was also affected by developments in North Africa and the earthquake in Japan in mid-March. These events had a limited impact on the interest rate market, although they resulted in rapid drops in indices on global securities exchanges (including GPW S.A.).

The European Central Bank clearly tightened its approach to monetary policy, and hinted that an increase in interest rates is likely in April. In this period the Monetary Policy Council decided to increase interest rates once, by 25 b.p. (on 19 January 2011), emphasising that the cycle of tightening monetary policy has started and would be continued throughout 2011.

In the 1st quarter of 2011, on the domestic interest rate market the profitability of Treasury debt securities and IRS contracts grew (an increase of 19-45 b.p. and 9-34 b.p. respectively), which was mainly visible at the short end of the profitability curve. The longer end of the curve was positively influenced by a lower supply of bonds with longer maturity and the Ministry of Finance's announcements about the planned IRS transactions aimed at decreasing fixed rates.

From 12 January 2011, when the EUR/PLN exchange rate reached 3.83, a systematic depreciation of PLN to EUR could be seen. At the end of March, the exchange rate rose to 4.02. In turn, the USD/PLN exchange rate went down from 2.95 to 2.83 (due to an increase in the EUR/USD exchange rate above 1.41).

In the 1st quarter of 2011, share prices on GPW S.A. stabilized, in particular in January and February. Over the entire period, WIG20 rose slightly by 2.65%, and WIG by 2.61%.

	<p><b>Risk</b></p> <p>In order to provide security of turnovers, in the 1st quarter 2010 the Bank signed 2 master agreements (ISDA) and 3 CSA security agreements (CSA) with domestic and foreign banks.</p> <p>The Bank actively managed financial risk (liquidity risk, interest rate risk, and currency risk) concentrating on minimization of the exposure. Cash surplus in PLN not engaged in loan activity of the Bank has been invested in NBP bills, T-bills and T-bonds.</p>
Share, futures and options markets	<p>In the 1st quarter of 2011, the value of turnover of DM PKO BP SA on GPW amounted to PLN 5.7 billion and was 3.8% higher than in the same period of the prior year. This turnover gives DM PKO BP SA the 11th position in the shares and stocks market with a 3.4% share. DM achieved a nearly double increase in turnover on the options market, as it concluded every fifth transaction on GPW, which ranked it first on the market. The last quarter, as compared with the 1st quarter of 2010, was unfavourable for the contracts and bonds market. Turnover on the bonds market was over 22% lower and on the contracts market 4% lower. Although the turnover of Dom Maklerski on the bonds market did not change and DM maintained its first position on the market with a 50% share, turnover on the contracts market was lower by nearly 30%, and with a 3.9% market share DM ranked 8th.</p>
Brokerage activities	<p>At the end of March 2011, Dom Maklerski maintained 121.5 thousand investment accounts, i.e. nearly 55% more than in the same period of the prior year, which together with active register accounts, amounted to 293.7 thousand accounts in total. Moreover, the Bank played the role of market maker on the basis of 58 agreements concluded with GPW and the role of issuer's market maker on the basis of 20 agreements with companies. DM played the role of a market maker for the NewConnect market in respect of 32 companies. At the end of March, DM's offer included 138 investment funds managed by 10 management companies, and distributed four types of retail bonds under an agreement signed with the Ministry of Finance.</p>
Market maker	<p>In the 1st quarter, DM actively participated in transactions on the primary market. It introduced municipal bonds of the Capital City of Warsaw to the Catalyst market, implemented the consecutive stage of servicing the management programme of Elektrotim S.A., participated in handling calls made by Mobile Internet Technology S.A., and BZWBK S.A., and participated, as member of a selling syndicate, in handling subscriptions in the initial offering of Megaron, and in the public offering of Kredyt Inkaso S.A., Kino Polska TV S.A. DM prepared and carried out the public offering with drawing rights for shares of Ciech S.A.</p>
Trustee activities	<p>PKO Bank Polski SA is a direct participant in the National Securities Deposit and the Securities Register (NBP), member of the Council of Depositary Banks (<i>Rada Banków Depozytariuszy</i>) and Council for Non-Treasury Debt Securities (<i>Rada ds. Nieskarbowych Papierów Dłużnych</i>) of the Polish Banking Association (<i>Związek Banków Polskich</i>). The Bank maintains securities accounts and handles transactions on domestic and foreign markets, as well as provides trustee services and plays the role of depositary for pension funds and investment funds, and actively participates in work related to developing regulations and market standards.</p> <p>As a part of the offered services of securities trusteeship, at the end of March 2011, PKO Bank Polski SA maintained nearly 2 thousand securities accounts. The Bank's acquisition activities focused on seeking clients with large asset portfolios and settlement potential. These efforts resulted in an increase in the value of assets held (of 40%) from PLN 25.6 billion at the end of March 2010 to PLN 35.8 billion at the end of March 2011.</p>

## 16. Derivative hedging instruments

As at 31 March 2011, the Bank applies the following hedging strategies, applied also as at 31 December 2010:

- 1) hedges against fluctuations in cash flows from mortgage loans in CHF and negotiated term deposits in PLN, following from the risk of fluctuations in interest rates and foreign exchange rates, using CIRS transactions;
- 2) hedges against fluctuations in cash flows from floating interest rate loans in PLN, following from the risk of fluctuations in interest rates, using IRS transactions;
- 3) hedges against fluctuations in cash flows from floating interest rate loans in EUR, following from the risk of fluctuations in interest rates, using IRS transactions.

The characteristics of the cash flow hedges applied by the Bank are presented in the table below:

Hedging strategy:	Hedges against fluctuations in cash flows from mortgage loans in CHF and negotiated term deposits in PLN, resulting from the risk of fluctuations in interest rates and in foreign exchange rates, using CIRS transactions	Hedges against fluctuations from loans in PLN at float rate, resulting from the risk of fluctuations in interest rates, using IRS transactions	Hedges against fluctuations from loans in EUR at float rate, resulting from the risk of fluctuations in interest rates, using IRS transactions
Description of hedge relationship	Elimination of the risk of cash flow fluctuations generated by mortgage loans denominated in CHF and negotiated term deposits in PLN resulting from fluctuations in reference interest rates in CHF and PLN, and changes in foreign exchange rates CHF/PLN during the hedged period.	Elimination of the risk of cash flow fluctuations generated by floating rate PLN loans resulting from the interest rate risk in the period covered by the hedge.	Elimination of the risk of cash flow fluctuations generated by floating rate EUR loans resulting from the interest rate risk in the period covered by the hedge.
Hedged risk	Currency risk and interest rate risk.	Interest rate risk.	Interest rate risk.
Hedging instrument	CIRS transactions where the Group pays coupons based on 3M CHF LIBOR, and receives coupons based on 3M WIBOR on the nominal amount defined in CHF and PLN respectively.	IRS transactions where the Group pays coupons based on variable 3M WIBOR, and receives coupons based on a fixed rate on the nominal amount for which they were concluded.	IRS transactions where the Group pays coupons based on variable 3M EURIBOR, and receives coupons based on a fixed rate on the nominal amount for which they were concluded.
Hedged position	1) The portfolio of floating rate mortgage loans denominated in CHF. 2) The portfolio of short-term negotiable term deposits, including renewals in the future (high probability of occurrence). The Bank designated the hedged position according to the regulations of IAS 39.AG.99C as adopted by the EU.	The portfolio of loans in PLN indexed to the variable 3M WIBOR rate. As at 31 March 2011, the share of impaired loans amounted to 7.5% (as at 31 December 2010: 8.0%); whereas the coverage ratio for impaired loans (calculated as total impairment allowances on total receivables divided by gross carrying amount of impaired loans) amounted to 50.7% (as at 31 December 2010: 44.6%). The increase in the volume of loans assessed under the portfolio method in the 1st quarter of 2011 by PLN 412 202 thousand resulted mainly from the increase in delays in repayment in the portfolio of consumer loans and mortgage loans granted to individuals.

<sup>1</sup> In the 1st quarter of 2011, the rules for classifying the objective evidence of impairment of loan exposures were modified, the main result of which was that 'deterioration in the client's financial standing during the loan term' ceased to be included in the catalogue of individual objective evidence of impairment as regards clients who used to be classified to this group and who are a subject of low probability of default.

### 27. Legal claims

As at 31 March 2011, the total value of court proceedings in which the Bank is a defendant was PLN 326 108 thousand (as at 31 December 2010: PLN 308 304 thousand), while the total value of court proceedings in which the Bank is the plaintiff was PLN 64 611 thousand (as at 31 December 2010: PLN 60 207 thousand).

The most significant disputes of PKO Bank Polski SA are described below:

#### 1) Unfair competition proceedings

The Bank is a party to proceedings initiated on the basis of a decision dated 23 April 2001 of the President of the Competition and Consumer Protection Office (Urząd Ochrony Konkurencji i Konsumentów - UOKiK) upon request of the Polish Trade and Distribution Organization (Polska Organizacja Handlu i Dystrybucji - Związek Pracodawców) against the operators of the Visa and Europay payment systems and the banks issuing Visa and Europay/Eurocard/Mastercard banking cards. The claims under these proceedings relate to the use of practices limiting competition on the market of banking card payments in Poland, consisting of applying pre-agreed 'interchange' fees for transactions made using Visa and Europay/Eurocard/Mastercard cards as well as limiting access to this market by external entities. On 29 December 2006, UOKiK decided that the practices, consisting of joint establishment of interchange fee, did limit market competition and ordered that any such practices should be discontinued, and imposed a fine on, among others, PKO Bank Polski SA, in the amount of PLN 16 597 thousand. In detail this case was presented in the PKO Bank Polski Groups' consolidated financial statements for the year 2010.

From 1 January to 31 March 2011, no changes in the matter occurred. As at 31 March 2011, the Bank recognised a liability in the amount stated above.

With reference to the Decision of the President of the Competition and Consumer Protection Office as of 12 December 2008 imposing a fine on PKO Bank Polski SA for the unfair advertisement of the 'Max Lokata' term deposit, the Bank recognised a liability on 31 December 2008 for the above-mentioned fine amounted to PLN 5 712 thousand. On 9 February 2011, a judgment was rendered by the second instance court, in which the Court of Appeal dismissed the Bank's appeal against the first instance judgment (issued by the District Court in Warsaw - Court for Competition and Consumer Protection), and dismissed the Bank's appeal against the decision of the President of UOKiK (Office for Competition and Consumer Protection) of 12 December 2008, which means that the Bank was obliged to comply with the duties set out by the decision of the President of UOKiK of 12 December 2008 within the deadlines set out therein. On 2 March 2011, PKO Bank Polski SA paid a penalty of PLN 5 712 thousand.

#### 2) Re-privatisation claims relating to properties held by the Group

As at the date of these financial statements, four administrative proceedings are pending to invalidate decisions issued by public administration authorities with respect to properties held by the Bank. These proceedings, in the event of an unfavourable outcome for the Bank, may result in re-privatization claims being raised against the Bank. Given the current status of these proceedings as regards stating the invalidity of decisions and verdicts of public administration bodies, it is not possible to assess their potential negative financial effects for the Bank. Moreover, with respect to two properties claims were submitted by their former owners (court proceedings are pending). Until 31 March 2011 no further changes occurred with regard to the described matter. In the opinion of the Management Board of PKO Bank Polski SA, the probability of significant claims arising against the Bank in relation to the above mentioned proceedings is remote.

## 28. Supplementary information to the cash flow statement

### **31. Description of differences between the previously published financial statements and these financial statements**

In the 1st quarter of 2011, there were no significant changes introduced as regards the previously published financial statements.

### **32. Objectives and principles of risk management in the PKO Bank Polski SA Group**

Objectives and principles of risk management in the PKO Bank Polski SA Group were in details presented the PKO Bank Polski Groups' consolidated financial statements for the year 2010.

Important information concerning risk monitoring as well as changes in risk measurement methods in the period from 1 January to 31 March 2011 are presented below.

#### **32.1 Credit risk**

##### **Credit risk measurement methods**

In the 1st quarter of 2011 the Bank took into account in its rating system the identification of events indicating default, i.e. events which, in the Bank's opinion, if occurring – will make it impossible to recover receivables without such actions as exercising security or restructuring. The rating scale was extended: instead of 8 rating classes, 10 classes were introduced (7 classes for performing clients, and 3 classes for clients not performing their obligations) and, in principle, the terms and conditions determining availability of financing were maintained.

#### Concentration by the biggest business entities

As at 31 March 2011 and 31 December 2010, concentration limits had not been exceeded.

As at 31 March 2011, the level of the PKO Bank Polski SA Group risk concentration with respect to individual exposures was low – the biggest exposure to a single entity was equal to 5.7%\* and 4.2% of the consolidated own funds.

The 20 largest borrowers of the Group include only clients of PKO Bank Polski SA.

#### Concentration by the largest groups

The greatest exposure of the PKO Bank Polski SA Group towards a group of borrowers amounted to 0.85% of the PKO Bank Polski SA Group's loan portfolio. The 5 biggest groups include only clients of PKO Bank Polski SA.

As at 31 March 2011, the level of concentration risk with respect to individual exposures was low – the biggest exposure of the Group to a single entity was equal to 6.1% of the Group's consolidated own funds.

#### Concentration by industry

The Group applies industry limits in order to mitigate credit risk related to corporate clients operating in selected industries characterized by a high level of credit risk, as well as to avoid excessive concentration of exposure to individual industries.

The Groups' exposure increased compared with 31 December 2010 with respect to all sectors by ca. PLN 1.5 billion. Total exposure to four largest sectors: "Industrial processing", "Wholesale and retail trade, repair of cars, motorcycles...", "Maintenance and rental of real estate..." and "Public administration, national defence..." constituted ca. 67% of the total portfolio of loans granted to business entities.

\* Concentration in respect of the entities exempted from concentration limits

Significant concentration risk by industry was identified in the BFL SA Group (resulting from the character of activities limited to the corporate clients).

### Concentration by geographical regions

The Bank's loan portfolio is diversified in terms of geographical location.

As at 31 March 2011, the largest concentration of the Bank's loan portfolio was in the Mazowiecki region. More than half of the Bank's loan portfolio is concentrated in four regions: Mazowiecki, Śląsko-Opolski, Wielkopolski and Małopolsko-Świętokrzyski, which is consistent with the regions' domination both in terms of population and economy in Poland.

### Concentration of credit risk by currency

As at 31 March 2011, the share of exposure in convertible currencies, other than PLN, in the total loan portfolio of the Group amounted to 22.7%. The greatest part of the Group's currency exposures are those in CHF, which constitute 70.0% of the Group's currency portfolio, and they relate to the currency loan portfolio of the Bank. In case of particular Group entities, the situation is different, i.e. for the BFL SA Group, the greatest currency exposures are those in EUR (78.1% of currency loan portfolio), similarly for the BTK SA Group – credits granted in EUR (54.3% of currency loan portfolio) and for KREDOBANK SA – USD denominated loans (78.4% of the currency loan portfolio and 40.3% of the total loan portfolio).

Significant concentration risk was identified in KREDOBANK SA, and resulted from the character of the Ukrainian market, where due to weak local currency the majority of loans are granted in a foreign currency.

### Other types of concentration

In accordance with the Recommendation S and T of the Polish Financial Supervision Authority, the Bank has implemented internal limits with regard to:

- 1) portfolio of exposures with established mortgage collateral,
- 2) portfolio of loans granted to individual clients.

As at 31 March 2011, these limits have not been exceeded.

## 32.2 Interest rate risk

The PKO Bank Polski SA Group's exposure to interest rate risk as at 31 March 2011 and 31 December 2010 consisted mainly of the Bank's exposure. The interest rate risk for such currencies as PLN, EUR and CHF, generated by the Group entities, did not have a material influence on the interest rate risk of the Group and, as a result, did not change significantly its risk profile. Interest rate risk for USD was changed significantly by the exposure of the entities of the Group, where the most significant exposure concerned KREDOBANK SA.

The exposure of the Group to the interest rate risk was within accepted limits.

VaR of the Bank and stress testing analysis of the Group's exposure to the interest rate risk are presented in the following table:

Name of sensitivity measure	31.03.2011	31.12.2010
VaR for a 10-day time horizon (in PLN thousand)*	90 595	39 004
Parallel move of interest rate curves by 200 base points (in PLN thousand) (stress test)	527 465	522 641

\* Due to the nature of the activities carried out by the other Group entities generating significant interest rate risk as well as the specific nature of the market in which they operate, the Group does not calculate consolidated VaR. These entities apply their own risk measures in the interest rate risk management. KREDOBANK SA uses the 10-day interest rate VaR for the main currencies, which amounted to 19 373 thousand as at 31 March 2011 and to PLN 30 150 thousand as at 31 December 2010.

As at 31 March 2011, the Bank's interest rate VaR for a 10-day time horizon (10-day VAR, at 99% confidence level) amounted to PLN 90 595 thousand, which accounted for approximately 0.55% of the value of the Bank's own funds. As at 31 December 2010, VaR for the Bank amounted to PLN 39 004 thousand, which accounted for approximately 0.24% of the Bank's own funds\*.

## 32.3 Currency risk

\* Own funds calculated in accordance with regulations governing calculation of the capital adequacy ratio.

VaR of the Bank and stress-testing of the Group financial assets exposed to currency risk are stated cumulatively for all currencies in the table below:

Name of sensitivity measure	31.03.2011	31.12.2010
VaR for a 10-day time horizon (in PLN thousand)*	2 031	3 171
Change of CUR/PLN by 15% (in PLN thousands) (stress-tests)	1 486	6 081

\* Due to the nature of the activities carried out by the other Group entities generating significant currency risk as well as the specific nature of the market in which they operate, the Bank does not calculate consolidated VaR. These entities apply their own risk measures in the currency risk management. KREDOBANK SA uses the 10-day VaR, which amounted to ca. 74 thousand as at 31 March 2011 and to ca. PLN 182 thousand as at 31 December 2010.

The level of currency risk was low both as at 31 March 2011 and as at 31 December 2010.

The Group's currency positions are presented in the table below:

Currency position	31.03.2011	31.12.2010
USD	1 703	(78 916)
GBP	(838)	48 073
CHF	(21 676)	(18 820)
EUR	(2 484)	(4 035)
Other (Global Net)	11 674	11 257

The volume of currency positions is a key factor determining the level of currency risk to which the Group is exposed (except for volatility of foreign exchange rates). The level of currency positions is determined by all foreign currency transactions, which are concluded by the Group, both in the statement of financial position and off-balance sheet. Exposure of the Bank to currency risk is low (with reference to own funds, VaR for a 10-day time horizon at 99% confidence level for the Bank's currency position as at 31 March 2011 amounted to ca. 0.01%).

### 32.4 Liquidity risk

Liquidity gaps presented below include i.a. the statement of financial position items of the Group in real terms as regards core deposits of non-financial entities and their maturity, core loans in current accounts of non-financial entities and their maturity and liquid securities and their maturity.

	a'vista	0 - 1 month	1 - 3 months	3 - 6 months	6 - 12 months	12 - 24 months	24 - 60 months	over 60 months
<b>31.03.2011</b>

<b>31.12.2010</b>								
The Group - adjusted gap in real terms	3 207 473	14 102 549	(949 842)	(106 638)	3 800 570	5 160 414	(1 014 208)	<b>(24 200 318)</b>
The Group - cumulative adjusted gap in real terms	3 207 473	17 310 022	16 360 180	16 253 542	20 054 112	25 214 526	24 200 318	-

In all time horizons, the PKO Bank Polski SA Group's cumulative liquidity gap in real terms\* as at 31 March 2011 and 31 December 2010 was positive. This means a surplus of assets receivable over liabilities payable.

\* The PKO Bank Polski SA Group's liquidity gap in real terms has been determined as the sum of PKO Bank Polski SA's liquidity gap in real terms and contractual liquidity gaps of the remaining entities of the PKO Bank Polski SA Group.

The table below presents liquidity reserve of the Bank as at 31 March 2011 and 31 December 2010:

Name of sensitivity measure	31.03.2011	31.12.2010
Liquidity reserve to 1 month* (in PLN million)	12 251	10 151

\*Liquidity reserve equals the gap between the most liquid assets and expected and potential liabilities which mature in a given period of time.

As at 31 March 2011, the level of core deposits constituted approximately 94.6% of all deposits of the Bank's (excluding interbank market), which is approximately 0.6 pp. lower as compared to the level as at the end of 2010.

### 32.5 Capital adequacy

Objectives and principles of capital adequacy management in the PKO Bank Polski SA Group were in details presented in the PKO Bank Polski SA Group' consolidated financial statements for the year 2010. In these statements there was also included the information concerning components of the Group's own funds calculated for capital adequacy purposes as well as the methods of capital requirements calculation for particular risk purposes.

As at 31 March 2011, the level of capital adequacy of the Group remained on the safe level significantly above the statutory limits.

The capital adequacy ratio of the Group, one of the main capital adequacy measures, as compared to 31 December 2010, increased by 0.91 pp., which has been mainly caused by the increase of the Bank's own funds calculated for capital adequacy purposes.

#### 32.5.1 Own funds calculated for capital adequacy purposes

As at 31 March 2011, own funds of the Group calculated for capital adequacy purposes increased by PLN 1 714 882 thousand, which was mainly due to the recognition of profit earned by the Bank in 2010 after expected charges deduction (i.e. PLN 1 936 209 thousand) to the Bank's own funds.

The structure of the Group's own funds calculated for capital adequacy purposes is presented in the table below:

THE GROUP'S OWN FUNDS	31.03.2011	31.12.2010
<b>Basic funds (Tier 1 capital)</b>	<b>17 780 711</b>	<b>15 960 255</b>

<b>Capital adequacy ratio</b>	<b>13.38%</b>	<b>12.47%</b>

In the 1st quarter of 2011, an increase in the capital requirement in respect of credit risk resulted mainly from an increase of ca. 1.34% in the Group's loans portfolio.

The decrease of market risk capital requirement was mainly due to the decrease of issue guarantees liabilities by ca. 13.24%,

### 32.5.3 Internal capital (Pillar 2)

Principles of the calculation of internal capital in the PKO Bank Polski SA Group were in details presented the PKO Bank Polski Groups' consolidated financial statements for the year 2010.

### 32.5.4 Disclosures (Pillar 3)

As at 31 March 2011, the share of impaired loans amounted to 6.7% (as at 31 December 2010: 7.1%); whereas the coverage ratio for impaired loans (calculated as total impairment allowances on total receivables divided by gross carrying amount of impaired loans) amounted to 51.7% (as at 31 December 2010: 44.9%).

The increase in the volume of loans assessed under the portfolio method in the 1st quarter of 2011 by PLN 414 479 thousand resulted mainly from the increase in delays in repayment in the portfolio of consumer loans and mortgage loans.

<sup>1</sup> In the 1st quarter of 2011, the rules for classifying the objective evidence of impairment of loan exposures were modified, the main result of which was that 'deterioration in the client's financial standing during the loan term' ceased to be included in the catalogue of individual objective evidence of impairment as regards clients who used to be classified to this group and who are a subject of low probability of default.

In all time horizons, the Bank's cumulative adjusted liquidity gap in real terms as at 31 March 2011 and as at 31 December 2010 was positive. This means a surplus of assets receivable over liabilities payable.

## Capital adequacy

The capital adequacy level of the Bank as at 31 March 2011 remained on a safe level and was significantly above the statutory limits.

Compared with 31 December 2010, the Bank's capital adequacy level increased by 1 pp., which was mainly caused by the recognition of profit earned by the Bank in 2010 after expected charges deduction which was assigned to the Bank's own funds calculated for capital adequacy purposes.

### Own funds calculated for capital adequacy purposes

As at 31 March 2011, the Bank's own funds calculated for capital adequacy purposes increased by PLN 1 827 383 thousand, which was mainly due to the recognition of profit earned by the Bank in 2010 after expected charges deduction (i.e. PLN 1 936 209 thousand).

The structure of the Bank's own funds defined for capital adequacy purposes is presented in the table below:

BANK'S OWN FUNDS	31.03.2011	31.12.2010

### **Subsequent events which may have an impact on future financial results**

1. On 1 April 2011, the Supervisory Board of PKO Bank Polski SA passed resolutions appointing:
  - Mr Piotr Stanisław Alicki as Vice-President of the Management Board,
  - Mr Bartosz Drabikowski as Vice-President of the Management Board,
  - Mr Jarosław Myjak as Vice-President of the Management Board,
  - Mr Jacek Obłąkowski as Vice-President of the Management Board,
  - Mr Jakub Papierski as Vice-President of the Management Board.

In accordance with resolutions passed, above mentioned persons were appointed to specific functions in PKO Bank Polski SA for the joint term of the Management Board beginning with the day of General Shareholders Meeting which will approve Financial Statements of PKO Bank Polski SA for 2010.

On 20 April 2011 Mr Krzysztof Dresler, the Vice-President of the Board, informed the Bank about his decision not to seek appointment to the Board of the Bank for the next term.

2. On 14 April 2011, the Extraordinary General Shareholders' Meeting adopted Resolution No. 3/2011 on amendments to the Memorandum of Association of Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna. The proposed amendments to the Bank's Memorandum of Association were presented by the State Treasury – the Bank's shareholder. The changes contained in the Resolution related to:
  - limiting the voting rights of shareholders along with adopting principles for accumulating and reducing votes,
  - method of appointing the Supervisory Board,
  - agenda of the first meeting of the Supervisory Board in its new term of office,
  - definition of the parent company (*podmiot dominujący*) and subsidiary (*podmiot zależny*).
3. The Management Board of Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna ('Bank') received a letter from the State Treasury ('ST') and from Bank Gospodarstwa Krajowego ('BGK'), acting as the Bank's shareholders ('Selling Shareholders'), which informed about their intention to sell their shares in the Bank ('Transaction'), and requesting that action be started to prepare the Bank for participation in the Transaction ('Letters').

The Selling Shareholders assume that the Transaction will be carried out as a public offering, which will require preparing the prospectus and having it approved by the Polish Financial Supervision Authority. According to the information contained in the Letters and initial assumptions of the Selling Shareholders, the Transaction is to be completed in September 2011. In connection with the Letters, on 19 April 2011 the Bank's Management Board made a decision to commence actions aimed at preparing the Bank for participation in the Transaction.

4. On 20 April 2011, the Management Board of PKO Bank Polski SA ('Bank') adopted a resolution on withdrawing from the intention to carry out an issue of subordinated bonds in the maximum amount of up to PLN 5.0 billion (five billion) ('Issue'), the proceeds from which were to be earmarked for increasing the supplementary capital of the Bank under Art. 127.3.2.b of the Banking Law. As a result of this decision, the Bank will apply to the Polish Financial Supervision Authority to discontinue proceedings in respect of its consent for earmarking the proceeds from the Issue for increasing the Bank's supplementary capital.
